Dear Friends,

2017 promises to be an exciting year at Lionel and for all of you – our extended family. This year’s signature catalog is filled with something for every interest - from a Post-war classic to innovative passenger cars that will have you seeing your railroad from a whole new perspective!

You’ll also find more control options than ever before! With the addition of Bluetooth® to our LionChief® and LionChief® Plus lines, you can now run your train via remote, or your favorite smart device. And you’ll find some all new locomotives to take advantage of these fun control options, as well. Now, for the first time, you’ll find a scale diesel available with either LEGACY® or LionChief® Plus control!

We’re also excited and proud to show the expansion of our LionScale line of freight cars painted, decorated and assembled right in our North Carolina headquarters! Four new car types appear in this catalog, along with their inclusion in an all new scale set!

Whether it’s a massive, articulated steam locomotive, a diminutive and whimsical loggers’ dinner train, scale models with tinplate style, an all-new, modern freight car, the latest in technology or nostalgia for the past – you are sure to find something you’ve just got to add to your layout in the pages ahead.

We hope you’ll have as much fun with these trains as we have in making them for you!

The Lionel Team

Find us on...

Lionel Guide

OPERATION

LEGACY® Control System

 This revolutionary control system allows you to run your LEGACY® Control System-equipped locomotive just like a real engineer runs his trains. With its enhanced sounds and 200 speed steps, this system allows properly equipped engines to function with unparalleled options. The CAB-2 Remote Controller has an LCD screen display, vibration that simulates the effort of the locomotive, and other exciting operating features. The new CAB-IL Remote Controller is a simplified alternative to unlock many LEGACY® features.

ODYSSEY II Speed Control

 Slow speed and start-up operation are smooth and steady with ODYSSEY II Speed Control. Watch your locomotive as it creeps through the yard or fights up a grade without hesitation.

Trainmaster Command Control

 Locomotives equipped with the classic TrainMaster Command Control system are controlled by commands from your CAB-1 or CAB-2 Remote Controller. ElectroCouplers™, basic sounds, and multiple unit lash-ups are all at your fingertips as you walk around your layout.

ElectroCouplers™

 (LEGACY®, LionChief® Plus, TMCC® required) Open these couplers anywhere on the layout without uncoupling track sections. The CAB-1 or CAB-2 Remote Controller activates the ElectroCouplers™. Also be sure to listen for authentic sounds of the coupler in operation with the RailSounds® sound system.

Wireless Tether™ Connection

 Looking to enhance the appearance of Lionel steam locomotives, we developed the exclusive infrared Wireless Tether connection so that the locomotive and tender can communicate without cumbersome wiring between the units. LEGACY® equipped steam locomotives have a new small profile housing that mounts to the top of the drawbar!

Magne-Traction

 On some classic or Postwar locomotives, the wheels are magnetized, increasing track adhesion for extra traction and stability around curves.

Traction Tires

One or more of the driving wheels are fitted with rubber tires for extra pulling power for hauling long trains. Traction tires grip the rails, enhancing tractive effort.

LionChief® Plus Remote Control

 Using the same remote system of the basic LionChief, LionChief® Plus locomotives feature everything described in basic feature everything described in basic LionChief, PLUS many additional hi-tech features that increase the realism of your operations. Additional features include fan-driven smoke, ElectroCouplers, flickering firebox on steam engines, Railsounds®, speed control, higher detail, and the ability to operate with either a remote controller or a traditional transformer at the flip of a switch on your locomotive. LionChief® Plus provides high-tech features at an affordable price.

Starting in 2017, these locomotives also feature Bluetooth® compatibility so that you can also control them with your smart device.

Plug-Expand-Play®

 This revolutionary accessory system simplifies the setup and operation of your favorite accessories. Plug-Expand-Play® accessories easily connect to your layout for power using a standardized 3-pin cable that connects directly to a Plug-Expand-Play® Lock-on track section. Separate control boxes that are necessary for control of some accessories also use the easy-to-use cable system. Many multi-operation accessories utilize a standardized 6-pin control cable, and there are separate-sale cables that allow you to expand your system to meet your needs. More complicated wiring necessary on older accessories is simplified with the new standardized cable system fitted on every Plug-Expand-Play® accessory.

SOUND & SMOKE

FreightSounds

Realistic sounds aren't limited to locomotives! With a FreightSounds-equipped car, you'll hear the sounds of the train as it rolls along – the clickety-clack of the rails, the squeal of the wheels, the bumps and thumps of the cars in motion.

RailSounds®

 Widely regarded as the industry standard, the impressive RailSounds® sound system brings the real sounds of the railroad to your layout. From the mechanical symphony of the locomotives, to the commotion of the station, you will be impressed by the digitally recorded samples of these special and authentic sounds.

LEGACY® Real-Time Quilling Whistle/Quilling Horn

On the CAB-2 remote, push up and ring the warning bell control button one ring at a time with your own rhythm signature! Pull down on the lever and the horn/whistle responds with increasing intensity. Like a real engineer, you develop your own signature sound, “quilling” the steam whistle or changing the harmonics and intensity of the diesel horn.

Braking Sounds

Press down on the brake button of your CAB-2, CAB-IL, or CAB-1 to reduce speed incrementally or rapidly decrease your throttle and listen for the screeching of your locomotive's brakes. Start-up and Shut-down Listen as the diesel engine turns over or the steam locomotive comes to life. You will also hear the sounds of the giant locomotive gradually fade away when you turn off power.

LEGACY® Sequence Control

Press and hold AUX1 for 3 seconds on your CAB-2, CAB-IL, or CAB-1 and experience the latest LEGACY® RailSounds® feature: Sequence Control. Using just the throttle, hear brake release, bell, whistle signals and corresponding dialog as your train traverses an entire journey from departure to destination.

LEGACY® Fueling and Current Speed

While stopped, hear the sounds of refueling (water, coal, or diesel fuel). In motion, command your

engineer to speak his current railroad speed and fuel levels. All at the touch of a button from your CAB-2, CAB-IL, or CAB-1.

