2012

2012

Model railroading has the power to transport us to unlimited worlds of imagination. Now you can run away to the circus with Bachmann's new licensed *Ringling Bros. and Barnum & Bailey™ Circus* train sets in both HO and Large Scale. These ready-to-run sets bring the spectacle of *The Greatest Show On Earth®* to your railroad. Or you can take a trip through American history with the HO *Liberty Bell Special*, *Cargo King*, and *Iron King* and N scale *Durango & Silverton* train sets. There's also family fun on board with our great selection of HO and Large Scale *Thomas & Friends™* locomotives, train sets, and accessories. BIG news for Thomas fans in 2012 are the Large Scale *Thomas' Christmas Delivery* train set, Emily locomotive with moving eyes, and additional rolling stock.

For prototypical sound right out of the box at a price that fits your budget, look for our new HO locomotives with DCC Sound Value on Board™. The DCC sound-equipped *Alco 2-6-0 Steam Locomotive* includes our Sound Value SoundTraxx® sound package with authentic prototypical chuff, short and long whistles, bell, air pump, steam release, and blower. There are also three DCC sound-equipped diesels—the *Alco S4*, *FA2*, and *FB2*—that include our Sound Value diesel sound package with prototypical engine exhaust, air horn, short horn, and bell. We also offer these new Alco steamers and diesels in DCC-ready versions.

The *Alco RS-3* is now available in an N scale DCC-equipped model. Our N scale stock keeps rising with the new *ACF 50' 6" Outside Braced Sliding Door Box Car*, *Northeast Steel Caboose*, *AAR 40' Steel Box Car*, and *ACF 36' 6" 10,000-Gallon Single-Dome Tank Car*, all with magnetically operated *E-Z Mate®* Mark II couplers.

The biggest car on the rails, the *380-Ton Schnabel Transformer Car*, has arrived in our HO scale *Spectrum®* line. Also new in *Spectrum®* are two sound-ready DCC-equipped locomotives: the HO *Be'O EM-1 2-8-8-4* and the On30 *14-Ton Two-Truck Stearns-Heisler*. You can easily add 16-bit Tsunami® SoundTraxx® sound to these engines with the purchase of the companion *Plug-and-Plug EM-1 Sound Module* and *Plug-and-Plug Stearns-Heisler Sound Module*. Some of the highlights in our *Spectrum®* N scale line are the DCC-equipped *EMC Gas Electric Doodlebug with Trailer Coach* and the *USRA Light 2-10-2*.

Williams by Bachmann is delighted to introduce its first brand-new steam locomotive in O Gauge, the *Baldwin 4-6-0*, offered for separate sale and also included in three new ready-to-run train sets: *The Greyhound*, *Lake Shore Limited*, and *Christmas Special*. See the attached Williams by Bachmann catalog for more exciting new O Gauge products.

We invite you to enter the pages of this catalog to begin your model railroading adventure. Now that's the way to run a railroad!®

Liberty Bell Special

The visits to nearly 400 cities and towns over a 32-year span drew huge cheering crowds and special celebrations that often included music, parades, and military salutes. Civil War-Union

an E-Z Track® set with E-Z Mate® couplers

Item No. 00708 • Suggested price: \$275.00

With the shots fired at Fort Sumter on April 12, 1861, the War Between the States officially began over 150 years ago. From the start of the Civil War, the Union recognized the advantages offered by railroads and was quick to employ the “iron horses” for the first time in a military campaign. With the formation of the United States Military Railroads (USMRR), the Federals gained the authority to take possession of whatever equipment was necessary to operate strategic rail lines in support of the Union Army. Backed by the government and managed by the leading railroad men of the time, a well-equipped USMRR train was commonly powered by a 4-4-0 locomotive pulling a box car, flat car, water tank car, and gondola. A trailing combine often served as a guard car to ward off Confederate attacks. Our *Commemorative 150th Anniversary Edition Civil War - Union* set marks this turning point in our nation’s history and comes complete with:

- 4-4-0 American locomotive with operating headlight and tender
- USMRR water car
- USMRR box car
- USMRR gondola
- USMRR flat car
- USMRR combine
- 100-piece set of Civil War military figures (blue)
- 56" x 38" oval of E-Z Track® including 12 pieces of curved track, 3 pieces of straight track, and 1 plug-in terminal rerailer
- 3 cannons
- 4 horses

