Lionel's incorporation of Bluetooth® integrates the tradition of model railroading with the latest smart-device technology. This development brings new and novel ways to run trains and interact with other train enthusiasts. Not only will existing model railroading fans enjoy this innovative way of running your train, but this is a great way to bring today's younger generation into the world of model railroading as well!

• **Compatible with New Lionel LEGACY, O-Gauge, FlyerChief™, and Lionel HO Trains!**

• **Control different locomotives from the same device!**

• **Connect Wirelessly!**

VISIONLINE

CHALLENGER LOCOMOTIVE

One of the most acclaimed locomotives of all time, the Union Pacific's Challengers excelled in both passenger and freight service. Union Pacific continued to refine and improve their 4-6-6-4s even after the final orders were delivered during WWII. Now you can own an unparalleled model of these amazing locomotives.

The Vision Line Challenger returns in new road names, road numbers and now for the first time with Bluetooth control. Each locomotive represents a prototypically unique version of these classic machines along with a pair of colorful "what if" versions. Widely regarded as one of the best locomotives ever produced by Lionel when first released nearly a decade ago, you won't want to be left standing on the platform when this special release passes by!

FEATURES

COMING TO A DEALER NEAR YOU!

- LEGACY® Control System equipped - able to run in LEGACY® Control mode, in TrainMaster Command Control mode, or in Conventional mode with a standard transformer
- Bluetooth® Control - Operate with Universal
- Remote or LionChief App
- Odyssey® II Speed Control
- LEGACY® RailSounds sound system featuring:
 - CrewTalk™ dialog and TowerCom™ announcements, each with different scenarios depending on whether the locomotive is in motion or stopped
 - Six official railroad speeds with CrewTalk dialog
 - DynaChuff™ synchronized with 32 levels of intensity as the locomotive gains speed
 - LEGACY® "Real-Time Quilling Whistle" control with instant response for realistic signature "quilling" and correctly timed warning signals
 - Single hit or continuous bell sounds
 - Sequence Control: plays the sound effects of an entire trip, including warning sounds and announcements, based on the movement and speed of the locomotive
 - Current speed and fuel dialog, coal-loading sound effects
- IR Transmitter works with LCS SensorTrack™
- Powerful maintenance-free motor with momentum flywheel
- Wireless Tether™ connection between locomotive and tender
- ElectroCoupler™ on rear of tender
- Directional lighting including operating headlight and back-up light on rear of tender
- Illuminated classification lights on the front of locomotive
- Traction tires
- Interior illumination in cab
- Die-cast metal locomotive body, pilot, and trucks
- Die-cast metal tender body and trucks
- High level of separately applied metal details
- Separately applied builder's plate
- Synchronized fan-driven smoke unit
- Adjustable smoke output
- Authentically detailed cab interior
- Cab "glass" windows
- Engineer and fireman figures
- Whistle Steam
- Dynamo Steam
- Stereo sounds with speakers in tender and locomotive
- Cab-number specific CrewTalk and TowerCom
- Wheel slip sound effects
- Illuminated number boards
- Illuminated work lights under running boards
- Length: 32"
- Minimum Curve: 072

VISION AUXILIARY WATER TENDER

Extend your excursion - and your features with the VISION auxiliary water tender! The Union Pacific uses these tenders to support their steam excursions on long runs when frequent water stops can't be made.

Offered in a variety of paint schemes to accompany your Challenger, these tenders can also be paired with your Big Boy, FEF-3, or other favorite locomotives! These models feature new CrewTalk dialog sequences played when the locomotive is refueled as well as the sounds of the train while in motion.

FEATURES

- Die-cast metal body and trucks
- LEGACY® control
- LEGACY® RailSounds® featuring:
 - New refueling and service CrewTalk
 - FreightSounds rolling motion sounds
- Rear ElectroCoupler
- Rear headlight
- Volume control and Max/Min switch
- Length: 12"
- Minimum Curve: 031

VISION CHALLENGER EXPRESS BOXCARS AND CABOOSE

The Challenger wasn't just the name of one of the Union Pacific's most famous locomotives. The railroad also used the name for its overnight freight service and a premier passenger train. Put a fast freight behind your Challenger with these new cars! Available in 24 different road numbers, these LionScale cars will make an impressive consist in the original gray and red livery.

Put an exclamation point on the end of your freight with this special "what if" Challenger-livery CA-4 caboose. This Union Pacific caboose is the perfect complement to this train, or a fitting companion to any of our Vision Challenger locomotives.

BOXCAR FEATURES

- Opening side doors
- Die-cast trucks with operating couplers
- Hidden uncoupling tabs
- Easy conversion to scale couplers or two-rail wheel set (available separately)
- Length: 11"
- Minimum Curve: 031
- Made in USA of US and imported parts

CABOOSE FEATURES

WELCOME TO O SCALE

Lionel's O Scale products are of the most premium in model railroading. With superior mechanisms, high-end features, and stunning, life-like details; these engines and complementary rolling stock resemble their true-to-life counterparts in 1:48 scale. You'll find some of our most advanced features here like locomotives equipped with both Bluetooth® and LEGACY® control, amazing smoke features on our VisionLine Challenger, and the exacting details of our Brass-Die-cast hybrid line.

LEGACY® Control System This revolutionary control system allows you to run your LEGACY® Control System-equipped locomotive just like a real engineer runs his trains. With its enhanced sounds and 200 speed steps, this system allows properly equipped engines to function with unparalleled options. The CAB-2 Remote Controller has an LCD screen display, vibration that simulates the effort of the locomotive, and other exciting operating features. The CAB-1L Remote Controller is a simplified alternative to unlock many LEGACY® features. New LEGACY® locomotives in this catalog can also be controlled by your smart device with the LionChief® App with simplified control and functions.

Odyssey® II Speed Control Slow speed and start-up operation are smooth and steady with Odyssey® II Speed Control. Watch your locomotive as it creeps through the yard or fights up a grade without hesitation. Odyssey® II also maintains your train's constant speed through curves and up and down grades.

ElectroCouplers™ (LEGACY®, LionChief® Plus, TMCC® required) Open these couplers anywhere on the layout without uncoupling track sections. The CAB-1 or CAB-2 Remote Controller activates the ElectroCouplers™.