Diesel RPM

Throttle up your locomotive and listen as the locomotive's RPMs increase. Our LEGACY® RailSounds® offers 8 levels of diesel engine RPMs. While the RPM sounds automatically intensify with the speed of the engine and the power supplied to the track, you can also fine-tune the levels with your Remote Controller.

DynaChuff™

A favorite feature among steam fans, DynaChuff is the varying intensity of the locomotive's chuffing, synchronized with the speed of the locomotive.

CrewTalk™ Communication and TowerCom™ Announcements

(LEGACY® required for complete feature set) This is radio communication between your locomotive and tower. “You're cleared outbound”, orders the dispatcher and the engineer replies. You can trigger different conversations, depending on your choice of button-press and whether the locomotive is in motion or stopped. Change to any of six railroad speeds with accompanying dialog or hear your engineer report his status while en route.

StationSounds™

With a StationSounds-equipped passenger car, you will hear the station's loudspeaker announce arrivals and departures. En route, the conductor makes dining reservations and station stop announcements.

Smoke

Fan-driven smoke units provide a steady flow of smoke, and puffing smoke units create short blasts of smoke as the locomotive moves along the track. For the most realistic smoke effects, synchronized smoke units coordinate the blasts of smoke with the revolution of the drivers and the DynaChuff sounds of the locomotive.

Steam Effects

These smoke effects bring select steam locomotives to life like never before. Each steam effect features a blast of smoke to simulate steam shooting from the whistle, blowdown, or cylinder valves, often along with the authentic corresponding sound.

ILLUMINATION

Directional Lighting

When in reverse, Command Control equipped diesel locomotive headlights will shut off. The rear light or headlight of a second diesel will then illuminate. In Command Control equipped steam locomotives, the headlight remains illuminated in forward or reverse operation. Additionally in reverse, the tender back-up light will shine on tenders equipped with a rear directional lamp.

Classification Lights and Marker Lights

Classification lights are located on the boiler front or top of some steam locomotives, while marker lights are on the rear of some steam locomotive tenders. These lights are also located on the ends of some diesel locomotives.

MARS Lights

Mars lights are a warning light on the front of some steam and diesel locomotives. Real Mars lights moved back and forth across the track like a “8” our models recreate this effect with a pulsating LED.

Lighted Number Boards

Brightly illuminated, the locomotive's unique road number is displayed on the boiler top of some steam locomotives and on the ends of some diesel locomotives.

Strobe Light

This flashing warning light is located on the cab roof of some diesel locomotives.

Ditch Lights

These low-mounted lights serve as close-range secondary headlights on some diesel locomotives.

SOME LIONEL BASICS

Gauge

Gauge refers to the distance between the outside rails of the track. Lionel O-Gauge track systems—which include O, O27, and FasTrack—all measure 1 1/4" between the outer rails. Any O-Gauge car or locomotive can ride on Lionel O-Gauge track, as long as the curve track used on your layout can accommodate your particular cars (see Minimum Curve section).

Scale

Scale measures the relationship between a model and the real thing. Most Lionel cars generally measure about 1:48 scale. This relationship is approximate for the Lionel Traditional line of cars and locomotives, which typically can run on layouts with tight curves (like O27 or O31). Lionel Standard O freight cars and engines, which are made to be as exact as possible to 1:48 scale, oftentimes require a wider minimum curve, such as O36 or more.

Minimum Curve

This measurement is very useful in purchasing track, locomotives, and rolling stock that are compatible with one another. For example, assemble O72 curved track into a circle and you will have a 72" diameter layout. Assemble O-31 curved track into a circle, and you will have a layout 31" in diameter. A locomotive with a Minimum Curve requirement of O31 will run on a layout with O72 curves, but a locomotive with a Minimum Curve requirement of O72 will not run on a layout with O31 curves.

Traditional vs. O Scale

Lionel O-Gauge locomotives and rolling stock are divided into two basic categories—Traditional and O Scale. Both lines are O-Gauge and can be run together if Minimum Curve requirements allow. Generally, the difference is a matter of size and consistent proportions. O Scale locomotives and cars

Variable Ashpan Glow

Start up a Lionel steam locomotive equipped with this feature and look for a red glow on the outside of the locomotive between the ashpan and firebox. As speed increases, the light grows brighter, simulating the increased draft onto the fire.

Ground Lights

These low mounted lights are located below the cab on the sides of some steam and diesel locomotives. They face downward toward the ground to help the crew gauge diesel movement at slow speeds.

Glowing Firebox and Flickering Firebox

A red glow steadily emanates from the firebox inside of the cab of Lionel steam locomotives equipped with the glowing firebox. Steam locomotives equipped with a flickering firebox create the illusion of a live fire “flickering” within.

are kept as close to scale dimensions as practical. Traditional O locomotives and cars may be compressed to better operate on tight curves.

Recommended Minimum Curve

Lionel locomotives and rolling stock are thoroughly tested to determine their Minimum Curve requirement. In some cases, a Lionel car or locomotive may be able to easily negotiate most, but not all, possible track configurations for that Minimum Curve. For these products, a Recommended Minimum Curve is also given. This larger measurement allows for all combinations of Lionel track and switches.

BUILT TO ORDER

Lionel is moving forward with a Built-To-Order process for a number of our high end steam and diesel engines. We want to enhance the collectible nature for the products you purchase as well as ensure we are able to continue to offer new and innovative items in the future.

You will see the icon above on the product pages that feature Build-To-Order products. Please check with your local dealer and on Lionel.com to ensure you do not miss the order window.

Lionel Traditional

- Based on classic Lionel designs
- Approximate scale proportions
- Perfect additions to Lionel ready-to-run train sets
- Can run on any O-Gauge track curve, even O27 (unless noted otherwise)

Lionel O Scale

- Accurate reproductions of rolling stock and locomotives
- Scale proportions
- Super-detailed with many separately applied parts
- Check the Minimum Curve requirement for each car or locomotive

LEGACY® Steam

LEGACY® Steam locomotives on pages 8-13 are equipped with these great features.