Civil War-Confederate

an E-Z Track® set with E-Z Mate® couplers

Item No. 00709 • Suggested price: \$275.00

With the shots fired at Fort Sumter on April 12, 1861, the War Between the States officially began over 150 years ago. Railroading would play a key role in the Civil War, providing logistical support and carrying munitions, supplies, and troops to each side’s respective armies in the field. Lacking the financial power and the more standardized rail system of their Northern counterparts, Southern-held railroads relied heavily on the ingenuity of their railroad men to support the troops. A typical Confederate consist featured an assortment of commandeered rolling stock bearing the names of a variety of Southern railroads, which is reflected in this model. Our *Commemorative 150th Anniversary Edition Civil War - Confederate* set marks this turning point in our nation’s history and comes complete with:

- 4-4-0 American locomotive with operating headlight and tender
- water car (Manassas Gap)
- box car (Savannah, Albany & Gulf)
- gondola (Fredericksburg & Potomac)
- flat car (Mississippi Central & Louisiana)
- bobber caboose (Atlanta & West Point)

Magnetically Operated Knuckle Couplers

E-Z Mate® couplers make use of precision molding techniques to allow the molding of springs as an integral part of the knuckle coupler; *E-Z Mate®* Mark II couplers include an integrated metal coil spring. *E-Z Mate®* and *E-Z Mate®* Mark II couplers eliminate the problems and expense associated with separate coil springs.

To install *E-Z Mate®* and *E-Z Mate®* Mark II couplers, just remove the coupler pocket cover, drop in the coupler, and replace the cover. Operation is simple as well. *E-Z Mate®* and *E-Z Mate®* Mark II couplers operate with a standard metal “glad hand” and under-track magnet, and they are completely compatible with all magnetically operated knuckle couplers currently on the market. (Our under-track magnet comes with a trackside brakeman figure to indicate the magnet’s position.) Coupling, uncoupling, and other yard operations are all performed with ease.

HO SCALE PLASTICVILLE® U.S.A. BUILT-UPS

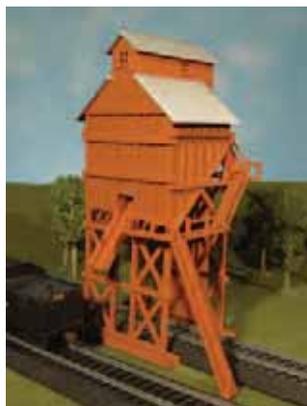

Suggested prices shown.

Since 1947, hobbyists and collectors have made *Plasticville® U.S.A.* products their structures of choice. Now, in addition to our traditional, easy-to-assemble kits, Bachmann is pleased to offer these pre-assembled *Plasticville® U.S.A.* buildings.

Plasticville® pieces add character and dimension to your HO scale layout. Many buildings and accessories have been added to the *Plasticville®* line throughout its history, and many are still produced from their original molds. As a fun challenge to collectors you can collect hundreds of product, color, and packaging variations that have occurred over the years (you can even join the independent Plasticville Collectors Association at plasticvilleusa.org). Whether you're new in town or an established civic leader, Bachmann builds *Plasticville® U.S.A.* for you. City growth is limited only by your imagination!

O SCALE PLASTICVILLE® U.S.A. BUILT-UPS

Since 1947, hobbyists and collectors have made *Plasticville® U.S.A.* products their structures of choice. Now, in addition to our traditional, easy-to-assemble kits, Bachmann is pleased to offer these pre-assembled *Plasticville® U.S.A.* buildings.

Plasticville® pieces add character and dimension to your O scale layout. Many buildings and accessories have been added to the *Plasticville®* line throughout its history, and many are still produced from their original molds. As a fun challenge to collectors, you can collect hundreds of product, color, and packaging variations that have occurred over the years (you can even join the independent Plasticville Collectors Association at plasticvilleusa.org). Whether you're new in town or an established civic leader, Bachmann builds *Plasticville® U.S.A.* for you. City growth is limited only by your imagination!