Wireless Tether™ Connection Looking to enhance the appearance of Lionel steam locomotives, we developed the exclusive infrared Wireless Tether connection so that the locomotive and tender can communicate without cumbersome wiring between the units. LEGACY® equipped steam locomotives have a new small profile housing that mounts to the top of the drawbar!

RailSounds® Widely regarded as the industry standard, the impressive RailSounds® sound system brings the real sounds of the railroad to your layout. From the mechanical symphony of the locomotives, to the commotion of the station, you will be impressed by the digitally recorded samples of these special and authentic sounds.

Bluetooth® These engines have Bluetooth® on board, allowing them to connect with a compatible smart device.

LEGACY[®] STEAM

LEGACY[®] STEAM LOCOMOTIVES ON PAGES 18-27 ARE EQUIPPED WITH THESE GREAT FEATURES.

- LEGACY[®] Control System equipped – able to run in LEGACY[®] Control mode, in TrainMaster Command Control mode, or in Conventional mode with a standard transformer
- Bluetooth[®] Control - Operate with Universal Remote or LionChief[®] App with all of the features shown on page 3

FAN-DRIVEN SMOKE

BRASS HYBRID NORFOLK & WESTERN K2

After the success of the K1 class of 4-8-2s, the N&W ordered 10 USRA Heavy Mountains from Alco in 1919 as class K2. These were delivered in unstreamlined fashion and joined by 12 additional and very similar 4-8-2s from Baldwin in 1923. In 1945 and 1947, the K2s were streamlined in a shroud very similar to their larger and more famous J class 4-8-4 sisters. The "J Juniors" saw additional changes around 1949 which included solid pilot wheels and relocation of the bell.

After their streamlining, the K2s held down regular passenger assignments on the Shenandoah Division, the Portsmouth - Columbus and Durham Districts and more. Right up to the end, they could be called upon to fill in on the premier trains as well if needed until the last reached retirement in 1959. The K2 could also be found on mixed trains and freights when needed.

Lionel is proud to bring the K2 to O Scale for the first time with the combination of all the beauty of a hand-crafted brass model, the features and performance of LEGACY, and the convenience of Bluetooth® control. Each model is individually numbered. Four road numbers are available as well as an unpainted version. Nos. 118 and 123 depict the locomotives' appearance following the 1949 improvements. Nos. 116 and 125 and the unpainted pilot model will have the 1945 details. Don't miss your opportunity to add one of these beauties to your roster!

