120 YEARS LIONEL

Dear Friends,

Since 1900, when Joshua Lionel Cowen founded what became America's most beloved toy company, Lionel Trains has been on a mission to create something that will bring families together, build bonds between generations, and create memories that will last a lifetime. For 120 years, Lionel has built its reputation on a promise to craft not only the finest quality model trains but extraordinary toys that ignite imaginations, allow adults to feel like kids and encourage kids to reach for their wildest dreams.

This year, 2020, marks an incredible milestone for Lionel as we celebrate our 120th anniversary. With

the help of many incredible employees over the span of 12 decades, Lionel continues to develop the most innovative model trains in the industry.

We at Lionel love what we do. We do it for the happiness, creativity and imagination; and we work hard to continuously provide products that create lasting memories for collectors, families and new consumers everywhere. To help celebrate this milestone, we invite you to join us as we reminisce Lionel's past while celebrating our present and bright future.

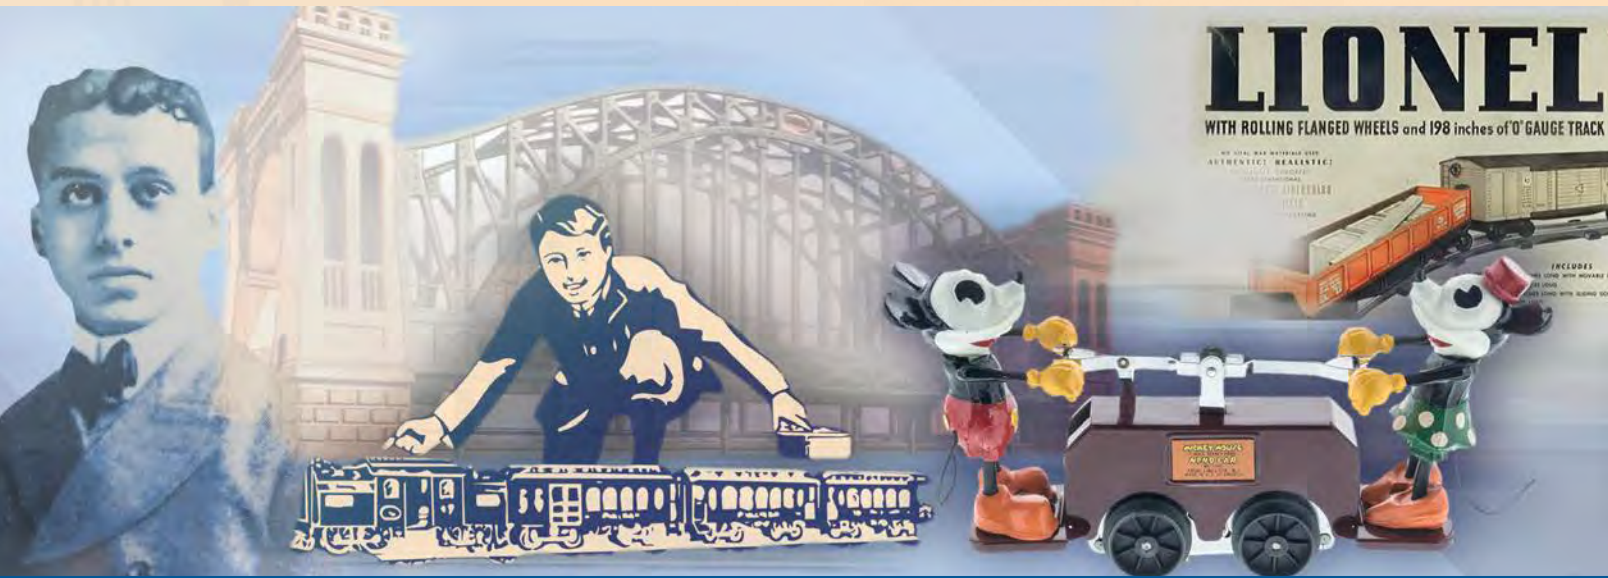

We hope you enjoy and continue to spread the magic that is Lionel Trains.

O SCALE

Lionel's O Scale products are of the most premium products in model railroading. With superior mechanisms, high-end features, and stunning, life-like details; these engines and complementary rolling stock resemble their true-to-life counterparts in 1:48 scale. You'll find some of our most advanced features here like locomotives equipped with both Bluetooth and LEGACY control, advanced smoke and sound features, and intricate details.

LEGACY® Control System This revolutionary control system allows you to run your LEGACY® Control System-equipped locomotive just like a real engineer runs his trains. With its enhanced sounds and 200 speed steps, this system allows properly equipped engines to function with unparalleled options. The CAB-2 Remote Controller has an LCD screen display, vibration that simulates the effort of the locomotive, and other exciting operating features. The CAB-1L Remote Controller is a simplified alternative to unlock many LEGACY® features. New LEGACY® locomotives in this catalog can also be controlled by your smart device with the LionChief App with simplified control and functions.

