Intense emotions from a passionate land..

The characteristic hilly landscape of the Piedmontese Langhe.

Typical intensive vine monoculture of any land available in our area.

View of the City of Ceva, AnnerFactory's headquarter.

Some peaks of the Maritime Alps near Dronero in Cuneo's province.

AnnerFactory is based in the province of Cuneo, a land rich of great wines and exclusive products. It designs and processes both natural and synthetic materials, chasing precision with the most innovative technologies, making **model aircrafts** in different scales, **miniature houses**, **furnishing complements** and original sized **commercial exhibitors**, for a constantly evolving range of products, ready to manage both small and large productions with the same high quality level.

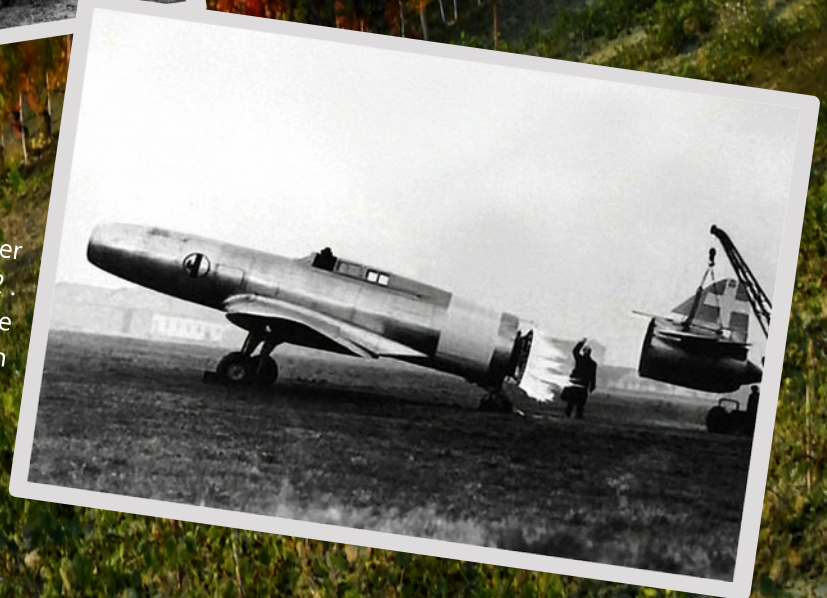

AnnerFactory tiene su sede en la Provincia de Cuneo, una tierra rica en excelentes vinos y productos exclusivos. Diseña y procesa tanto materiales naturales como sintéticos persiguiendo la precisión con la tecnologías mas innovadoras, fabricando **modelos de aviones** en diferentes escalas, **casas en miniatura**, **accesorios de mobiliario artístico** y **mostradores comerciales** de tamaño original, para una gama de productos en constante evolución, listos para administrar producciones pequeñas y grandes con el mismo nivel de alta calidad.

A bit of Aviation History inside the AnnerFactory's story.

This old picture shows Engineer **Carlo Cesareni**, our ancestor and co-founder of F.A.S.T. company in Turin, along with some Italian pilots. He was a pioneer of the aerospace industry. His brand equipped wheels, trolleys, gunnery rails, shock absorbers and safety brake systems of most of the Italian fighter aircrafts from the 20s to the 40s.

We can see Carlo Cesareni supervising the burner tests of the legendary Campini Caproni C.C. 2. This experimental, futuristic model, developed at the end of the 30s, was one of the first jet propulsion aircraft manufactured in the world, equipped with extremely advanced technical solutions such as the duralumin structure and the elliptical low wing.

EASY3D Series

4 models - curved balsa & plywood - Scale 1:48

Classic WW2 fighters with centinate fuselage to improving the level of details.