FEATURES

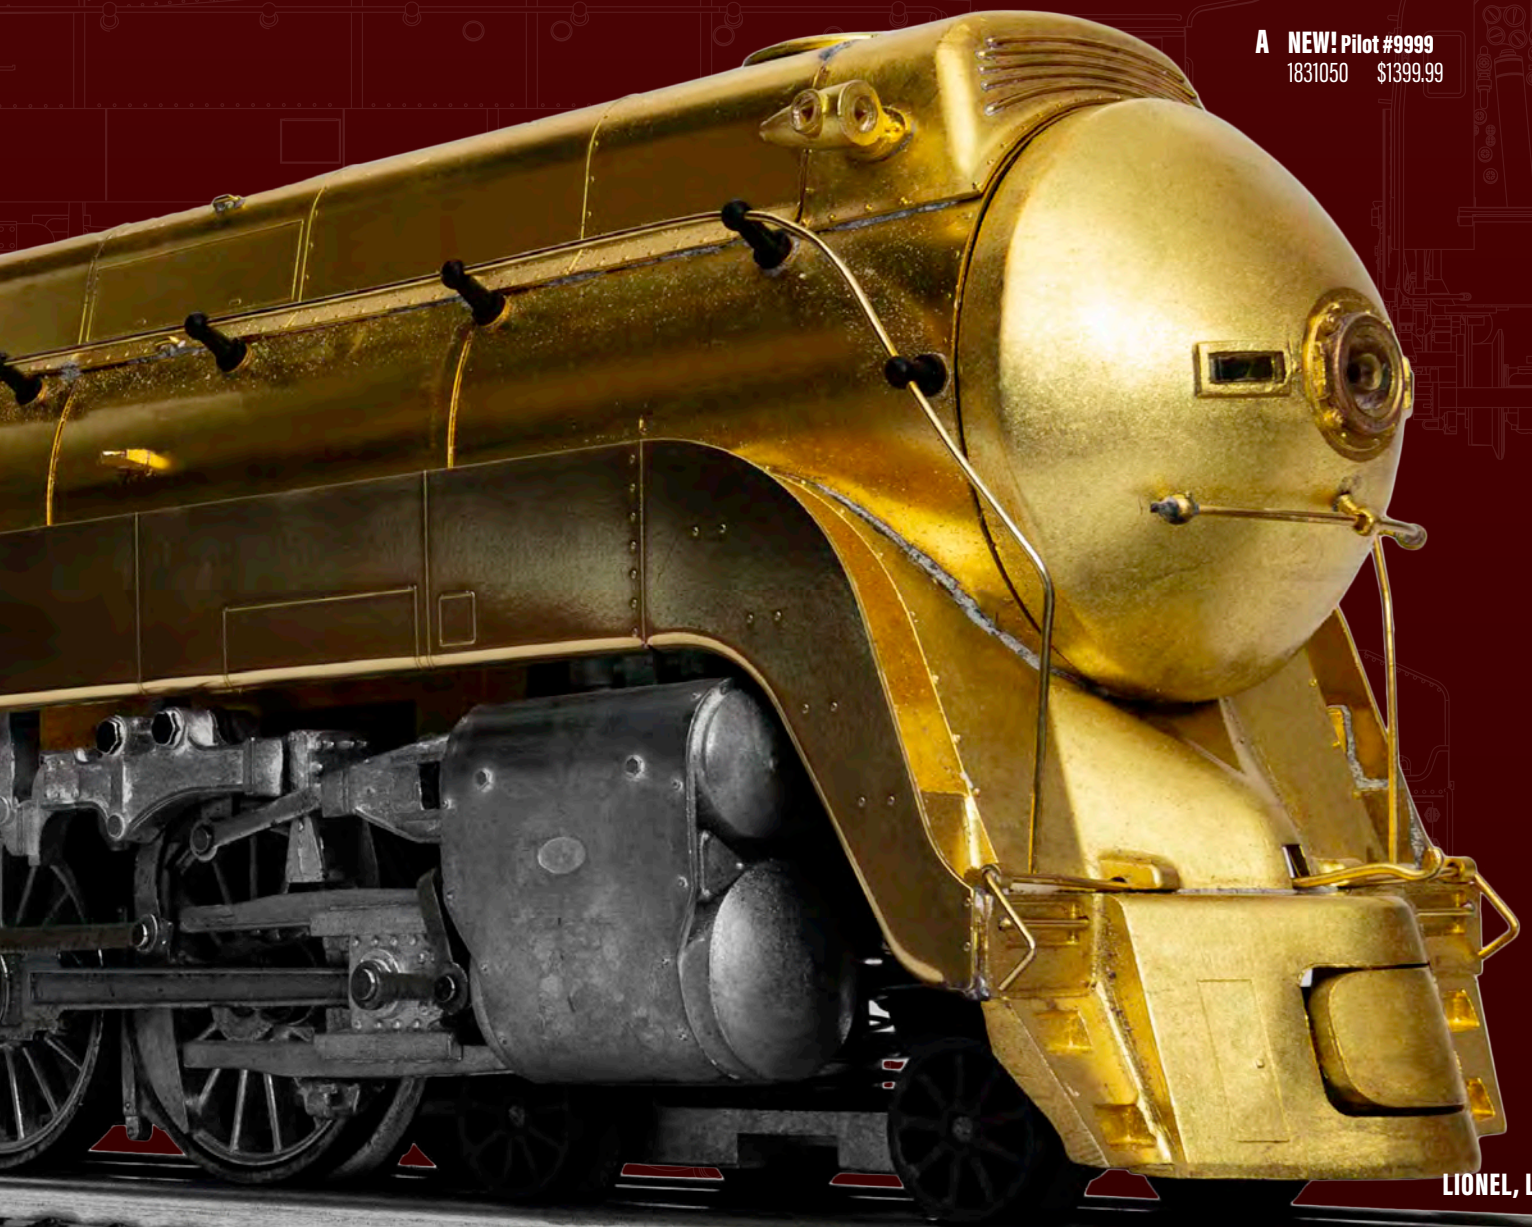

- Brass locomotive and tender body and details
- Stamped metal tender frame and diecast tender trucks
- LEGACY® Railsounds
 - Road-number specific crew talk
- Whistle Steam
- Individually numbered
- Diecast locomotive frame
- Kinematic drawbar
- Length: 21"
- Minimum Curve: 054

USRA LIGHT MOUNTAIN

Although not built in the numbers of the Mikado and Pacific, the USRA's Light Mountain design was well received and duplicated by many railroads after the war. Demonstrating the flexibility of these uniform designs, different railroads found their own best uses for these locomotives for their own needs. Some were heavy passenger train haulers while others used them on fast freights. Often the locomotives did both. Like the other USRA designs, the light 4-8-2 showed a balance and elegance in its design.

Back after a long absence from the Lionel catalog, the USRA Light Mountain returns with great new features and road name choices. Now featuring whistle steam and full LEGACY™ and Bluetooth® control, these models also feature several detail refinements and additions to better reflect the many changes each railroad applied to their locomotives to make them their own.

FEATURES:

- Stamped metal tender frame and die cast tender trucks
- Die-cast locomotive frame and shell
- Whistle Steam
- Kinematic drawbar
- Road-specific details
- Length: 21 1/2"
- Minimum Curve: 054

SOUTHERN PACIFIC A-6

In 1927 and 1928, the Southern Pacific rebuilt four of their A-3 class Atlantics into modern A-6 models. The locomotives were nearly as powerful and heavy as some of the road's early Pacifics. Two of these were later painted into Daylight colors and used on trains 52 and 53, the Sacramento Daylight.

The original A-3 locomotives were built to a standard Harriman design also rostered by the Alton and Union Pacific. Although neither road rebuilt these locomotives, we present a "What if" version for the Union Pacific in their striking Grayhound scheme. Both the C&NW and Illinois Central rostered Atlantics of very similar design.

Back in the Lionel catalog for the first time in over 15 years, these models have been upgraded with the latest control features and whistle steam!

FEATURES:

- Whistle Steam
- Length: 20 1/2"
- Minimum Curve: 031

WARREN G. HARDING FUNERAL TRAIN

Ninety-five years ago, the nation awoke to the sudden death of President Warren G. Harding. The train which had taken him to California partially in hopes of restoring his health was turned into a funeral train for the return to Washington. After laying in state in the Capitol, another train carried his body to rest in Marion, Ohio. Mourners lined the tracks along both routes and several railroads and locomotives were used to complete the mournful journey.

This set recreates the train on the first leg of its travels from Washington to Marion, led by Pennsylvania K4 #3750. It and the Pullman car which carried his body, *Superb*, are the two surviving pieces of rail equipment from this moment in history. This set comes complete with appropriate black bunting on the locomotive and observation car and passengers in appropriate dress in the car interiors.

SET INCLUDES:

- Pennsylvania LEGACY® K4 #3750
- 18" Pullman Sleeper *Ideal*
- 18" Pullman Sleeper *Conneaut*
- 18" Pullman Sleeper *Green Tree*
- 18" Pullman Observation *Superb*

LOCOMOTIVE FEATURES:

- All standard LEGACY® steam features on page 16 plus:
- 1920's details including oil headlight, extended piston rods, round number plate, smaller tender
- Black bunting details for locomotive headlight, railings and tender
- Whistle steam

PASSENGER CAR FEATURES:

- Die-cast sprung six-wheel trucks
- Operating couplers with hidden uncoupling tabs
- Flexible diaphragms between cars
- Opening doors
- Detailed interiors with appropriated decorated figures
- Flicker-free interior LED lighting

LEGACY® CONTROL

ALCO PA-AA SETS

Widely considered one of the most beautiful diesels ever produced, Alco's PA was a stunning locomotive. Found at the lead of some of America's most famous trains, the PA's unique lines and colorful paint schemes were a gift to the marketing, if not always the operating departments.