ODYSSEY II Speed Control Slow speed and start-up operation are smooth and steady with ODYSSEY II Speed Control. Watch your locomotive as it creeps through the yard or fights up a grade without hesitation. Odyssey II also maintains your train's constant speed through curves and up and down grades.

ElectroCouplers™ (LEGACY®, LionChief® Plus, TMCC® required) Open these couplers anywhere on the layout without uncoupling track sections. The CAB-1 or CAB-2 Remote Controller activates the ElectroCouplers™.

Wireless Tether™ Looking to enhance the appearance of Lionel steam locomotives, we developed the exclusive infrared Wireless Tether connection so that the locomotive and tender can communicate without cumbersome wiring between the units. LEGACY® equipped steam locomotives have a new small profile housing that mounts to the top of the drawbar!

RailSounds® Widely regarded as the industry standard, the impressive RailSounds® sound system brings the real sounds of the railroad to your layout. From the mechanical symphony of the locomotives, to the commotion of the station, you will be impressed by the digitally recorded samples of these special and authentic sounds.

Bluetooth® These engines have Bluetooth on board, allowing them to connect with a compatible smart device.

LEGACY® STEAM LOCOMOTIVES

ON PAGES 10-21 ARE EQUIPPED WITH THESE GREAT FEATURES.

- LEGACY® Control System equipped – able to run in LEGACY® Control mode, in TrainMaster Command Control mode, or in Conventional mode with a standard transformer
- Bluetooth® Control - Operate with Universal Remote or LionChief App
- Odyssey® II Speed Control
- LEGACY® RailSounds® sound system featuring:
 - ▼ CrewTalk™ dialog with different scenarios depending on whether the locomotive is in motion or stopped
 - ▼ TrainSounds that mimic operating dialog when the locomotive is in motion or stopped
 - ▼ Six official railroad speeds with CrewTalk dialog
 - ▼ DynaChuff™ synchronized with 32 levels of intensity as the locomotive gains speed
 - ▼ LEGACY® “Real-Time Quilling Whistle” control with instant response for realistic signature “quilling” and correctly timed warning signals
 - 5 different whistles to choose from for a more customized experience
- ▼ Single hit or continuous mechanical bell sounds
 - 5 levels of bell pitching for customized sounds
- ▼ Sequence Control: plays the sound effects of an entire trip, including warning sounds and announcements, based on the movement and speed of the locomotive
- ▼ Current speed and fuel dialog, coal or oil loading sound effects
- IR Transmitter that works with LCS SensorTrack™
- Powerful maintenance-free motor with momentum flywheel
- Wireless Tether™ connection between locomotive and tender
- ElectroCoupler™ on rear of tender
- Directional lighting including operating headlight and back-up light on rear of tender
- Bicolor illuminated classification lights on the front of locomotive where applicable. Using a Legacy controller, change the color of the classification lights between white or green
- Traction tires
- Interior illumination in cab
- Die-cast metal locomotive body, pilot, and trucks
- Die-cast metal tender body and trucks
- High level of separately applied metal details
- Separately applied builder's plate
- Synchronized fan-driven smoke unit
- Adjustable smoke output
- Authentically detailed cab interior
- Cab “glass” windows
- Engineer and fireman figures

LEGACY S1 6-4-4-6

Few locomotives made a public debut and statement like the Pennsylvania's "Big Engine" - the S1. Unveiled at the 1939 World's Fair, No. 6100 ran under its own power before crowds on a special bed of rollers. The 140 foot long streamlined behemoth shocked the imagination with its promise of speed, power and bright futures ahead. Although the tender said "American Railroads" at the Fair, the Pennsylvania wasted no time nor effort in their own branding of the S1. Whatever its successes and failures as an operating locomotive, the S1 did its job well as a marketing tool for the Pennsy's modernized passenger trains. Owing to its length (8 feet longer than the Big Boy and built on a non-articulated frame) the S1 was limited to service west of Crestline Ohio. Designed for operation in excess of 100 mph, there are unsubstantiated reports of the engine exceeding 150 on the racetracks of the PRR's western mainlines. But success and fame was fleeting. The locomotive was last run in 1944 and scrapped in 1949.

Eight decades later, the S1 still captures the imagination. Available for the first time in nearly 20 years from Lionel, the Big Engine is back and better than ever with Legacy, Bluetooth, Safety Valve Steam and many more improvements since its introduction. The model is available in four paint variations: The American Railroads livery of the fair, its as-built appearance, a calendar-art inspired version which features a winged keystone on the front, and a fanciful Tuscan Red and gold scheme inspired by and a great match for, the Pennsy's fleet of modernism cars. Don't miss this opportunity to add a true railroading icon to your layout!

FEATURES:

- ✓ Standard LEGACY Steam features on p. 8-9
- ✓ Safety valve steam
- ✓ Three default air horn sounds and two steam whistles to choose from
- ✓ Two interchangeable name plates for the front of the locomotive on all three PRR schemes
 - "The General"
 - "The Trail Blazer"
- ✓ Length: 36 1/4"
- ✓ Minimum Curve: O72

*These S1 6-4-4-6 locomotives do not include whistle steam.