Mountaineer

Item No. 90048 • Suggested price: \$500.00

Beginning construction in the mountains of post-Civil War Tennessee, the East Tennessee and Western North Carolina Railroad Company was known locally as the “Eat Taters and Wear No Clothes” railroad. Narrow gauge operations began in 1881, and after nearly 60 years of operation, developing interstate highway systems and the torrential rains of 1940 worked to bring about the railroad’s demise. Following a series of purchases and acquisitions (singing cowboy Gene Autry once owned an ET&WNC

locomotive), the railroad was resurrected in 1956, going on to become one of North Carolina’s favorite travel attractions. Our *Mountaineer* passenger set comes complete with a 4-6-0 steam locomotive (with operating headlight, smoke, and speed-synchronized sound), coal tender, coach with lighted interior, and observation car with lighted interior. The set also includes an 8'2" x 4'3" oval of track (20 pieces), power pack and speed controller, illustrated “Bach-Man” instruction manual, and DVD-format video instructions.

Item No. 90037 • Suggested price: \$450.00

Lubricants for Model Railroading Professionals

For the best care and maintenance of motive power, rolling stock, and track, Bachmann has a full line of premium-grade lubricants. Four *E-Z Lube*® products are offered:

- light gear oil
- heavy gear oil
- heavy duty grease
- conductive contact lubricant

Each of the lubricants has a specific purpose. The light gear oil is for use on all gears, bushings, shafts, and bolsters. It is non-shedding and will not “sling off.” The heavy gear oil lubricates for extended periods of time and is formulated for use on motor bushings, bearings, valve gear, side rods, and draft gear boxes. For applications requiring heavier viscosity material, such as Large Scale trains, it’s best to use the heavy duty grease. And for superior electric motor maintenance and track cleaning, your choice is the conductive contact lubricant.

With proper maintenance, you can extend the life and enjoyment of your railroad equipment for many, many years. We urge you to establish a sensible maintenance schedule and to use our *E-Z Lube*® products for professional care.

Break the Silence on Your Railroad

Bachmann Trains offers an extensive line of DCC Sound-equipped *Spectrum*[®] locomotives. Working closely with SoundTraxx[®], we're pleased to offer HO, On30, and Large Scale engines equipped with Tsunami[®] sound technology. Using sounds taken from real locomotives, modelers can add a new level of realism to their railroads with a broad palette of prototypical sound effects and DCC functions. Plus, the dual-mode decoders work on both DC and DCC layouts automatically. So break the silence on your railroad. See the product guide on the following page for the key to our SOUND ON BOARD[™] locomotives.

Tsunami

Decoder features include:

- authentic sound effects uniquely appropriate to each model including whistles, bells, chuffs, and air pumps
- additional sounds include dynamo, injectors, coupler clank, water stop, and more
- three whistles to choose from in each model
- whistle can be played in real time to create authentic whistle signals
- high-quality 16-bit digital sound
- advanced motor control features including Load Compensation and Silent Drive to provide smooth, quiet operation
- supports all recognized programming methods

Spectrum

Since the introduction of our first *Spectrum*® locomotive in 1988, Bachmann has expanded the *Spectrum*® line to include motive power and rolling stock from many eras in N, HO, On30, and Large Scale. As always, the *Spectrum*® philosophy is to produce the highest-quality products at an affordable price. As we expand and vary the *Spectrum*® line, our models continue to change in order to feature the latest model railroading technology. Bachmann currently produces locomotives that are DCC ready, DCC equipped, and DCC sound equipped.

Our DCC ON BOARD™ motive power features dual-mode NMRA-compliant decoders for control of speed, direction and lighting. DCC SOUND ON BOARD™ motive power incorporates Soundtraxx® Tsunami® technology with a 16-bit processor that contains a unique suite of sounds including whistles, bells, chuffs, and much more. New for 2012 are two Sound-Ready DCC-equipped locomotives: the HO *B&O EM-1 2-8-8-4* and On30 *14-Ton Two-Truck Stearns-Heisler* with plug-and-play sound capability. You can add full 16-bit Tsunami® SoundTraxx® sound to these locomotives with the purchase of the companion *EM-1* or *Stearns-Heisler Sound Module*.

To help you distinguish among the various types of *Spectrum*® products, we have included color-coded sidebars in this section of the catalog. Below is a list of the product categories and their corresponding color codes.

380-Ton Schnabel Transformer Car (North American Style)

Performs best on 22" radius curves or greater.