Lionel is pleased to bring these beauties back to your layout with exciting new features. Available as AA sets with both units powered and equipped with LEGACY® and Bluetooth® for the first time, you can expand your consist and make it sound as good as it looks with an additional SuperBass PB! Where appropriate, models also feature simulated stainless steel finishes and Mars lights.

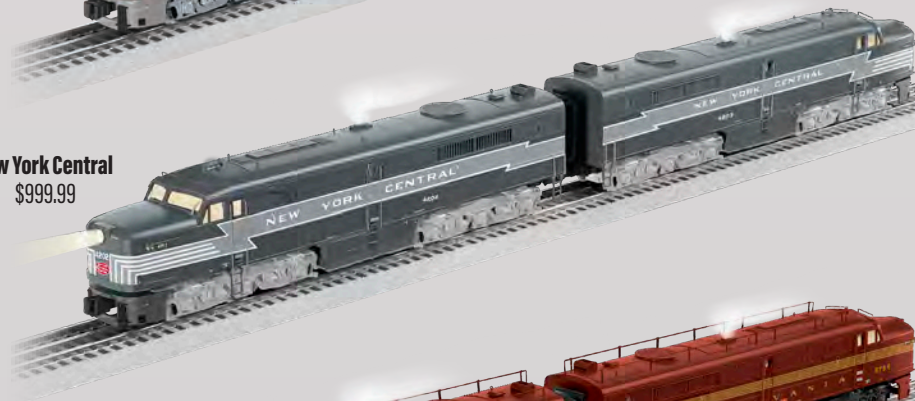

FEATURES:

- Both units powered!
- LEGACY® and Bluetooth® control in both locomotives
- Fan-driven smoke in both locomotives
- LEGACY® RailSounds® in lead locomotive
- Track IR in lead locomotive
- Front ElectroCouplers and non-operating rear couplers on both locomotives
- Crew figures in lead locomotive
- Mars lights where appropriate by road name
- Length: 17" each

LIONEL, LLC

RS-11

After pioneering the road-switcher design with the RS-1, ALCO sought to regain that market with the RS-11 in 1956. Despite better tractive effort and fuel economy than the GP9, the RS-11 struggled against the company's reputation for reliability. In spite of that reputation, a handful of surviving examples continue to prove the critics wrong today. With their distinctive look and sound, these ALCO's make a great addition to any roster.

SD40-2

The SD40-2 ranks at the top of the charts in sales, and is still considered by many railroaders to be one of the best locomotives on the rails. Their reliability has kept thousands of these locomotives on the rails and they are still a common sight today over 45 years since their introduction. Most have passed through multiple owners and today can be found on class 1 railroads, lease fleets, regionals and short lines in every corner of the continent.

Lionel is proud to bring back the SD40-2 with many of the improvements found in our popular SD40 and SD45 models including kinematic pilots and additional road name and road number specific details. This release includes an array of paint schemes appropriate for the 1970s to today. Powered and non-powered units are available. Non-powered units are also available for those who want to model larger consists with a lower cost and current draw! These units feature all of the same details as powered locomotives without crew figures or any electronics.

FEATURES:

- Powered Units:
 - All standard LEGACY® Diesel features plus
 - Warning beacon light where appropriate
 - Kinematic pilots
 - Road number specific details including pilots, fuel tanks, brakewheels and rooftop details
- Non-Powered Units:
 - Kinematic pilots
 - Road number specific details including pilots, fuel tanks, brakewheels and rooftop details
 - Operating couplers
 - No cab crew figures
- Length: 17"
- Minimum Curve: 054

LIONEL, LLC

C44-9W

A common sight on rails worldwide for 25 years, the GE "Dash 9" is still going strong. These modern workhorses can be found lugging heavy trains of iron ore or speeding hot intermodal trains. Many have now outlived the railroads that bought them.

This new Lionel release includes several "patched" units as well as some exports to Canada and Australia in fantastic color schemes! Build prototype-sized consists with two powered and one non-powered unit available in each scheme!

FEATURES:

- Powered Units:
 - Powered units feature all of the great LEGACY™ features on pages 28-29 plus:
 - Operating ditch lights
- Non-Powered Units:
 - Non-powered units feature the same details and graphics as our powered locomotives.
 - No electronics or cab figures are included.
- Length: 18"
- Minimum Curve: 036

BUNK CARS

Keep your gandy dancers dandy with these new cars! To provide workers a home away from home, railroads provided camp trains of bunk, kitchen, office and supply cars. Often these cars were made from retired freight and passenger equipment.

The perfect addition to your work train or as a trackside scene, our new bunk, kitchen and tool cars all feature LED illumination. The kitchen car comes complete with appropriate background sounds to bring your camp scene to life.

FEATURES:

- Interior illumination
- Die-cast trucks and couplers
- Easy conversion to scale couplers
- Length: 11 1/4"
- Minimum Curve: 031

86' BOXCARS

The 86' auto parts boxcars gave the railroads a massive billboard in addition to a reliable vehicle for just-in-time deliveries to keep America's automotive industry rolling. Despite their age, hundreds of these cars are still going strong today. A few have even managed to retain their original colorful paint schemes! The large blank canvas of these cars has made them popular for graffiti in recent decades as well.

Lionel's latest release of these cars includes some of our most requested classic paint schemes including the bright colors of the DT&I. We're also including some colorful modern cars featuring graffiti and unique glimpses of the past including the C&O "bleed through" paint on CSX 180455 and a repurposed SP door on UP 980455 (a car that actually started life on the PRR!)

All of these cars are inspired from prototype photos and ready for service on your railroad. Despite their size, thanks to kinematic couplers these behemoths will navigate an O54 curve!

FEATURES:

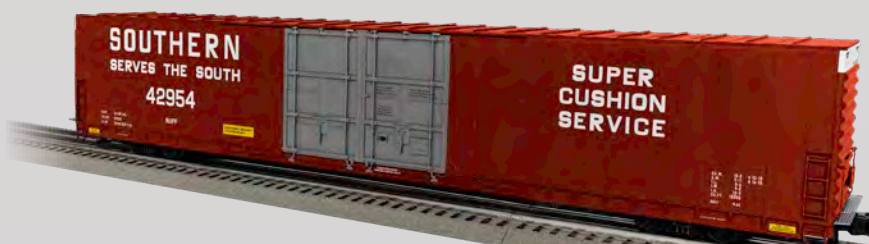

- Die cast trucks with rotating bearing caps
- Kinematic couplers extend on curves and retract on straights
- Cushioned draft gear pockets included for conversion to scale couplers
- Trucks easily convertible to two-rail wheelsets (sold separately)
- Graffiti cars inspired from prototype photos
- Length: 21 1/2"
- Minimum Curve: O54

50' DOUBLE DOOR BOXCARS

One of the more common freight cars of the 1940s through the 1960s, these cars were once some of the largest on the rails. Often used in finished auto and parts service, these cars could also be found hauling everything from lumber to finished goods. Double sets of doors made loading and unloading large crates or vehicles easier.