Pennsylvania South Wind 21" Passenger Cars

Given an all new streamlined consist in 1940, the South Wind was one of three trains providing daily service between Chicago and Miami. Despite the stainless steel construction, the train was painted in the Pennsylvania's "Fleet of Modernism" two-tone red and gold paint scheme. The all-coach train featured a seven-car consist which included dining and observation cars. In 1947, Atlantic Coast Line and Florida East Coast began contributing cars to the train, painted in matching colors. It was not uncommon for the train to grow in length during peak travel seasons as people flocked to warmer climates. An add-on set of heavyweight sleepers would be right at home. And in later years the consist would get even more varied. Eventually the elaborate color scheme would become more subdued and the consist split up. But with their unique design, the original South Wind cars were always easy to pick out on the PRR.

PASSENGER CARS FEATURE:

- \\ Flicker-free LED lighting
- \\ Molded plastic interiors
- \\ Sprung die-cast trucks
- \\ Kinematic couplers
- \\ Easy conversion to scale couplers
- \\ Flexible diaphragms

LEGACY 4-6-0

Based on a New York Central design, these 10 Wheelers are typical of locomotives found on railroads far and wide. Once a standard of mainline power, in later years, these locomotives were used on secondary trains, branch lines, commuter trains and locals. Several of these locomotives have gone on to more famous second careers on tourist lines. Our latest release of the popular 4-6-0 captures some of those survivors as well as historic roads in colorful paint schemes. Canadian Pacific 972 will even come with additional magnet details for the tender to help replicate some of the fan trips this locomotive took in the 1980s. Upgraded with Bluetooth and Whistle Steam for the first time, these engines are a perfect 10 for your layout.

FEATURES:

- \\ Standard LEGACY Steam features on p. 8-9
- \\ Length: 9 1/2"
- \\ Minimum Curve: O31

LIONEL, LLC

LEGACY USRA 2-8-8-2

The largest of the USRA standard designs, the 2-8-8-2 took heavily from the N&W Y2 class. The N&W was the largest user of the type from the USRA and continued to develop the Y's further after the war. Other original owners of the USRA design included the B&O, Clinchfield, Northern Pacific and Virginian. Later, N&W sold some of their roster to the Santa Fe, Union Pacific, Rio Grande and Pennsylvania.

These locomotives continued to perform well for all of their owner's right up till the end of steam and now they are back in the Lionel roundhouse with new features and new and familiar paint schemes. For the first time, the 2-8-8-2 will come with Bluetooth control, "simpling" chuff sounds (mimicking the use of the simpling valve on these locomotives, they will start with 8 chuffs per wheel revolution and transition to 4) and Whistle Steam as well as appropriate tender styles and other road-specific details including smokebox air pumps and number boards as appropriate.

FEATURES:

- \\ Standard LEGACY Steam features on p. 8-9
- \\ Whistle Steam
- \\ "Simpling valve" chuff - starts with 8 chuffs/rev and transitions to 4 like the prototype
- \\ Road-specific tender and smokebox details
- \\ Illuminated tender doghouse - where applicable
- \\ Only on 2131190 - locomotive hand weathered by artist Harry Heike
- \\ Length: 28"
- \\ Minimum curve: O72

WHISTLE STEAM!

MEET THE ARTIST: HARRY HIEKE

Harry Hieke, a long time train enthusiast from early childhood started with his first Lionel Scout at age 5. In 1985 he began designing and weathering products for friends and made it a full time career in 1998. Harry has made over 75 prototypes for Lionel including the Rockville Bridge, M6 Tower, oil tank farm, and even scale telephone poles. His passion lies around creating detailed models with real life weathered finish.

You can find additional examples of his work by typing Harry Hieke into Youtube.

E7 AA/AB Sets & Superbass B Units

Still the best selling passenger diesel of all time, EMD's E7 picked up where the E6 had left off before WWII, but with its already proven power wrapped in a new look. Gone were the sleek slanted noses of the earlier E units, replaced with the "Bulldog" nose introduced on the immensely popular FT. Orders for the new locomotives came pouring in from railroads eager to dieselize their passenger service in the booming post-war economy.

This new run of E7's from Lionel captures some of the greatest paint schemes ever worn by these locomotives, including some very early variations. Perfect power for the Golden State passenger cars introduced earlier this year, the Rock Island and Southern Pacific sets would each have been found on this train as it ran over their respective rails. Espee ordered their E7's as A-B-B sets, so we've done the same - including a "fantasy" scheme to match the Lark consist also introduced this year. Another great joint service western train is also represented with the City of Los Angeles, operated by the Chicago & Northwestern and Union Pacific.