Suggested price: \$275.00 each

The Schnabel car's unique design allows it to carry extremely heavy or oversized loads, such as generators and transformers for power stations, by making the load an element of the car. The two tapered lifting arms that hold the load resemble a bird's beak, which gave the car its name—*Schnabel* is from the German for "carrying-beak-wagon" (*Tragschnabelwagen*). Schnabel is a funny name for a seriously powerful freight car.

Features include:

- 16 sets of 125-ton roller-bearing trucks
- prototypically correct 36" metal wheels
- RP25 wheel contours
- 8 span bolsters
- detailed transformer load
- molded hydraulic lines and pumps

B&O EM-1 2-8-8-4 (Sound Ready)

Performs best on 22" radius curves or greater.

Suggested price: \$465.00 each

Built after World War II restrictions put a limit on new diesel locomotives, the EM-1 was the last steam locomotive class used by the B&O Railroad. This simple articulated engine provided tremendous power at high speeds, making it an ideal hauler of heavy loads through the mountains of West Virginia. The B&O president, Roy B. White, was so impressed after viewing the first one that he exclaimed, "Well, I must say, they have everything!" Bachmann follows in this tradition by presenting a feature-rich DCC-equipped B&O EM-1 2-8-8-4 model, ready for the addition of 16-bit Tsunami® plug-and-play prototypical sound. (Separate-sale Item No. 44951, EM-1 Plug-and-Play Sound Module, required for sound-on-board performance)

Features include:

- DCC-equipped for speed, direction, and lighting
- sound ready with factory-installed speaker
- brass flywheel
- soft white LED headlight and backup light
- metal wheels
- ball-and-socket driveshaft
- separately applied handrails and stanchions
- three-point contacts for electrical pickup in tender

- operating headlight

Baldwin Modern 4-4-0 Locomotive

Performs best on 15" radius curves or greater.

Suggested price: \$475.00 each

Because it was the most widely employed wheel arrangement in this country from the 1880s through the end of the steam era, the 4-4-0 became known as the "American." The original ornate locomotives gave way to Americans with cleaner lines, such as these Baldwin "modern" models. Bachmann has taken the modern 4-4-0 to the next level with features such as an NMRA-compliant 8-pin decoder and Soundtraxx® Tsunami® sound technology that lets you enjoy every authentic whistle, bell, chuff, clang, and more in realistic high-quality 16-bit sound.

Features include:

- DCC sound-equipped
- dual-mode NMRA-compliant decoder with 8-pin plug
- cog V-belt drive
- die-cast boiler, chassis, and frame
- operating headlight
- finescale metal detail parts including separately applied bell, whistle, domes, and piping

Baldwin Modern 4-4-0 Locomotive

Performs best on 15" radius curves or greater.

Suggested price: \$325.00 each

Because it was the most widely employed wheel arrangement in this country from the 1880s through the end of the steam era, the 4-4-0 became known as the "American." The original ornate locomotives gave way to Americans with cleaner lines, such as these Baldwin "modern" models. Bachmann has taken the modern 4-4-0 to the next level with features such as an NMRA-compliant 8-pin decoder.

Features include:

- DCC-equipped for speed, direction, and lighting
- dual-mode NMRA-compliant decoder with 8-pin plug
- cog V-belt drive
- die-cast boiler, chassis, and frame
- operating headlight
- finescale metal detail parts including separately applied bell, whistle, domes, and piping
- detailed backhead
- painted engineer and fireman figures
- RP25 wheel contours
- E-Z Mate® Mark II couplers on front and rear

1:20.3 Baldwin 2-6-6-2 Articulated Saddle Tank Locomotive

Performs best on 8' diameter curves or greater.