FEATURES:

- Opening side doors
- Die-cast trucks
- Operating couplers
- Length: 14"
- Minimum Curve: 031

CA-4 CABOOSE

Our CA-4 caboose is the perfect end to your UP freight - whether pulled by a Vision Challenger, Big Boy or your other favorite locomotive!

FEATURES:

- LED Interior illumination
- Detailed interior with figures
- Die cast trucks with operating couplers
- Hidden uncoupling tabs
- Length: 10"
- Minimum Curve: 031

SOUTHERN PASSENGER CARS

Serve the South with the classic look of the Southern's heavyweight passenger service! The perfect companion to our Mountains, Pacifics and diesels, these heavyweight cars could be found all across the Southern's network from the steam to diesel eras. Business car Virginia brings up the markers, so don't hold this train too long!

FEATURES:

- Baggage Cars
 - Die-cast trucks with operating couplers
 - Soft molded diaphragms between cars
 - Length: 13 1/4"
 - Minimum Curve: 027
- RPO Cars
 - Die-cast sprung six-wheel trucks
 - Operating couplers with hidden uncoupling tabs

SUNSHINE SPECIAL 18" PASSENGER CARS

Departing St. Louis for the sunny Gulf Coast and California, the *Sunshine Special* was aptly named. The train operated over the Missouri Pacific and its subsidiary the Texas & Pacific. Connections extended service from Louisiana to Los Angeles and Mexico City. The *Sunshine* included coach and sleeping accommodations, dining and lounge service and was usually filled out with ample head-end traffic, often running in multiple sections.

While some cars in dedicated service on this train received *Sunshine Special* letter boards, the ever-shifting consist would have regularly seen cars lettered for the MoPac and its subsidiaries. In 1933 the train was one of the first to receive air conditioning.

In 1946, connecting service with the Pennsylvania brought the *Sunshine Special* name to New York City - a truly coast-to-coast venture. In 1948, The *Texas Eagle* replaced the *Sunshine* as the MoPac's premier passenger train. The *Sunshine Special* would continue to serve for several years however, with the Pennsylvania extension becoming the *Penn-Texas*.

Soak in the rays with one of America's classic heavyweight consists in this new set! The perfect companion to the LEGACY® Mountain, this train captures all the best of railroading at its zenith.

FEATURES:

SOUTHERN PACIFIC 18" COACHES

Best remembered for Daylight streamliners, Southern Pacific also maintained a bustling commuter operation. Dozens of trains arrived and departed California's coastal cities daily, particularly in the San Francisco Bay area. At least three cars received patriotic paint schemes encouraging young men to enlist for the war effort. These coaches will look at home behind the new A6 Atlantic!

FEATURES:

The Lionel Layout Control System, or LCS, was developed to give you more control over your entire railroad, not just the engines. The LCS System allows for complete control over your railroad empire from a Lionel Cab Controller, the Lionel iCab APP or the LCS APP. LCS is a modular system, allowing you to customize it to your specific railroad's needs.

- Connect a Wi-Fi module to allow APP control from a compatible Apple device.
- Add SensorTrack technology to your layout to program engines to automatically perform specific functions.
- Use various switch controllers and monitors to throw powered switches and have their thrown position reported to the LCS APP automatically.
- Control accessories such as lighting and motors.
- Control Power Blocks to turn on/off track power to certain sections of your layout.
- Connect vintage TMCC products such as TPCs and other older controllers.

With the LCS System installed on your layout, you're not only sitting in the Engineer's seat, but also the Conductor's, Dispatcher's, Switchman's and anyone else performing duties on a busy Railroad!

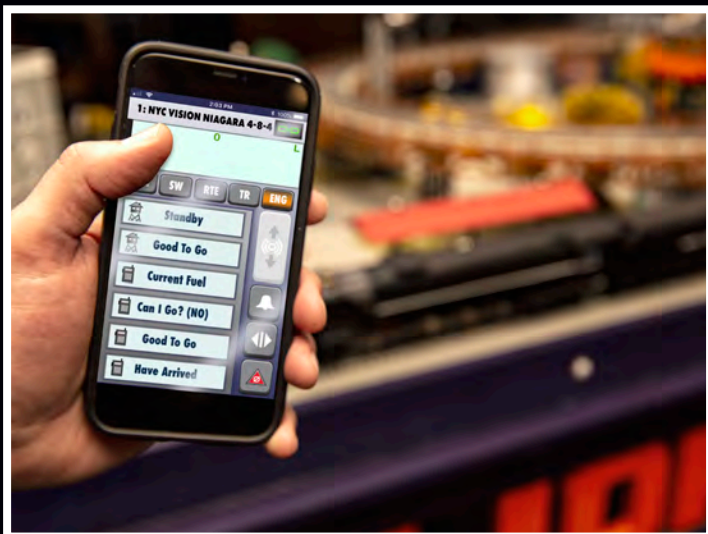

The LCS APP (currently available for free on the Apple APP Store) was created to work seamlessly with the LCS Modules to give you an overhead view of your layout with easy-to-use controls to throw switches, command turntables, activate lights and accessories, and more! It also includes a basic version of a Cab Controller so you can still control your trains without having to switch to a different APP or to a Cab!

The iCab APP (also available for download on the Apple APP Store) interfaces with the LCS WiFi module to give you an expanded LEGACY® Cab2 experience in the palm of your hand. Access your entire roster of programmed trains and locomotives in seconds, and experience the control of your trains through the use of the most modern technology available!

The Lionel Engineering Team is constantly working on new product development and finding innovating ways to further push the boundaries of model train control.