For eastern fans, we start with two early paint schemes on the New York Central - the initial two tone gray and an experimental all black "lightning stripe" set - complete with appropriate "vented" pilots. The all-black scheme was never repeated and has rarely been modeled. Competing with the Central of course, we have the Pennsylvania's classic 5 stripe Tuscan red scheme. As a note for Pennsy modelers, the railroad never ordered any E8 B units, pairing them with E7 Bs instead - so we've added an extra single stripe version for those wishing to add an appropriate B unit for E7 or E8 sets. Last but not least, the ACL offers some southern charm and vibrant color with the 1956 variation of their classic purple and silver paint scheme. All of the AA / AB sets feature two powered locomotives, both with LEGACY and Bluetooth control, fan-driven smoke, lighting and Electrocouplers on the ends. The lead unit includes sounds, track IR and crew figures. To boost your consist, SuperBass B units are also available for each road. These non-powered models feature lights, smoke and a sound system that will take your experience to the next level!

AA/AB SETS FEATURE:

- \\ Standard LEGACY Diesel features on p. 22-23
- \\ Both units powered!
- \\ LEGACY and Bluetooth control in both locomotives
- \\ Fan-driven smoke in both locomotives
- \\ LEGACY Railsounds in lead locomotive
- \\ Track IR in lead locomotive
- \\ Front Electrocouplers and non-working rear couplers on both locomotives (E7B locos will have ElectroCoupler on the rear)
- \\ Crew figures in lead locomotive
- \\ Mars lights where appropriate by road name
- \\ Length: 34" (17" each)
- \\ Minimum Curve: O36

SUPERBASS B UNITS FEATURE:

- \\ SuperBass LEGACY Railsounds
- \\ Fan-driven smoke
- \\ Directional back-up light
- \\ Rear ElectroCoupler
- \\ Length: 17"
- \\ Minimum Curve: O36

New York Central Southwestern Limited

Despite the fiercest of competition between New York and Chicago, the New York Central always struggled to match schedules and service to St. Louis against the Pennsylvania and even the B&O. The Southwestern Limited was the premier train on this long route, but it's consist was anything but consistent. With multiple connecting cars added and removed at nearly every major stop en route, the length and makeup of the train was always changing. It also meant an observation car for the end was a rarity and a hindrance to operations. Nevertheless, the train would rate modern motive power like new E7 diesels or large steam like J3 Hudsons or Niagaras and offered a variety of accommodations for both coach and Pullman passengers. The lack of a uniform train makes it all the more interesting to model - allowing for a great mix of heavyweight, streamlined and lightweight cars in multiple configurations and even paint schemes. So if you've got someone to meet in St Louis, or just about anywhere in between, this is just the train for you!

B60 BAGGAGE CAR FEATURES:

- ✓ LEGACY Railsounds in lead locomotive
- ✓ Track IR in lead locomotive
- ✓ Front Electrocouplers and non-working rear couplers on both locomotives (E7B locos will have ElectroCoupler on the rear)
- ✓ Crew figures in lead locomotive
- ✓ Mars lights where appropriate by road name
- ✓ Length: 34" (17" each)
- ✓ Minimum Curve: O36

SUPERBASS B UNITS FEATURE:

- ✓ SuperBass LEGACY Railsounds
- ✓ Fan-driven smoke
- ✓ Directional back-up light
- ✓ Rear ElectroCoupler
- ✓ Length: 17"
- ✓ Minimum Curve: O36

VISION BAGGAGE CAR FEATURES:

- \ Plays multiple loading / unloading sounds at stops and realistic train sounds in motion to recreate an entire rail journey from beginning to end!
- \ Accessible with LEGACY, TrainMaster Command Control system
- \ Max/Min and volume control for sounds
- \ Die-cast trucks and kinematic couplers for close coupling on straightaways and wider coupling on curves
- \ LED interior lighting with capacitor for flicker-free performance
- \ Separately applied details on undersides and body
- \ Scale coupler mounting pads
- \ Length: 18"
- \ Minimum Curve: O54

21" PASSENGER CARS FEATURE:

- \ Flicker-free LED lighting
- \ Molded plastic interiors
- \ Sprung die-cast trucks
- \ Kinematic couplers
- \ Easy conversion to scale couplers
- \ Flexible diaphragms
- \ Length: 21" each
- \ Minimum curve: O54

VISTAVISION DOME CAR FEATURES:

- \ VistaVision™ Wi-Fi video camera streams live video from a dome passenger's vantage point
- \ Die-cast sprung trucks and couplers
- \ Kinematic couplers extend for better operation and appearance on curves
- \ Molded interiors
- \ Flicker-free LED interior lighting on lower level
- \ Scale coupler adapters included
- \ Easy to remove body for quick access to add interior figures or other details
- \ Paint schemes match existing and upcoming Lionel 21" passenger car sets
- \ Length: 22"
- \ Minimum Curve: O54

STATIONSOUNDS DINER FEATURES:

- \ Control with LEGACY™ or TMCC
- \ Custom recordings featuring multiple characters allow you to recreate an entire rail journey – from departure to arrival at your final destination
- \ Arrival/departure announcements, dining reservation calls, and other en route dialog
- \ "Clickety-clack" of the cars as they roll down the rails
- \ Die-cast operating "Kinematic" couplers auto adjust for close coupling on straightaways and wider coupling on curves
- \ LED lighting with capacitors for flicker-free running
- \ Separately applied details on undersides and bodies
- \ Narrow or full width diaphragms per prototype
- \ All-New body tooling
- \ Durable plastic bodies
- \ Detailed interiors
- \ Flush-fitting windows
- \ Scale Coupler mounting pads
- \ Die-cast metal sprung trucks

LEGACY Genset Switchers

Introduced in 2007, these Genset locomotives pioneered fuel and emissions-saving technologies. Many railroads tested the models, particularly in urban environments where their efficiencies would be most appreciated. Union Pacific each ordered the locomotives in larger quantities. Although they did not catch on universally, they have paved the way for more powerful designs since. Lionel is bringing this model back with several great new features. Redesigned with a plastic body and added weights inside, this newest version will still pull well and look great. Bluetooth has also been added for easy control with your Universal Remote or app!

FEATURES:

- \\ Standard LEGACY Diesel features on p. 22-23
- \\ LEGACY Bluetooth and Conventional control
- \\ Metal frame, plastic body with added weights for traction
- \\ Dual powerful maintenance-free motors
- \\ LEGACY Railsounds including the auto-shutdown sounds when the locomotive idles for extended periods
- \\ Fan-driven smoke from three exhaust stacks
- \\ Dual ElectroCouplers
- \\ Operating ditch lights on both ends of the locomotive
- \\ Length: 16"
- \\ Minimum Curve: O42/O54 Recommended

LEGACY GP7

One of the most common, and long-lived locomotives of all time, the GP7 was EMD's answer to Alco's road-switcher innovation. Easily adapted to any use the railroad could think of, the GP7 was far more versatile and reliable than the steam locomotives it replaced. This venerable Geep is back in some fantastic classic paint schemes!

FEATURES:

- ✓ Standard LEGACY Diesel features on p. 22-23
- ✓ Legacy and Bluetooth control
- ✓ Legacy Railsounds
- ✓ Fan driven smoke
- ✓ LED lighting
- ✓ Dual Electro Couplers
- ✓ Track IR transmitter
- ✓ Separately applied detail parts
- ✓ Length: 14 1/4"
- ✓ Minimum Curve: O31

Sharknose AA Sets & SuperBass B Units

Despite their distinctive appearance, the "sharks" failed to take a big bite out of the market. After small orders of earlier similar designs, Baldwin's greatest sales success came with the RF-16 model, with a total of 130 A and B units delivered to the B&O, New York Central and Pennsylvania. Most of the locomotives were retired by the mid-1960s, but several former NYC units soldiered on for the Monongahela railroad.

The sharks are swimming again at Lionel, in all new deco schemes and now for the first time with Bluetooth and the availability of SuperBass sounds! The largest owner of sharks, the Pennsylvania, is represented in two versions. The single stripe green scheme and 5-stripe Tuscan Red. The latter is based off of the road's larger BP20 diesels which were purchased for passenger service - a great compromise for those looking to add passenger sharks on layouts with tighter curves or shorter-than-scale passenger cars! The New York Central is represented in their later "cigar band" deco, with the Monongahela units showing a very similar heritage.

The original Baldwin demonstrator scheme on these locomotives was one of their best and they toured over many routes before eventually being sold to the EJ&E (although this set used a different prime mover, external details are very similar to the later RF16.) The Santa Fe and Army schemes are pure fantasy. The AT&SF did have plenty of odd and distinctive passenger locomotives however, including earlier models from Baldwin and the paint scheme just works so well on this model we had to try it! As for the Army - we just had to put some teeth on one of these and think they would look absolutely perfect on the point of a troop or military vehicle train.

AA SETS FEATURE:

- ✓ Standard LEGACY Diesel features on p. 22-23
- ✓ Both units powered!
- ✓ LEGACY and Bluetooth control in both locomotives
- ✓ Fan-driven smoke in both locomotives
- ✓ LEGACY Railsounds in lead locomotive
- ✓ Track IR in lead locomotive
- ✓ Front Electrocouplers and non-working rear couplers on both locomotives
- ✓ Crew figures in lead locomotive
- ✓ Length: 34" (17" each)
- ✓ Minimum Curve: O36

SUPERBASS B UNITS FEATURE:

- ✓ SuperBass LEGACY Railsounds
- ✓ Fan-driven smoke
- ✓ Directional back-up light
- ✓ Rear ElectroCoupler
- ✓ Length: 13"
- ✓ Minimum Curve: O36

POWERED B UNITS FEATURE:

- ✓ LEGACY, Bluetooth and conventional control
- ✓ Odyssey II speed control
- ✓ Fan-driven smoke
- ✓ Adjustable smoke output
- ✓ Directional back-up light
- ✓ Dual maintenance-free motors
- ✓ Non-operating couplers for closer coupling in consists
- ✓ Traction tires
- ✓ Die-cast metal trucks and fuel tank
- ✓ Length: 13"
- ✓ Minimum Curve: O36

LIONEL, LLC

New York Central Xplorer Set

Al Perlman saw a dynamic future for passenger rail in lightweight streamlined trains. The New York Central's Xplorer brought that vision to life. Unfortunately, the train did not live up to expectations and it's time on the Central was short lived. But the concept and vision had merit and the train's dramatic form and color scheme remain an inviting look into the potential of rail travel even today.