Suggested price: \$1425.00 each

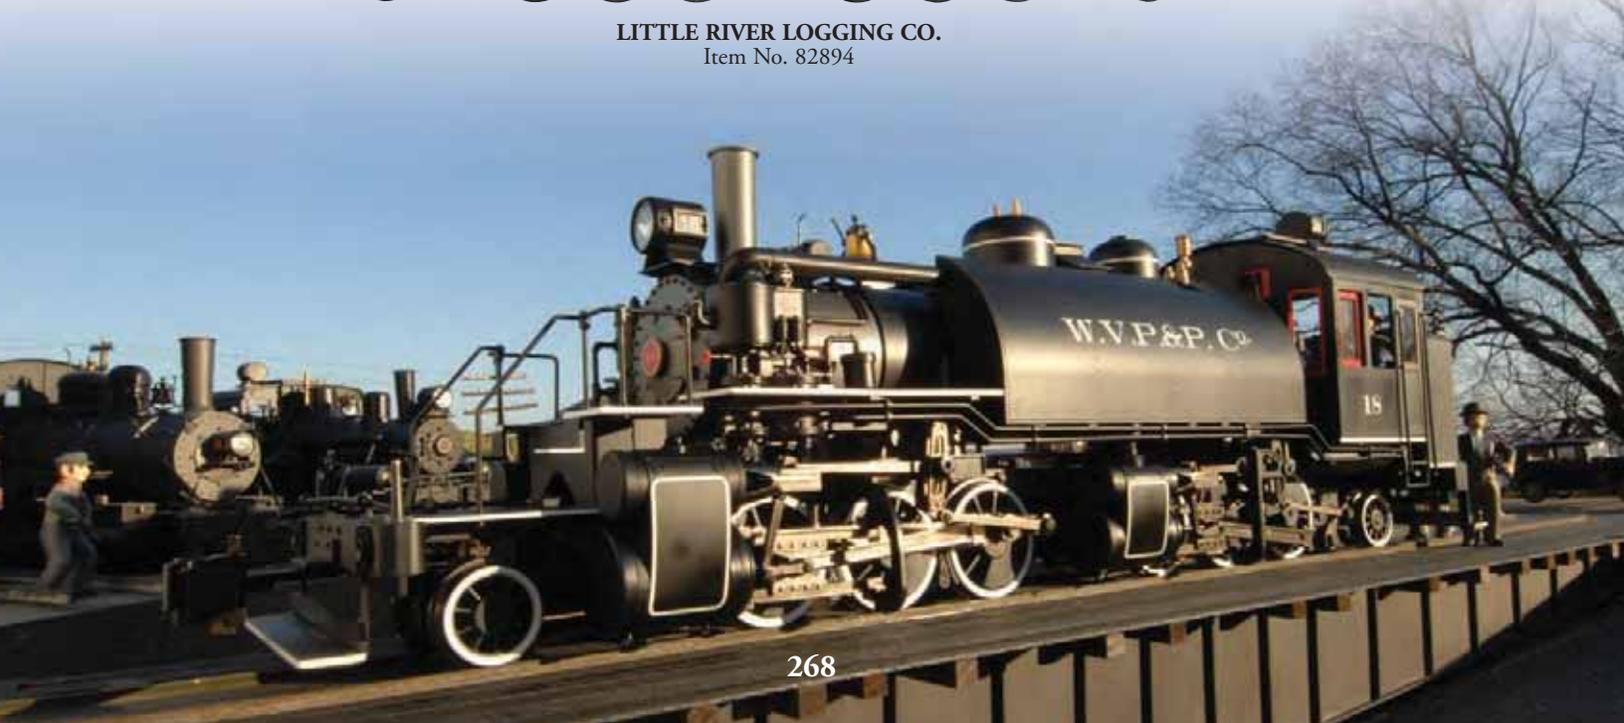

The 1920s marked the end of a logging push in the northwestern United States, where lumber companies needed more powerful engines to efficiently handle greater load capacities and quicker turnaround times demanded by the ever-increasing distances from the logging camps to the sawmills. In 1928, Biles Coleman Lumber Company approached the Baldwin Locomotive Works with a request for a narrow gauge 2-6-6-2 capable of handling operations on a recently developed twenty mile logging line. Baldwin responded with a scaled down version of an existing standard gauge design, which was promptly approved by Biles Coleman. Unfortunately, the Great Depression intervened and Biles-Coleman never placed an order with Baldwin. After more than 80 years, we're finishing the job with this exquisite model.