We invite you to check out our newest LCS offerings for 2018! Happy Railroading!

Visit www.lionel.com/lcs today for more information.

NEW

LCS PRODUCTS

FOR 2018!

A LCS CSM2

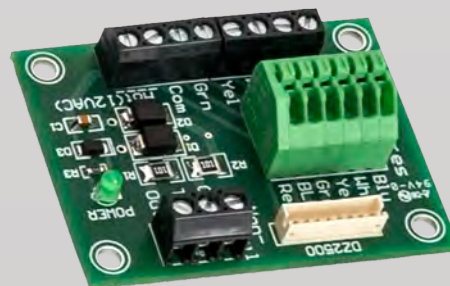

- Purpose created for use with the Z-Stuff DZ-2500 Switch Machine.
- Provides serial line data for DZ-2500 switch machine
- Non-derail operation compatibility
- Monitor up to 7 DZ-2500 throw positions on LCS APP
- Additionally, module has 4 block power control positions. (see BPC2 for functionality)
- Can be operated from Lionel CAB remotes and/or the LCS APP+ LCS Wi-Fi

6-85295 \$109.99

B NEW! LCS CSM2 DZ-2500 Breakout Board

- Purpose created for use with the Z-Stuff DZ-2500 Switch Machine.
- Allows for easier and faster wiring of your DZ-2500 switch machines!
- Daisy-chain serial data between DZ-2500s. No need for DZ-2001 Data Wire Driver. Easier troubleshooting of failed switch machines.
- Circuitry protects the DZ-2500 from power surges caused by derailments.
- One breakout board needed for each DZ-2500 switch machine.
- Dedicated connector for non-derail wires.

1908010 \$24.99

C LCS IRV2

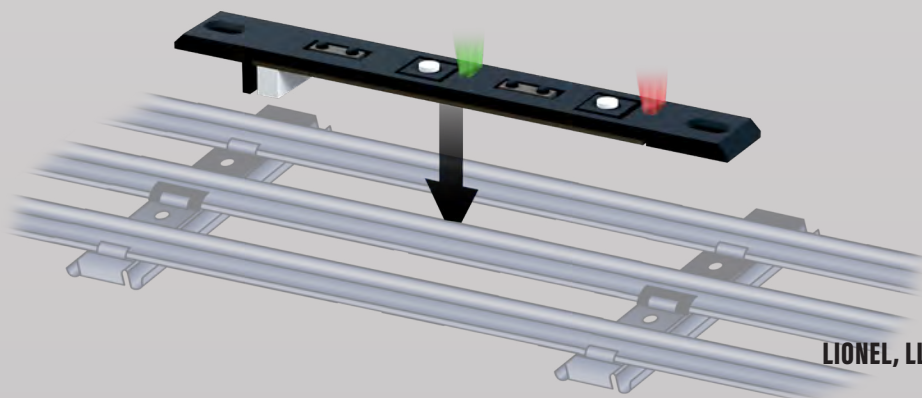

- Allows for the addition of the LCS SensorTrack system to a layout that does not use Fastrack.
- Each module can control up to four (4) individual sensors.
- Module includes two (2) sensor sleds with cabling. Additional sensors available for separate sale.
- Sensors include cover that attaches to existing track ties. Just drill a hole for the wire, mount the sensor sled between the rails, and you're good to go!

6-85296 \$99.99

D LCS IRV2 Sensor Add-On

- Add additional sensors to the IRV2 Sensor Module.
- The IRV2 includes 2 sensors, but can control up to 4!
- Includes sensor sled, cover, and cable.

6-85383 \$29.99

WELCOME TO TRADITIONAL O GAUGE

Lionel's line of Traditional O-Gauge products set the perfect tone for a beginner collector. Our Traditional O-Gauge products are made slightly smaller in size than our O Scale products, but run on the same 3 rail track system. This line is filled with an assortment of exciting licensed products, from Disney to Thomas & Friends to Hot Wheels! Want something a little more traditional? You can't go wrong with our New York Central Flyer set! Our extensive line of Traditional O-Gauge sets, rolling stock and accessories are a great fit for any layout, or even the perfect decorative touch for holidays!

LionChief® Our LionChief® system was designed to make running your train set so simple! LionChief® remotes have an easy to use throttle, with forward and reverse, and user-activated buttons for bell, whistle/horn and announcements. Our LionChief® Ready-to-Run sets include everything you need to get your train up and running!

LionChief® PLUS LionChief® Plus engines use the LionChief® remote, but they also come equipped with many high-end features that add high-quality realism and a fuller train experience to your play. What really sets LionChief® Plus apart is the ability to operate with either the provided remote OR with just a traditional transformer.