So what if the New York Central kept the concept but applied it to conventional equipment? This great new set Xplores that idea, using our RF16 Baldwin shark and 21" ACF coaches to recreate a "heavyweight" Xplorer consist. Could the smoother ride and known maintenance needs of the conventional equipment combined with the pricing and service of the original train have been the answer Perlman wanted? It can be on your railroad!

SET INCLUDES:

- \\ LEGACY RF16 Sharknose #20
- \\ Three 21" Passenger coaches

LOCOMOTIVE FEATURES:

- \\ Standard LEGACY diesel features on p. 22-23
- \\ Legacy and Bluetooth control
- \\ Odyssey II Speed Control
- \\ Legacy Railsounds
- \\ Fan-driven smoke
- \\ Dual powerful maintenance free motors
- \\ Rear ElectroCoupler
- \\ IR Transmitter for SensorTrack™

PASSENGER CAR FEATURES:

- \\ Flicker-free LED lighting
- \\ Molded interior details
- \\ Sprung die-cast trucks
- \\ Kinematic couplers
- \\ Easy conversion to scale couplers
- \\ Full-width diaphragms

LIONEL, LLC

Aliquippa Turn P&LE Freight Set

Often photographed on the P&LE's commuter trains, when not needed in passenger service, the last of the Little Giant's GP7s could be found in local and transfer service in the Aliquippa and McKees Rocks areas. This set recreates one of those "turns" as they looked in the 1980s, complete with a host of P&LE rolling stock in a variety of colors.

SET INCLUDES:

- \ P&LE LEGACY GP-7 #1501
- \ P&LE covered gondola
- \ P&LE modern boxcar
- \ P&LE 100 ton hopper
- \ P&LE Bay window caboose

LOCOMOTIVE FEATURES:

- \ Standard LEGACY diesel features on p. 22-23
- \ LEGACY RailSounds
- \ Fan-driven smoke
- \ LED lighting
- \ Dual electrocouplers
- \ Crew figures in cab

ROLLING STOCK FEATURES:

- \ Die-cast metal trucks with rotating bearing caps
- \ Operating couplers with hidden tabs
- \ Easily convertible to scale couplers and wheelsets (not included)
- \ Separately applied details
- \ Removable covers on gondola
- \ Opening side doors on boxcar
- \ Removable coal load on hopper
- \ Die-cast metal body and frame on hopper
- \ LED illuminated interior and marker light on caboose
- \ Detailed caboose interior with figure

ADDITIONAL SET FEATURES:

- \ Set Length: 66"
- \ Minimum Curve: O31

NEW! Aliquippa Turn P&LE Freight Set
2122010 \$849.99

Southern Freight Set

Far removed from the main lines and streamliners, this Southern local freight carries out essential work for the railroad with the same Southern class and style. Still adorned in full green paint, the GP7 works town-to-town picking up and setting out carloads of traffic. Kaolin clay and steel traffic look to be among today's pick-ups, with a bright red and yellow "local" caboose to bring up the rear. Bring some southern hospitality to your railroad's customers with this set - and expand your business with additional rolling stock in the pages ahead.

SET INCLUDES:

- \ Southern LEGACY GP-7 #2180
- \ Southern boxcar with roof hatches
- \ Southern PS-2 covered hopper
- \ Southern gondola with covers
- \ Southern bay window caboose

LOCOMOTIVE FEATURES:

- \ Standard LEGACY diesel features on p. 22-23
- \ LEGACY RailSounds
- \ Fan-driven smoke
- \ LED lighting
- \ Dual electrocouplers
- \ Crew figures in cab

ROLLING STOCK FEATURES:

- \ Die-cast metal trucks with rotating bearing caps
- \ Operating couplers with hidden tabs
- \ Easily convertible to scale couplers and wheelsets (not included)
- \ Separately applied details
- \ Removable covers on gondola
- \ Opening side doors on boxcar
- \ LED illuminated interior and marker light on caboose
- \ Detailed caboose interior with figure

ADDITIONAL SET FEATURES:

- \ Set Length: 61"
- \ Minimum Curve: O31

B60 Passenger Cars

Based on the Pennsylvania's B60 baggage car, these models represent two cars from the Penn Central era as well as a fun Christmas version which could still blend in with a traditional consist. Don't model the Pennsy or the PC? No problem - these cars regularly traveled all across the country in bulk mail and express service.