- **LEGACY® Control System** – equipped – able to run in LEGACY® Control mode, in TrainMaster Command Control mode, or in Conventional mode with a standard transformer
- **Odyssey® II Speed Control**
- **LEGACY® RailSounds®** sound system featuring:
 - CrewTalk™ dialog and TowerCom™ announcements, each with different scenarios depending on whether the locomotive is in motion or stopped
 - Six official railroad speeds with CrewTalk dialog
 - DynaChuff™ synchronized with 32 levels of intensity as the locomotive gains speed
 - LEGACY® “Real-Time Quilling Horn” control with instant response for realistic signature “quilling” and correctly timed warning signals
 - Single hit or continuous bell sounds
 - Sequence Control: plays the sound effects of an entire trip, including warning sounds and announcements, based on the movement and speed of the locomotive
 - Current speed and fuel dialog, coal-loading sound effects
- IR Transmitter works with LCS SensorTrack™
- Powerful maintenance-free motor with momentum flywheel
- Wireless Tether™ connection (except on Shay) between locomotive and tender
- **ElectroCoupler™** on rear of tender
- Directional lighting including operating headlight and back-up light on rear of tender
- Illuminated classification lights on the front of locomotive
- Traction tires
- Interior illumination in cab
- Die-cast metal locomotive body, pilot, and trucks
- Die-cast metal tender body and trucks
- High level of separately applied metal details
- Separately applied builder's plate
- Synchronized fan-driven smoke unit
- Adjustable smoke output
- Authentically detailed cab interior
- Cab “glass” windows
- Engineer and fireman figures

Southern Pacific AC-9

Southern Pacific purchased 12 massive AC-9 locomotives from Lima in 1939. Partially streamlined, the locomotives saw service on both freight and passenger trains. Lionel's models represent the locomotives as they appeared in service from 1939 to 1952 when they were converted to burn oil. Available in both the as-delivered "Southern Pacific Lines" and later "Southern Pacific" lettering, the model will also be available in a "what-if" Daylight version inspired by the locomotive's skyline casing and streamlined pilot.

SEE LEGACY® STEAM LOCOMOTIVE FEATURES ON PAGES 6-7.

ADDITIONAL FEATURES

- Whistle Steam
- Length: 32 1/4"
- Minimum Curve: 0-72

A NEW! Southern Pacific Lines #3800

C NEW! Southern Pacific Daylight #3811
6-84250 \$1999.99

Built to Order

USRA Light Mikado

The light Mikado was among the most common of the locomotive designs produced under the United States Railway Administration's operation of the nation's railroads during World War I. More than 600 standardized light Mike's were built under the orders of the USRA - thousands of nearly identical copies would continue to roll out of Alco, Baldwin and Lima long after the war. Lionel brings this classic back again with Whistle Steam for the first time!

SEE LEGACY® STEAM LOCOMOTIVE FEATURES ON PAGES 6-7.

ADDITIONAL FEATURES

- Whistle Steam
- Length: 20 3/4"
- Minimum Curve: 0-54

3 Truck Shay

With pistons, gears and drive shafts spinning wildly on the side of the locomotive, the sight and sound of a Shay in action are feasts for the senses. Designed for hauling heavy trains along sharp curves and steep grades, the Shay was a versatile steam locomotive seemingly as well adapted to most model railroads as the prototypes' mountainous domains. Based on the massive 3-truck Shay #6 built for the Western Maryland, the Lionel model represents the ultimate evolution of these well-adapted iron horses. Available now for the first time with full LEGACY® features, including Whistle Steam!

SEE LEGACY® STEAM LOCOMOTIVE FEATURES ON PAGES 6-7.

ADDITIONAL FEATURES

- Whistle Steam
- Length: 16 3/4"
- Minimum Curve: 0-54
- **NOTE:** Due to the gearing of this locomotive for prototypical speed operation, it will not have the same speed table as other LEGACY® locomotives and will not lash-up with other command-control engines

A NEW! Cass Scenic #6

LEGACY® Diesel

LEGACY® Diesel locomotives on pages 16-31 are equipped with these great features.

- **LEGACY® Control System** equipped – able to run in LEGACY® Control mode, in TrainMaster® Command Control mode, or in Conventional mode with a standard transformer
- **Odyssey® II Speed Control** with On/Off switch
- **LEGACY® RailSounds®** sound system featuring:
 - CrewTalk™ dialog and TowerCom™ announcements, each with different scenarios depending on whether the locomotive is in motion or stopped
 - Six official railroad speeds with CrewTalk dialog
 - Eight diesel RPM levels
 - LEGACY® “Real-Time Quilling Horn” control with instant response for realistic signature “quilling” and correctly timed warning signals
 - Single hit or continuous mechanical bell sounds
 - Sequence Control: plays the sound effects of an entire trip, including warning sounds and announcements, based on the movement and speed of the locomotive
 - Current speed and fuel dialog, refueling sound effects
- IR Transmitter for SensorTrack™
- Dual powerful maintenance-free motors with momentum flywheels
- **ElectroCoupler™** on front and rear (A-A set has ElectroCouplers on front only)
- Traction tires
- Refined Conventional Transformer Control Mode with lower starting speeds
- Fan-driven smoke unit (excludes S2 Electrics on pages 24-27)
- Adjustable smoke output
- Directional lighting including LED headlights
- Marker lights on front and rear
- Illuminated number boards
- Lighted cab interior
- Die-cast metal trucks, pilot, and fuel tank
- Metal frame
- High levels of separately applied metal details
- Engineer and conductor figures

SD40

Among the most popular diesels of all time, the SD40 has been found in every type of service possible. More than 50 years since their introduction, hundreds have been rebuilt and continue to run strong even today. Lionel brings this venerable locomotive back in all new road names with road number-specific detailing from rail to roof.

SEE LEGACY® DIESEL LOCOMOTIVE FEATURES ON PAGES 14-15.