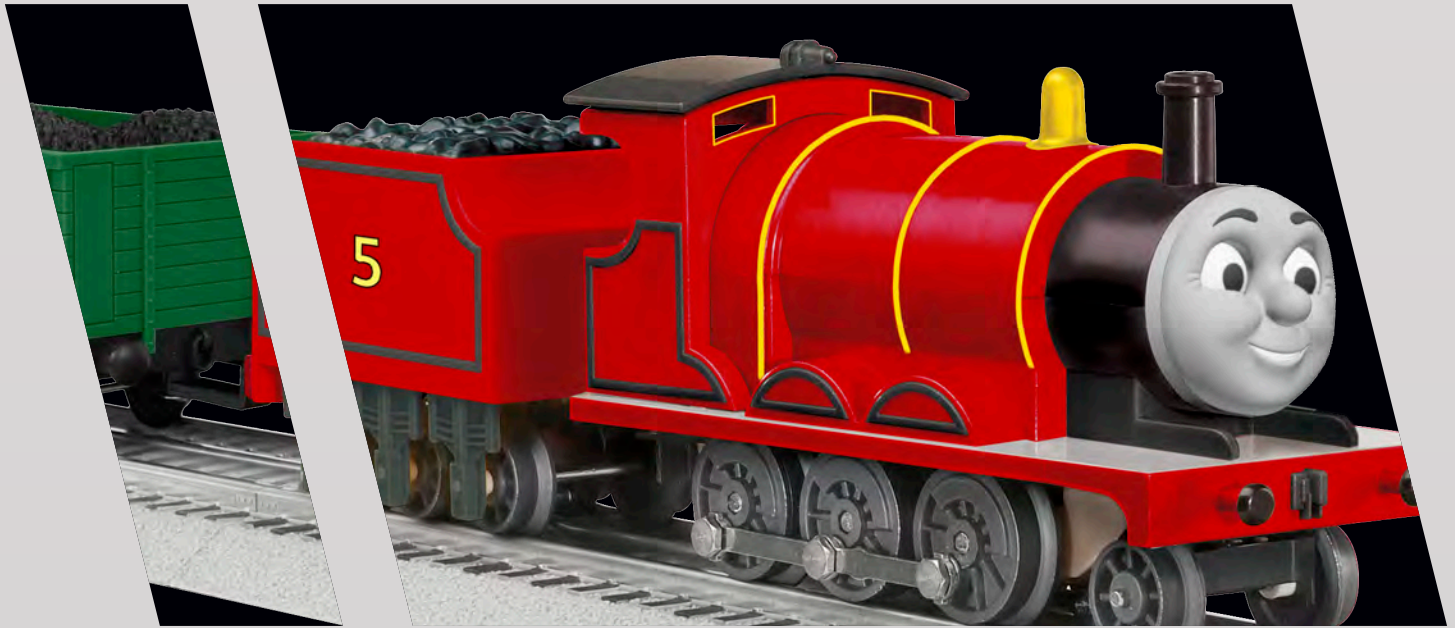

Increase Your Model Railroad Empire

In most of our LionChief® sets, we give you everything you need to get started, but why stop there? This catalog offers a large assortment of separate sale FastTrack®, rolling stock and accessories to your set and layout grow. Choose from a variety of Plug-Expand-Play accessories that connect to the Lock-on track piece in your set and help take your layout to the next level by adding animation and play-value!

Bluetooth® These engines have Bluetooth® on board, allowing them to connect with a compatible smart device.

THOMAS & FRIENDS

TM

Embark on an adventure like never before with Thomas & Friends on Sodor Island! Percy, James and Diesel are joining our Thomas & Friends line up, from LionChief® sets to separate sale engines! Disney MICKEY THE TRUE ORIGINAL

TIME TO CELEBRATE!

Who would have thought back in 1928 that a cartoon character would have such an impact and become one of the most recognizable figures worldwide? Walt Disney did.

Join Lionel this fall as we celebrate "The True Original", with special items dedicated to Mickey Mouse's 90th Anniversary.

To help celebrate, we are offering a fun Ready-To-Run set honoring the mouse that started it all; as well as separate-sale rolling stock and billboards to match!

If you are a Mickey Mouse fan, you are not going to want to miss this party! Items are limited, so join the celebration and order yours today!

ACCESSORIES

A NEW! Millennial People Pack

- 5 Hand Painted Plastic Figures
 - Average height: 1 3/8"
- 1930060 \$29.99

B NEW! Warehouse Kit

- Assembly Required (92 pieces)
 - Frosted Windows
 - Roof Details
 - Unpainted kit molded in realistic colors
 - Rail & Truck Docks
 - Dimensions: 17" L x 11 1/2" W x 9 1/4" H
- 6-85311 \$59.99

C NEW! Defect Detector

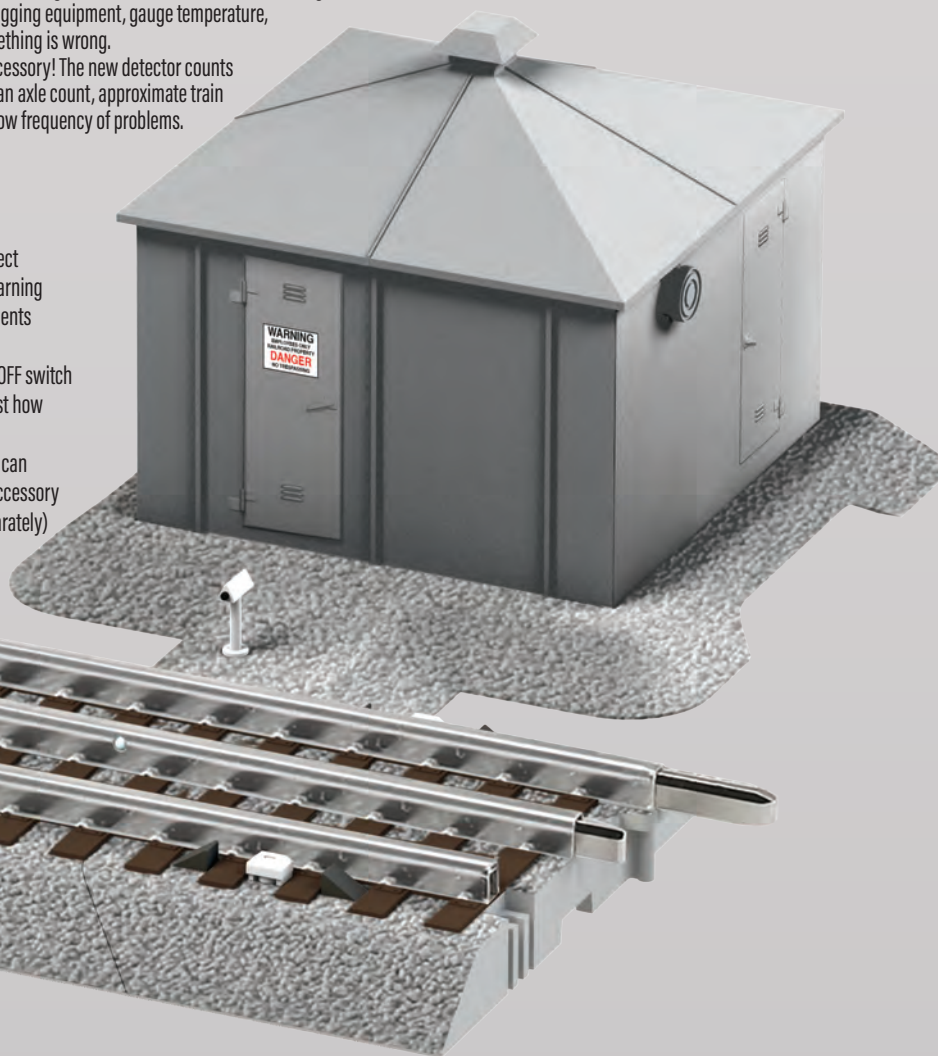

Introduced in the 40s, the defect detector came along to take the place of station agents and alert on-board crew of dangerous defects on the train. As a train passes through, the IR beams can detect dragging equipment, gauge temperature, monitor speed and send a signal to the dispatcher and train crew that something is wrong. Now you can add the action to your layout realistically with this all new accessory! The new detector counts your axles and delivers an announcement after the train passes providing an axle count, approximate train speed and the occasional defect! Use the max/min switch to set a high or low frequency of problems. Every lap around your layout brings a new chance for excitement!