FEATURES:

- Die-cast sprung metal trucks and operating couplers
- Easy conversion to scale couplers
- Separately applied metal details
- Illuminated marker lamps
- Length: 11 1/4"
- Minimum Curve: O42

NEW! Penn Central #7630

2127210 \$189.99

Pullman 18" Sleeper Car 2-Packs

In addition to cars assigned to specific railroads and routes, Pullman also operated a pool of cars which could be used wherever needed. This helped balance demand and better utilize the cars for seasonal traffic trends around the country. Cars were painted in the classic "Pullman Green" until 1946 when a two-tone gray was introduced, though green cars remained common through the next decade. These cars are the perfect add on to any of your trains - no matter what railroad you model!

FEATURES:

- Die-cast sprung 6 wheel trucks
- Operating couplers with hidden uncoupling tabs
- Flexible diaphragms between cars
- Opening doors
- Detailed interiors with figures
- Flicker-free LED interior lighting
- Length: 19" each
- Minimum Curve: O54

Wi-Fi Theater Cars

Tour your railroad like a boss with the camera-equipped theater cars! Based on prototype cars used for inspection trips of the railroad in real life, these cars feature an onboard Wi-Fi camera which transmits a live 1080P video as it travels the layout. Just download the free app and connect via your phone, tablet or pc - no additional hardware is required!

FEATURES:

- \ Wi-Fi Hi-Def 1080P camera transmits live video and records video/pictures via downloadable app for Apple, Android or PC
- \ Capacitor for uninterrupted camera streaming
- \ Works on all conventional and command-controlled layouts
- \ Die-cast operating kinematic coupler for close coupling on curves
- \ Non-operating scale coupler on observation end
- \ Scale coupler mounting pads
- \ Flicker-free LED interior and end lighting with on/off switch
- \ Die-cast 4 or 6 wheel trucks per prototype
- \ Theater-seating interior details
- \ Length: 21"
- \ Minimum Curve: O54

PS-5 Covered Gondolas

Covered gondolas protect weather-sensitive loads too big for a boxcar. Commonly seen in steel service, these are a great addition to any scene. Covers on the model are removable, allowing access to whatever loads you choose to hide inside.

FEATURES:

- Die-cast trucks with rotating bearing caps
- Operating couplers with hidden tabs
- Easy conversion to scale couplers and 2-rail wheelsets (not included)
- Removable top covers
- Separately applied detail parts
- Length: 14 3/4"
- Minimum Curve: O36

Roof-Hatch Boxcars

Beginning in the 1960s, several railroads began converting 40' boxcars for bulk loading use by adding loading hatches to the roof similar to a covered hopper. Unloading was more challenging than a covered hopper, but it accommodated shippers who were not set up to receive bottom-outlet cars. And it allowed the boxcar to be used in other services when not needed for bulk loading for better year-round utility on seasonal goods. Typical products included clay and grain and these cars could be found in many areas of the country. Add this unique service to your railroad with these new cars!

FEATURES:

- ✧ Die-cast trucks
- ✧ Operating couplers with hidden tabs
- ✧ Easy conversion to scale couplers and wheelsets (available separately)
- ✧ Opening side doors
- ✧ 6 or 8' Youngstown or Superior Doors per prototype
- ✧ Separately applied details including non-operating roof hatches
- ✧ Length: 11 1/4"
- ✧ Minimum Curve: O36

100 Ton Hoppers 2-Packs

Common from the 1960s to the 1990s, these 100 ton hoppers formed the backbone of many railroad's coal hauling fleets. In small groups or unit trains, you'd be hard pressed not to see some of these on your favorite line. Made of die-cast construction and well detailed, these cars are back in the line and ready to go to work. Six different numbers are available in each road name so you can build your own unit trains.

FEATURES:

- Die-cast metal trucks w/ rotating bearing caps
- Operating couplers w/ hidden tabs
- Die-cast metal body and frame
- Removable one-piece coal load
- Separately applied details
- Length: 12 3/4"
- Minimum Curve: O31

PS-2 Hoppers

Commonly seen hauling cement, chemicals, potash, sand or other dense granular materials, no railroad should be without a fleet of covered hoppers. Compact and colorful, these cars will add interest to any freight train and are decorated in paint schemes common from the late 1950s to 1980s. Cars also feature metal frames and opening roof hatches.

FEATURES:

- \\ Die-cast metal trucks
- \\ Operating couplers with hidden tabs
- \\ Die-cast metal frame and ends
- \\ Easy conversion to scale couplers and wheels (not included)
- \\ Opening roof hatches
- \\ Separately applied details
- \\ Length: 10 1/4"
- \\ Minimum curve: O31

Bay Window Caboosees

This year's crop of cabooses features some terrific color schemes seldom seen on model railroads including safety specials for Chessie, Conrail and New York Central and the SP's railroad police cars! Fully detailed inside and out, these are the perfect end to any train.