ADDITIONAL FEATURES

- Kinematic pilot extends in curves for close coupling
- Road-number specific details matched to engine including:
 - Pilots
 - Trucks
 - Horns
 - Bells
 - Antennae
 - Battery Box Covers
 - Dynamic Brakes
- Minimum Curve: 0-54
- Length: 17"

SD60M

EMD introduced the new safety-cab option for its SD60 locomotive in 1988. Over the next six years and 460 units, the design of the SD60Ms' cab would continue to evolve. Nearly all of the locomotives are still in service today. For the first time, Lionel is introducing this model in both the original 3-piece and later 2-piece windshield designs.

SEE LEGACY® DIESEL LOCOMOTIVE FEATURES ON PAGES 14-15.

O SCALE | LIONCHIEF® PLUS DIESEL

LionChief® Plus SD60M

For the first time, Lionel is offering a full-scale diesel with the LionChief® Plus control package and features. These locomotives feature all the same body details as the LEGACY® versions but are controllable with conventional transformers or the Universal Remote or LC App on your smart device through their Bluetooth® LionChief® Plus electronics.

FEATURES

- Same body detailing as the LEGACY® SD60M including:
 - Separately applied handrails, horns, crew figures and other details
 - Road specific details including cab windows and ditch light placement
- LionChief® Plus Bluetooth™ control with included remote, Universal Remote, App or Conventional control
- **Railsounds RC®**
- Illuminated headlight, back up light and ditch lights (non-oscillating)
- Fan-driven smoke
- Dual powerful maintenance-free motors
- Front and rear **ElectroCouplers™**

ADDITIONAL FEATURES

E8

A streamlined classic from the 1950s to the 1990s, the E8 remains a popular locomotive with many preserved and operating around the country. Lionel's E8's return in new paint schemes from railroads spanning the continent and many eras.

SETS INCLUDE

- One powered and one non-powered A unit
- 6-84084 single A unit only

POWERED UNITS FEATURE

- **LEGACY® Control System**-equipped - able to run in LEGACY® Control Mode, in TrainMaster® Command Control mode, or in Conventional mode with a standard transformer
- **Odyssey II Speed Control**
- **LEGACY® RailSounds®** sound system featuring:
 - CrewTalk™ dialog and TowerCom™ announcements, each with different scenarios depending on whether the locomotive is in motion or stopped
 - Six official railroad speeds with Crewtalk™ dialog
 - Dual powerful maintenance-free motors
 - Refined Conventional Transformer Control Mode with lower starting speeds
 - Traction tires
 - Engineer and conductor figures

BOTH UNITS FEATURE

- Fan-driven smoke unit
- Adjustable smoke output in **LEGACY® Control** or **Train Master Command Control**
- Directional LED headlights
- Front **ElectroCouplers™** (front and rear on 6-84084)
- Working Mars Lights (where appropriate)
- Die-cast metal trucks, pilot and fuel tank
- High level of separately applied details
- Cab window glass
- Illuminated number boards
- Operating front marker lights
- Illuminated cab interior

ADDITIONAL FEATURES

- Length: 34" (pair) 17" each
- Minimum Curve: 0-36

S2 Electric

One of the more storied and long-lived locomotives, the New York Central's famous S2 class has a fascinating history. Built in 1906, the last wasn't retired until 1981! Now, Lionel brings this powerhouse back, and for the first time, with some new features and paint schemes representative of their entire storied careers. NYC&HR #3207 shows the look of the S2 class c. 1909 - 1917. This was one of two locomotives involved in a tragic wreck which led to the changes in the S2 design. #113 represents their look from 1936 through the 1940s. By the 1960s, safety yellow began to be applied to handrails and steps as seen on #115. Many of the locomotives kept a similar look into the Penn Central years and some even survived to serve Conrail. Although none ever wore the more elaborate schemes applied to some of the Central's other electrics, our version of #101 represents a fun "what if" portrayal of what these motors could have looked like in the classy "Lightning Stripe" era. The S motors have been a Lionel inspiration for over 100 years. Now, you can have this locomotive for the first time with the latest LEGACY® electronics and a swinging bell feature which moves the bell in time with the sounds!

SEE LEGACY® DIESEL LOCOMOTIVE FEATURES ON PAGES 14-15.

ADDITIONAL FEATURES

- Die-cast body and frame
- Sprung pantographs
- Swinging Bell - bell swings back and forth in sync with sounds
- Single powerful maintenance-free motor

Prewar Inspired Scale S2 Freight Set

The New York Central S2 has been an inspiration for Lionel Trains for more than a century. Paying tribute to that tradition and our never-ending commitment to providing the most exciting and accurate models possible, we're proud to offer this unique set that offers the best of both eras! Styled after Lionel set cars from the Prewar era, this new set features our LEGACY® S2 locomotive with the latest in electronics and a swinging bell feature and three scale cars with all the details you've come to expect from today's Lionel.

SET INCLUDES

- Lionel Lines LEGACY® S2 Electric Locomotive
- Lionel Lines 40' Scale Reefer
- Lionel Lines 2 Bay Hopper
- Lionel Lines 2 Window Northeastern Caboose

SEE LEGACY® DIESEL LOCOMOTIVE FEATURES ON PAGES 14-15.

40' Steel Reefers

Forty-foot steel iced reefers like these were common in the produce and meat packing industries from the 1940s into the 1970s. The cars often traveled cross country and even moved seasonally to different regions to maximize their utilization. Lionel's models come detailed in authentic paint schemes and feature opening doors and roof hatches.

FEATURES

- Die-cast metal trucks
- Operating couplers
- Opening side doors and roof hatches
- Easy to convert to scale couplers
- Length: 14"
- Minimum Curve: 0-31

F NEW! Bangor & Arrostock
6-84118 \$84.99

Did You Know?

The Bangor and Arrostock purchased their cars in conjunction with Pacific Fruit Express. When not needed for the Maine potato harvests, the orange BAR cars could often be found in PFE trains!