1929100 \$79.99

FEATURES

5" O Gauge FasTrack Section and building with the following features:

- IR sensors detect and count the actual number of axles on a passing train and determines when track is clear
- Calculates and relays by audio the number of axles, approx. speed, imaginary milepost information and reports defect detection status
- Includes occasional defect announcements with warning sounds and announcements of imaginary car issues
- Volume control and ON/OFF switch
- Min/Max switch to adjust how often a defect is found
- Gets power from track - can also be powered from accessory power supply (sold separately)

Personalize Your Layout!

Showcase your family, friends, special occasions and favorite memories with an assortment of personalized cars! From the novice to the hobbyist, these cars will pull at the heartstrings and add a cherished touch to your track layout. VISIT LIONELSTORE.COM TO CREATE YOURS TODAY!

AMERICAN FLYER

Lionel's American Flyer line continues to expand with new offerings for every interest level in the S Gauge world! In this catalog, enjoy new LEGACY® locomotives, along with newly-tooled bunk and kitchen cars to add to your work trains. Our new freight cars also include single dome tank cars, auto racks and gondolas with coil covers! All these are available in a multitude of new realistic paint schemes and numbers to help you build longer trains!

ElectroCouplers™ (LEGACY®, LionChief® Plus, TMCC® required) Open these couplers anywhere on the layout without uncoupling track sections. The CAB-1 or CAB-2 Remote Controller activates the ElectroCouplers™.

RailSounds® Widely regarded as the industry standard, the impressive RailSounds® sound system brings the real sounds of the railroad to your layout. From the mechanical symphony of the locomotives, to the commotion of the station, you will be impressed by the digitally recorded samples of these special and authentic sounds.

Bluetooth® These engines have Bluetooth® on board, allowing them to connect with a compatible smart device.

LEGACY® These engines have Lionel LEGACY® command control on board and can also be operated with conventional transformer or DCC.

LEGACY® U33C

The General Electric U33C was among the largest of the "U Boats" and found a home on many railroads in freight service. This LEGACY® locomotive is available in all new road names and paint schemes. Scale coupler mounting brackets are included and scale wheels are available through Lionel Customer Service for those looking to make the conversion.

FEATURES

- LEGACY® Control System equipped
- DCC enabled
- AF Speed Control
- LEGACY® Railsounds
- Powerful maintenance free motor
- Front and rear ElectroCouplers
- Mounting brackets for scale couplers
- Supports switch to Lionel scale wheels (6408142625 available now through Customer Service)
- Directional lighting with LED headlights
- Illuminated number boards
- Illuminated cab interior
- Front and rear marker lights
- Traction tires
- Die-cast frame
- Fan-driven smoke
- Separately applied metal details
- Engineer and conductor figures
- Cab window glass
- Length: 13 1/2"
- Minimum Curve: S-36

AUTORACKS

Expand auto service on your layout with these new enclosed autoracks! Sized just right to capture the look of these gigantic cars yet still agile enough to run on most S Gauge layouts, these autoracks look right at home behind our scale locomotives. Each popular paint scheme is available in two numbers. Want more autoracks? Check out the traditional O Gauge section for two additional road numbers. Replacement trucks are available through Lionel Customer Service if you want to swap out for S Gauge.

FEATURES

- Die-cast metal trucks
- Operating couplers
- Opening end doors
- Dimensions in 1/64 scale:
 - Length 68' 8"
 - Width 12' 8"
 - Height 21' 4"
- Length: 13 1/2"
- Minimum Curve: S36 (R27 Recommended)

Conrail and other are trademarks owned by Consolidated Rail Corporation and are used here with permission.

GONDOLAS WITH COIL COVER

Coils of freshly rolled steel travel safely from the mills to manufacturing plants aboard these covered gondolas. Used in everything from autos to appliances, these colorful cars have been a common sight on the rails for more than 40 years. With removable covers, you can mix and match roadnames just like the prototype!

FEATURES

- Die-cast metal trucks
- Operating couplers
- Removable coil covers
- Length: 8 3/4"
- Minimum Curve: S36

Lionel Collectors Club

Two More Great Reasons to Join Today

If the eight reasons we gave you in the 2018 Volume 1 Lionel Catalog were not enough to convince you to join the LCCA, we've just added two more. And these unique products include a year's Club membership or a year's extension if you are already a member.

Join the Lionel Collector Club of America! You get free Lionel Catalogs mailed to your door, five great issues of The Lion Roars award-winning membership magazine annually, free access to members-only areas of the club website, four issues of Interchange Track magazine annually to buy and sell train stuff from and to members, annual conventions, and plenty of fun. And if you buy the latest LCCA-exclusive Lionel offerings shown here, you can save the membership fee.

***Something
For Everyone
Who Loves
Lionel Trains.***

1 You can order this state-of-the-art VisionLine Union Pacific Challenger 3975 locomotive and oil tender exclusively through the LCCA and receive a free membership or a one-year membership extension (a \$39 value). Look for all of the product details elsewhere in this catalog. To get pricing and place orders, you must call the LCCA business office during regular business hours at 815-223-0115.

2 The LCCA is also the **ONLY** place you can order this highly collectible and limited production Polar Express Skiing Hobo observation car. The car with a hobo skier on the snow-covered roof will be a "must have" for all Polar Express fans. Look for all the details on this car within the pages of this catalog. The car can be ordered by current members on the LCCA website for \$95 each (including shipping) as long as quantities last. And car orders will include a free one-year membership for non-members and a one-year extension for current club members (a \$140.99 value). Non-members must call the LCCA business office at 815-223-0115 during regular business hours to place orders.