FEATURES:

- Full-height or small bay windows per prototype
- LED Interior illumination and flashing rear end light
- Detailed interior with figure
- Die-cast trucks with rotating bearing caps
- Operating couplers with hidden tabs
- Easy conversion to scale wheels or couplers (not included)
- Separately applied details

O GAUGE

Lionel's line of Traditional O-Gauge products set the perfect tone for a beginner collector. Our Traditional O-Gauge products are made slightly smaller in size than our O Scale products, but run on the same 3 rail track system. This line is filled with an assortment of fun and imaginative products, from Disney to Angela Trotta Thomas and THE POLAR EXPRESS™, as well as LionChief® sets decked out in some of the most famous road names on the rails! Our extensive line of Traditional O-Gauge sets, rolling stock and accessories are a great fit for any layout, or even the perfect decorative touch for holidays!

LionChief® Our LionChief® system was designed to make running your train set so simple! LionChief® remotes have an easy to use throttle, with forward and reverse, and user-activated buttons for bell, whistle/horn and announcements. Our LionChief® Ready-to-Run sets include everything you need to get your train up and running!

LionChief® PLUS 2.0 A step-up from our traditional set locomotives, these locomotives include improved sounds, additional light and smoke features, speed control and the ability to be run via conventional transformer or TMCC Command Control in addition to Bluetooth.

Increase Your Model Railroad Empire In each of our LionChief® sets, we give you everything you need to get started, but why stop there? This catalog offers a large assortment of separate sale FasTrack®, rolling stock and accessories to your set and layout grow. Choose from a variety of Plug-Expand-Play accessories that connect to the Lock-on track piece in your set and help take your layout to the next level by adding animation and play-value!

Bluetooth® These engines have Bluetooth on board, allowing them to connect with a compatible smart device.

120 YEARS
LIONEL

LIONEL, LLC

Presenting the next generation of LionChief® Control, LionChief® Plus 2.0! Combining the best features of our LionChief® Plus locomotives with TMCC command control and additional sound and lighting enhancements, these new locomotives offer the value, simplicity and flexibility in operating modes you've been looking for. The ability to run via a Bluetooth® controller (Universal Remote or LionChief® App), Command Control cab or conventional transformer makes these locomotives perfect for any desired operating system. Enhanced sound and lighting features make these new LionChief® 2.0 models more realistic and fun than ever before! Take a look at the table to see all of the great features available and scan the pages ahead for the new locomotives and sets with this fantastic new innovation.

LIONCHIEF® PLUS 2.0 ENGINES DO NOT COME WITH THEIR OWN REMOTE.

LIONCHIEF® PLUS 2.0 ENGINES CAN LASH-UP WITH LEGACY® ENGINES WITH A LEGACY® CONTROLLER!

LionMaster AC-12 Cab Forward

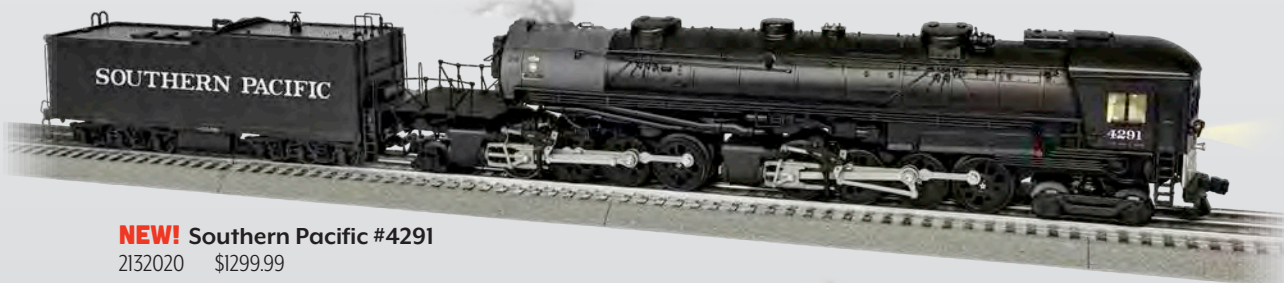

The final steam locomotives delivered to the Southern Pacific remain among their most famous. Adapted to provide cleaner air for the crew amid the many tunnels on the Espee's mountain route, the Cab Forward design was a uniquely Southern Pacific machine. Now these massive and popular locomotives are available in a size that captures all of their unique details but also accommodates curves as tight as O-31. The Southern Pacific Lines and Daylight paint schemes are not prototypical for the AC-12 class, but present a very cool "what-if" based on other SP designs.

FEATURES:

- ▼ Standard LionChief Plus 2.0 features on p. 62-63
- ▼ Dual motors
- ▼ Articulated frame
- ▼ ElectroCoupler on tender
- ▼ Length: 27"
- ▼ Minimum Curve: O31

The Best Toy Train Club on the Planet!™

Lionel Trains would like to honor The Lionel Collectors Club of America during their 50th Anniversary year and thank them for their passion and dedication to spreading the love of Lionel trains.

Model Railroading is not only an extraordinary hobby, but is a timeless way for grandparents, parents and children to bond and create unforgettable memories that last a lifetime. The LCCA has spent 50 years pouring their hearts into continuing this amazing hobby and we are so honored and thankful to have each and every member as a part of the Lionel Family.

HAPPY 50TH ANNIVERSARY!

The Lionel Team