Milk Cars

Built in the early 1900s and active through the 1950s, these unique freight cars were equipped with twin glass-lined tanks to keep milk cool and fresh. They were typically coupled to passenger trains in order to get the fresh perishable cargo to its destination as quickly as possible. Lionel's scale milk car features two milk tanks that are viewable underneath the removable roof or when the hinged doors are opened. They also feature realistic die-cast metal passenger trucks and sprung buffers just like the prototype.

FEATURES

- Die-cast metal passenger-style sprung trucks with operating couplers
- Die-cast metal underframe details
- Die-cast metal sprung buffers
- Opening hinge-style doors
- Removable roofs
- Interior milk tanks and piping
- Metal brake lever and brake chain
- Separately applied realistic details
- Length: 11 3/4"
- Minimum Curve: 0-31

50' Double Door Boxcars

Equipped to handle a variety of loads, these 50' double door boxcars are suited to your transition or diesel era layout.

FEATURES

- Die-cast metal sprung trucks and operating couplers
- Easily converted to scale couplers
- Separately applied metal underframe details
- Opening doors
- Length: 14"
- Minimum Curve: 0-31

Grain Door Boxcars

For bulk loading of grain, boxcars were equipped with temporary “grain doors” which held back the contents. While loading and unloading were more time consuming than with a hopper, the boxcar could be used year-round in general service until needed for the grain rush. Boxcars remained a common method of grain shipments into the 1970s.

These new models add a new twist to Lionel’s beautifully detailed PS-1 boxcars and are ready to handle your railroad’s wheat rush!

FEATURES

- Die-cast metal sprung trucks and operating couplers
- Easily converted to scale couplers
- Separately applied metal underframe details
- Opening doors
- Grain doors
- Simulated grain load
- Length: 11 1/4"
- Minimum Curve: 0-31

Express Boxcars

Equipped for parcel and bulk mail loading, these boxcars were used in passenger service and carried special, often colorful paint schemes to match.

FEATURES

- Die-cast metal sprung trucks and operating couplers
- Easily converted to scale couplers
- Separately applied metal underframe details
- Opening doors
- Length: 11 1/4"
- Minimum Curve: 0-31

60' Boxcars

Most commonly seen hauling heavier auto parts, these 60' cars can be used in many roles. Use them in a general freight train, or with the Lionel 86' boxcars and scale autoracks to serve an auto assembly plant.

FEATURES

- Die-cast metal sprung trucks and operating couplers with hidden uncoupling tabs
- Rotating bearing caps
- Separately applied metal underframe and body details
- Opening doors
- Length: 16"
- Minimum Curve: 0-36

PS-2CD Covered Hoppers

Developed at a time when covered hoppers were becoming the preferred car for grain service, the distinctive size and low-sides of Pullman Standard's 4427 cubic foot capacity PS-2CD were quite a contrast to the 40-foot boxcars previously used. These cars could be seen in grain, flour and dry bulk service all across North America from the 1960s to the early 2000s.

Raw Material Storage

LIONSCALE™

Lionel is proud to introduce the new LionScale™ line of affordable O scale freight cars for the operator and collector. Painted, decorated and assembled in Lionel's own North Carolina facility from parts made in the USA and imported, LionScale™ delivers reliable performance, rugged details and realistic graphics. Each car is available in multiple road numbers and value-priced for those who like to run long trains.

Printing

- ***Die-cast trucks and couplers***
- ***Easily converted to 2-rail
(with separate sale components)***
- ***Prototypically accurate paint
schemes & multiple road numbers***

Decorated and assembled in Lionel's Concord, NC headquarters

57' Mech Reefer

ALL NEW!

Keep perishables fresh in these 57' Mechanical Reefers! A great way to expand your Salad Bowl Express set or other modern consists!

LionChief® Plus

LIONCHIEF® PLUS REMOTE FEATURES

- Forward and reverse speed control knob
- Buttons for whistle sound, bell, special announcements and ElectroCoupler™ activation
- Requires three AAA alkaline batteries (not included)

◀ LIONCHIEF® PLUS STEAM LOCOMOTIVES FEATURES

- Conventional AC transformer control mode or LionChief® wireless remote control with AC or DC power
- **ElectroCoupler™** on rear of tender (controlled by remote only)
- Operating headlight
- Synchronized fan-driven smoke
- On/Off switches for sound and smoke
- **RailSounds RC™** sound system with steam chuffing and background sounds, whistle, bell, and user-activated announcements
- Adjustable volume (controlled by remote only)
- Speed control for consistent speed at all ranges regardless of track condition or load
- Flickering firebox
- Chuffing sounds in sync with puffing smoke
- Powerful maintenance-free motor
- Die-cast metal locomotive body, frame, and trucks
- Die-cast metal tender body and trucks
- Metal frame on tender
- Engineer and fireman figures
- Traction tires
- Length:
 - Camelback 17 1/2"
 - Mikado, Pacific and Hudson 19"
- Minimum Curve: 0-31

LIONCHIEF® PLUS DIESEL AND ELECTRIC LOCOMOTIVES FEATURES ▶

- User-selected operational modes: Conventional AC transformer control mode or LionChief® wireless remote control with AC or DC power
- On/Off switches for sound, smoke and control mode (no smoke switch on Rectifiers)
- **ElectroCouplers™** on front and rear (controlled by remote only)
- Rear coupler on FT and FA AA sets are fixed
- **RailSounds RC™** sound system with diesel revving and background sounds for the diesels, and electric engine roar for Rectifiers, horn, bell, and user-activated announcements
- Adjustable volume (controlled by remote only)
- Fan-driven smoke (except Rectifiers)
- Smoke output from every stack
- Dual maintenance-free motors
- Single maintenance-free motor on NW2
- Constant control for consistent speed at all ranges regardless of track condition or load
- Operating headlights with directional lighting
- Cab crew figures (except NW2)
- Lighted cab interior
- Frosted windows on NW2
- Die-cast metal trucks, pilot, and fuel tank
- Metal frame
- Traction tires
- Length:
 - Rectifier, GP20, NW2, RS-3, and GP7 14 3/4"
 - FT AA Set 26" (13" each car)
 - FT B Unit 13"
- Minimum Curve: 0-31