Features include:

- nonproprietary plug-and-play electronics interface to accommodate the control system of your choice, including DC, NMRA DCC, and radio control/battery operation
- two custom wound motors with flywheels
- two idler gear boxes
- prototypical equalized chassis under both power assemblies
- all-wheel driver pickup
- die-cast scale knuckle couplers, front and rear
- constant lighting of LED headlight, cab light, and rear light
- easy access to four switches in boiler to choose track or battery power pickup, operation according to NMRA or large scale model railroading practices, motor power on/off with or without lights, and center "off" position for DCC or DC operation of cab light and firebox flicker
- switch behind smokebox door with center "off" position for DCC or DC operation of smoke unit
- die-cast offset shank couplers also included for use with other popular brands of narrow gauge couplers

1:20.3 Large Scale K-27 Steam Locomotive

Performs best on 8' diameter curves or greater.

Suggested price: \$1650.00 each

As the 19th century came to a close, the older, smaller engines of the Denver & Rio Grande's narrow gauge railroad struggled to haul freight and passenger traffic over the line's steep grades and tight curves. After soliciting design specifications from several builders for a locomotive able to handle at least twice the tonnage of the engines previously in use, the railroad selected Baldwin Design Specification W4213, later known as the K-27. A total of fifteen K-27s were ordered and assigned road numbers 450 to 464, with numerous modifications made throughout the course of their many years of operation. Honoring Baldwin's innovative design, we're proud to present these *Spectrum*® K-27 locomotives, each with details, paint scheme, cab, and tender shell specific to an individual road number at a certain time in its service career.

Features include:

- fully equalized locomotive suspension as on the prototype, including individually sprung drivers, trailing truck, and floating gear box
- nonproprietary plug-and-play electronics interface to accommodate DC, NMRA DCC, and remote control/battery operation
- motor with ball bearings and brass machined flywheel
- complete die-cast frame and chassis with numerous die-cast parts throughout
- heavy-duty plugs and wiring
- optical sensors in cylinders for sound synchronization
- constant lighting for LED front and rear headlights and marker lights
- three-position switches with center "off" position for DCC or DC operation of smoke unit, cab light, and firebox
- all-wheel driver and tender pickup
- three switches in tender to choose track or battery power pickup, operation according to NMRA or Large Scale model railroading practices, and motor power on/off with or without lights
- room available for aftermarket sound installation
- complete brake rigging and shoes
- prototypical detailing throughout
- body-mounted die-cast scale knuckle couplers (longer coupler shanks included for use on tight radii); offset shank couplers also included

1:20.3 Baldwin 2-4-4 Forney Locomotive

Performs best on 8' diameter curves or greater.

Suggested price: \$1250.00 each

Matthias Forney's locomotive was designed to power elevated and surface commuter railroads in America's rapidly growing cities. It was very successful in this role but its success seemed short-lived due to the electrification of these rail lines. The unique design of Forney's locomotive enabled it to live on and made it an ideal form of motive power on railroads hauling stone in quarries, pulling log trains, and harvesting rubber on plantations as far away as Brazil. Bachmann continues this tradition by bringing you a revolutionary design from the past and updating it with exciting new engineering features from the present.

Features include:

- nonproprietary plug-and-play electronics interface to accommodate the control system of your choice, including DC, NMRA DCC, and radio control/battery operation
- custom wound motor with flywheel
- heavy-duty driver and trailing truck electrical pickup
- exclusive truck locking mechanisms for multiple radii curve operation
- LED headlight and cab lighting
- highly detailed cab interiors featuring sliding windows and operating doors
- die-cast scale knuckle couplers front and rear
- switch behind smokebox door with center "off" position for DCC or DC operation of smoke unit
- moveable ash pan grates with authentic ash pan "glow"
- glowing firebox (load compensated)
- blackened die-cast metal running gear featuring optical sensors for aftermarket sound synchronization
- hand-tooled coal load
- brass bell with bell chord
- numerous die-cast detail parts including pop valves, whistle, and piping
- easy access to electronics in coal bunker

1:20.3 Scale Narrow Gauge Rail Truck

Along with the financial devastation of the Great Depression, the Rio Grande Southern faced natural disaster as well when a mudslide cut the railroad into two pieces. A divided line severely reduced rail traffic, and the struggle to remain financially solvent in the face of these difficulties inspired the RGS to develop Motor Car #1, a cost-effective solution to severely reduced passenger and freight traffic. Based on the replica of Rio Grande Southern Motor #1 that resides in Colorado's Ridgeway Railroad Museum, our large scale *Rail Truck* brings whimsy and realism to narrow gauge modeling.