LionChief® Universal Remote

FRONT VIEW

FEATURES

- Control any existing or future 0-Gauge LionChief® Plus locomotive
- Control most 0-Gauge Ready-to-Run LionChief® set locomotives
- Control any existing S-Gauge FlyerChief locomotive
- Load and operate up to three locomotives per remote at any one time
- Choose between any one of the three engines with the simple 3-button control
- LED Illumination on 1-2-3 buttons when pressed
- On/Off Switch to preserve battery power
- Remote "Train Memory" preserves current speed and direction of engine when toggling operation between different locomotives
- Even after power down and restarting remote retains memory of the specific engines loaded in system
- "Easy Clear" feature allows you to quickly remove and add new locomotives into remote memory as needed
- Forward and reverse speed control knob
- Additional buttons for whistle sound, bell, special announcements, and ElectroCoupler™ activation
- Requires three AAA alkaline batteries (not included)

6-83071 \$49.99

LionChief® Plus Berkshire

First introduced in 1946, the Lionel 726 Berkshire remained a popular locomotive for many years. Now available for the first time with LionChief Plus electronics, this classic is once again on the forefront of toy train design.

ALCO FA Set

Cataloged in 1948 and 1949, these green cars were Lionel's first in plastic. Through the years, operators have run them behind many locomotives – but a matching set has never been available - Until now! Powered by a pair of FA diesels which were contemplated but never produced, this train is ready to leap out of the Lionel archives and onto your railroad!

SET INCLUDES

- 1 Powered FA locomotive
- 1 Non-powered FA locomotive
- 1 Coach 2400 Maplewood
- 1 Coach 2402 Chatham
- 1 Observation 2401 Irvine

BOTH FA LOCOMOTIVES FEATURE

- Die-cast metal trucks
- Die-cast metal frame
- Operating headlight
- Illuminated number boards

POWERED FA UNIT ALSO FEATURES

- Dual powerful maintenance-free motors
- Electronic e-unit with Direction Lock
- Electronic horn and bell with volume control
- Traction tires

ALL PASSENGER CARS FEATURE

- Die-cast metal trucks and operating couplers
- Interior illumination
- Window silhouettes
- Red marker lights and clear back-up lens on observation car

ADDITIONAL FEATURES

- Each car individually boxed
- Postwar-inspired packaging
- Length: Approx. 62 1/2"
- Minimum Curve: 0-27

A NEW! Postwar FA Green Passenger Train Set
6-82726 \$549.99

With the new Plug-Expand-Play® system by Lionel, operating accessories on your layout has never been easier! Usable on any AC or DC powered layout but designed especially for FasTrack® users, the Plug-Expand-Play® system simplifies what's needed to connect your operating accessories. It also minimizes the need to mess with bare wires on any FasTrack® layout. This accessory system is often as simple as the name—Plug the accessory into your powered track and you're ready to Play!

- ✓ Easy set up
- ✓ Simple standard cable system
- ✓ Improved and simple operation

FOR RAILSIDE EXCITEMENT ALL ALONG THE LINE!

1

Position your Plug-Expand-Play® accessory on your layout

2

Plug accessory into Plug-Expand-Play® lock-on

3

Plug in your power supply or Power up your transformer

CONNECTING YOUR PLUG-EXPAND-PLAY® ACCESSORY TO PLUG-EXPAND-PLAY® FASTRACK®

Refer to your lock-on or accessory's manual for complete set-up instructions.

A FasTrack® Plug-Expand-Play® Accessory Activator Track Pack

Use your train as a switch to activate your Plug-Expand-Play® accessory. When your train passes by, it completes the circuit and routes power to your accessory until the train has passed.

- FEATURES**
- Includes one 10" insulated track section, and two 5" isolated track sections
 - Plug-Expand-Play® Power Lock-on made specifically for accessories fitted with a Plug-Expand-Play® power cable

A FasTrack® Plug-Expand-Play® Accessory Activator Track Pack
6-81317 \$23.99

B FasTrack® Plug-Expand-Play® Power Lock-On

Your standard lock-on to connect your Plug-Expand-Play® accessory to any FasTrack® layout.

- FEATURES**
- 10" straight FasTrack® with attached Lock-on

B FasTrack® Plug-Expand-Play® Power Lock-On
6-81313 \$22.99

C FasTrack® Plug-Expand-Play® Power Block Lock-on

Same as the standard Plug-Expand-Play® lock-on with THREE ports instead of one, plug in up to 3 Plug-Expand-Play® cables. Choose track power or fixed power (from a barrel jack connector).

- FEATURES**
- 10" straight FasTrack® with attached Lock-on
 - Rocker switch to select power source
 - Use separate sale 4A 18UDC power supply or track power
 - LED for power indication

C FasTrack® Plug-Expand-Play® Power Block Lock-On
6-81314 \$39.99

D LionChief® 72-Watt Wall-Pack Power Supply (4 Amp)

Connect the LionChief® 72-Watt Wall Pack Power Supply (or the 36-Watt version found in LionChief® RTR sets) directly to the the LionChief® Terminal FasTrack® to power any LionChief® FasTrack® Layout. Now you are ready to run any LionChief® or LionChief® Plus locomotive, with enough power to expand.

D LionChief® 72-Watt Wall-Pack Power Supply (4 Amp)
6-81603 \$54.99

E 8" Female Pigtail Plug-Expand-Play® Power Cable
6-82038 \$9.99

G 6' Plug-Expand-Play® Control Cable Extension (6-pin)
6-82045 \$19.99

E 8" Female Pigtail Plug-Expand-Play® Power Cable
Hook up a Plug-Expand-Play® accessory to a non-Plug-Expand-Play® layout.

F 6' Plug-Expand-Play® Power Cable Extension (3-pin)
Extend the length of the standard Plug-Expand-Play® 3-pin power cable.

G 6' Plug-Expand-Play® Control Cable Extension (6-pin)
Extend the length of the standard Plug-Expand-Play® 6-pin control cable.

F 6' Plug-Expand-Play® Power Cable Extension (3-pin)
6-82043 \$15.99

6-82203 \$24.99

Plug-Expand-Play®

A Classic Automatic Gateman

Gateman emerges from his shed to warn motorists of passing trains.

FEATURES

- Includes separate switch box to activate accessory
- Let your moving train activate the accessory by adding a Track Activator Pack to your track layout (sold separately)

6-81063 \$94.99

C Bungalow House

Affordable housing helps any town grow. These Plug-Expand-Play® houses include interior lighting and modular construction for maximum flexibility on any layout.

FEATURES

- Interior illumination
- Dimensions: 8" L x 8" W x 5 3/4" H

6-82008 \$79.99

D Pennsylvania Scrap Yard

These tired diesel locomotives have reached the end of the line. These busy workers are scrapping the locomotive. Watch the workers lift away the seat, remove the number board, and cut through the side.

FEATURES

- Four animations
- Seven hand-painted figures
- Flickering LED simulates a welder's torch
- Dimensions: 8 1/4" L x 7 1/2" W x 3 1/4" H

6-82263 \$129.99

B Burning Switch Tower

- Figure descends on the stairs
- Figure emerges from the building
- Operating smoke unit with On/Off switch
- Flickering interior illumination
- Includes separate switch box to control figure movement
- Activate accessory by train passing, connect accessory to Plug-Expand-Play® Activator Track (sold separately)
- Dimensions: 6 1/2" L x 5" W x 7 3/4" H

6-82020 \$129.99

E Steel Mill Structure with Sounds

6-83170 \$129.99

F M.O.W. Work Structure with Sounds

6-83172 \$129.99

G Early Intermodal Work House with Sounds

6-82874 \$129.99

Work Houses with Sounds

Add realistic audio to your layout with one of our work houses with sounds! This sturdy structure is illuminated inside and out. It also plays realistic equipment sounds, activities, and includes announcements from workers busy on the job!

FEATURES

- Interior and exterior illumination
- Simulated window glass
- Includes a variety of sounds of workers, equipment and activities

PLUG-EXPAND-PLAY® FEATURES

- Connects easily to FasTrack® with a Plug-Expand-Play® Lock-on (6-81313 sold separately)
- Connects to a traditional O/ O27 track lock-on or to an accessory power supply (lock-on and power supply sold separately)
- AC and DC compatible
- Dimensions: 3" L x 2 1/2" W x 2 1/2" H

Loading Structures

Add smoke fluid to your steam or diesel locomotives with your Command Control system! Rotate the throttle on your CAB control unit to move the boom into position over your locomotive smoke stack. Once in position, dispense the proper amount of fluid in easy-to-control fluid drops at the press of a Cab remote button. Move the boom back in place by remote control and your locomotive is ready to roll!

FEATURES

- Remote control function from CAB-1, CAB-1L, and CAB-2 includes:
- Back and forth operation of boom arm
- Fine-control release of smoke fluid
- Fully programmable with individual ID number from 1-99
- Quick drain feature for storage/service
- Large smoke fluid reservoir housed inside fuel tank
- Command operation only

B Keystone Smoke Fluid Loader
6-83634 \$349.99

A North American Smoke Fluid Loader
6-83635 \$349.99

New version of two Lionel classics! An optical beam senses when a culvert gondola is present, automatically triggering the hazard lights on top of the conveyor, followed three seconds later by the light in the control tower! Pair these up together for continuous loading and unloading operation.

REMOTE CONTROL FUNCTION FROM CAB-1, CAB 1L AND CAB 2 INCLUDES:

- Operating crane with magnet
- Operating warning lights
- Powerful maintenance-free motor
- Automatic IR triggered operation:
 - Culvert loading action on loader
 - Culvert unloading action on unloader
 - Interior lighting
 - Includes seven metal culverts
 - Compatible with Lionel Culvert Car (sold separately)
- Dimensions:
 - Loader: 13" L x 9" W x 8" H
 - Unloader: 13" L x 11" W x 8" H

C Culvert Loader
6-82029 \$299.99

D Culvert Unloader
6-82030 \$299.99

#497 Coaling Station

- Raise and lower coal receiving bin
- Open hopper chutes to drop coal into awaiting cars
- Upgraded servo control for smoother, quieter operation of hopper chute.
- Includes separate control box for feature activations
- Stamped metal frame
- Requires an operating uncoupling track (sold separately)
- Compatible with all track systems
- Dimensions: 9 1/2" L x 6" W x 10" H

6-82026 \$299.99

#352 Icing Station

Keeping perishable freight cool was a tough job before the days of mechanical refrigeration. Watch as the figure pushes the ice cubes from the chute down to the awaiting Ice car (sold separately). Position the Ice car at the platform, and load it up.

FEATURES

- Ice is loaded into the house manually, then sent down the chute
- Can be upgraded to command control with the purchase of a SC-2 Switch Controller or an ASC2 (both sold separately)
- Includes On/Off/momentary switch
- Metal base
- 10 ice cubes
- Ice car sold separately
- Dimensions: 11" L x 4" W x 8" H

6-82028 \$149.99

Coal Dump Cars

- Dumps coal at the touch of a button
- Uncoupling Track section (sold separately) required
- Die-cast metal trucks and operating couplers
- Includes coal load and unloading bin

Floodlight Towers

- 8-light LED illumination on the single and 16-light LED illumination on the double
- Independent tilting head
- Screw-mount holes on base to secure accessory to layout (optional)

Trackside Crane

Offered for the first time as a gantry unit, this scale sized trackside crane provides the highest level of loading and unloading action to your layout. Equipped with Command Control you can lower and raise the boom and hook lines, rotate the cab 360 degrees, and activate lighting all from your CAB remote controller. Add the separate-sale Crane Sounds Work House to add realistic crane sounds to your loading and unloading operations!

FEATURES

- LEGACY® Control System-equipped operation including
- 360-degree Bi-directional cab rotation
- Up and down action of boom arm
- Independent control of the main and auxiliary hooks
- Independent control of crane lights
- CAB-2, CAB-1L, or CAB-1 remote control required
- Powerful maintenance-free motors
- Die-Cast Cab & boom
- Stamped metal cab floor
- Plastic superstructure
- Independent on/off control of electromagnet
- Add sounds synchronized to the actions of crane with the Crane Sounds Work House (6-82035, sold separately)
- Base dimensions: 7 1/4" x 7 1/4"

Gantry Crane

The popular “Triple-Action Magnet Crane” has been upgraded to give you control over more crane actions than ever before! Just like the postwar original, Lionel’s newest gantry crane provides remote control of cab rotation, turning the magnet on and off, raising and lowering the hook, and manual control of the boom. Additionally for the first time ever you now can also move the entire gantry crane back and forth on your track layout! Equipped with Command Control, all these special features are user-controlled through any CAB-1, CAB-1L, or CAB-2 remote controller.

INCLUDES

- Remote Control functions from CAB-1, CAB-1L and CAB-2
 - Forward and backward trackside movement of entire crane unit
 - Crane cab rotation in either direction
 - Raising and lowering the magnet
 - Electromagnet activation
- Command only - no conventional control for this accessory
- Special track section for unit motion available from other manufacturers (not included)

Power and Control

A 40-Watt Powermax Transformer
Power your Lionel accessories with this affordable AC power supply, or use it to power and control smaller-sized train sets on your layout. Use the throttle lever to adjust the power you're providing to your accessories or to adjust the speed of your train. This transformer is compatible with LionChief®, LionChief® Plus, and traditional transformer locomotives as well as Plug-n-Play® and traditional accessories.
6-81495 \$59.99

B 80-Watt Transformer (CW-80)
• 5 AMP
Enjoy operating your favorite locomotives, train sets, and accessories with the 80-Watt CW-80 Transformer. From the handsomely designed controller, reminiscent of the famous Lionel ZW, you can control speed and power by raising and lowering the engineer handle. Operate your favorite features with the bell, whistle/horn, and direction buttons. On the rear of the unit, you will find a 0-18 volt variable AC output for accessory operation. Simply set the accessory voltage to your desired output, and your accessory operates at that output until you turn the unit off – even when you stop the train! Perfect for Train sets and small - to medium sized layouts, the CW-80 provides the power you need to enjoy all your Lionel favorites.
6-14198 \$149.99

C 180-Watt PowerHouse™
• 10 AMP
Power your railroad empire with an advanced 180-Watt PowerHouse™ Power Supply. UL®- listed for safe operation, this mighty power supply is perfect for your LEGACY® PowerMaster® or Direct Lock-on.
6-22983 \$99.99

D 180-Watt Transformer (GW-180)
• 10 AMP
From the Postwar-inspired styling of the controller, to the mighty PowerHouse™ power supply that provides a circuit breaker and ON/OFF switch, this transformer has all the power you need, plus electronic overcurrent protection to help save your sensitive electronics in the event of a short circuit. Use the throttle lever to control speed and power. Operate your favorite features with the bell, whistle/horn, and direction buttons. Two outputs are available on the rear of the unit. The 0-18 volt variable AC output serves as your main track power source. The other programmable AC output is perfect for accessory operation from the same transformer. On the accessory output, simply set the accessory voltage to your desired level for continuous operation until you turn the unit off, completely independent of the train's operation.
6-37947 \$279.99

E 620-Watt ZW-L Transformer
This transformer is designed to give you smoother operation and more realistic control of your engines and accessories. Operation of the four handles now allows for fine control of up to 200 speed steps. It also provides a wider range of control at the minimum and maximum extensions of handle dial motion, and comes equipped with a smoother, more durable handle gearing system. Voltage and current from each of the four channels of the ZW-L Transformer are cleanly displayed in four easy-to-read, analog ammeter/voltmeter dials that are housed in the “dashboard” face. With 620-Watts of power built inside the unit, there's no need for separate power bricks. To keep your controller operating safely, the ZW-L also comes equipped with an automatic temperature controlled cooling fan, a circuit breaker for each channel output, and an ON/OFF switch on the front. Additionally, LIONEL letters light up in blue on the front face of the unit when the ZW-L is turned on. Whether you want to run vintage or state of the art locomotives and accessories, the new Lionel ZW-L Transformer provides more realistic conventional control of your layout operations than ever before!
6-37921 \$899.99

F Coal Pack
• Simulated coal in medium-size pieces

LIONEL COLLECTORS CLUB of AMERICA

EST 1970

Lionel Collectors Club of America has been dedicated to collecting and operating Lionel model toy trains. Members have a special opportunity to share information, attend model train events, buy, sell and trade toy collector trains, but most of all, make new friends.

This is your opportunity to join thousands of others in this legendary club and enjoy the benefits of an excellent relationship between LCCA and Lionel.

Experience great benefits like:

- The latest Lionel catalogs mailed right to your door
- Exclusive model train publication including: "The Lion Roars" and "Interchange Track"
- Invitations to member only events, conferences and other club activities
- Access to Lionel club exclusive product
- 10% discount at www.LionelStore.com*

* Not valid with any other promotional code nor on e-gift certificate purchases.

To join online, or to print out an application, visit www.lionelcollectors.org

At Lionel, we are committed to providing our customers with superior-quality products and service. It is a commitment shared by our many Lionel Authorized Dealers and Lionel Authorized Service Centers around the country. To locate a Dealer or Service Center near you, call 1-800-4LIONEL (1-800-454-6635).

Or, call the Lionel Customer Service Center at 586-949-4100. You can also e-mail us at talktous@lionel.com or visit our website at www.lionel.com. Our knowledgeable staff is always eager to help you fully enjoy the magical world of Lionel model trains