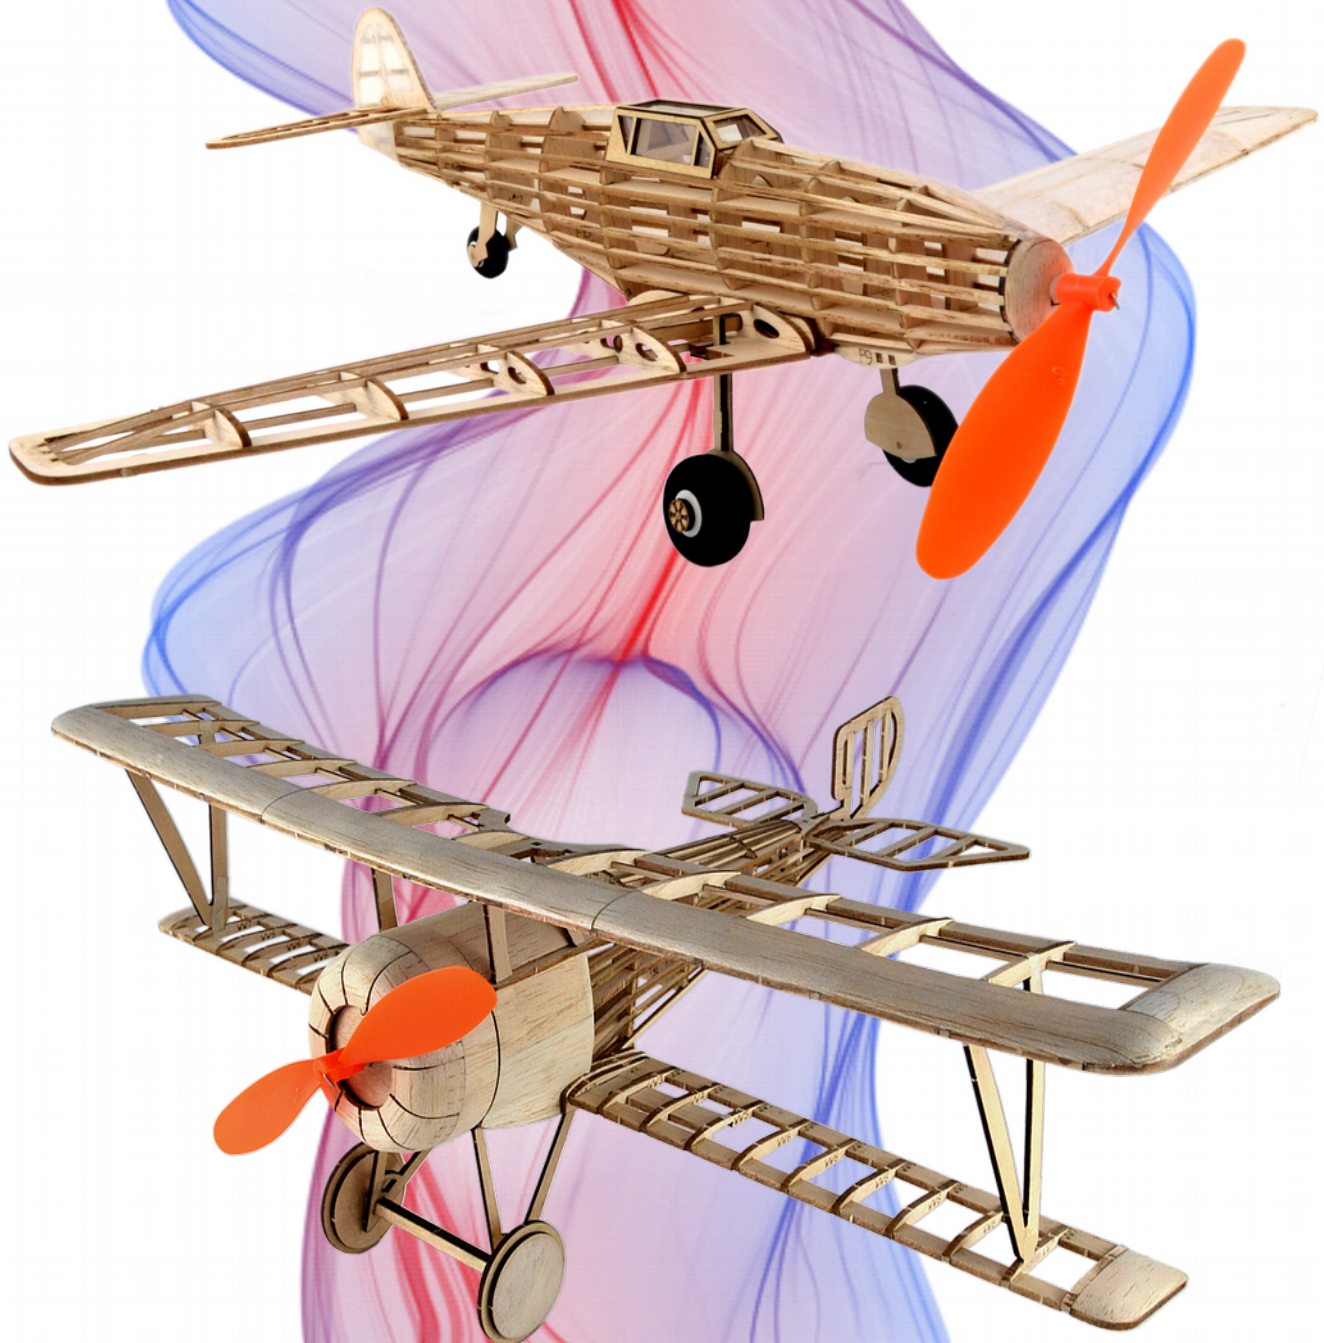

Wooden Aircraft Model Kit

LAB Series

Dedicated to enthusiasts - scale free & 1:24

High quality materials and extreme precision of pre-cut parts for complex commitment and meticulous construction results. Rubber powered.

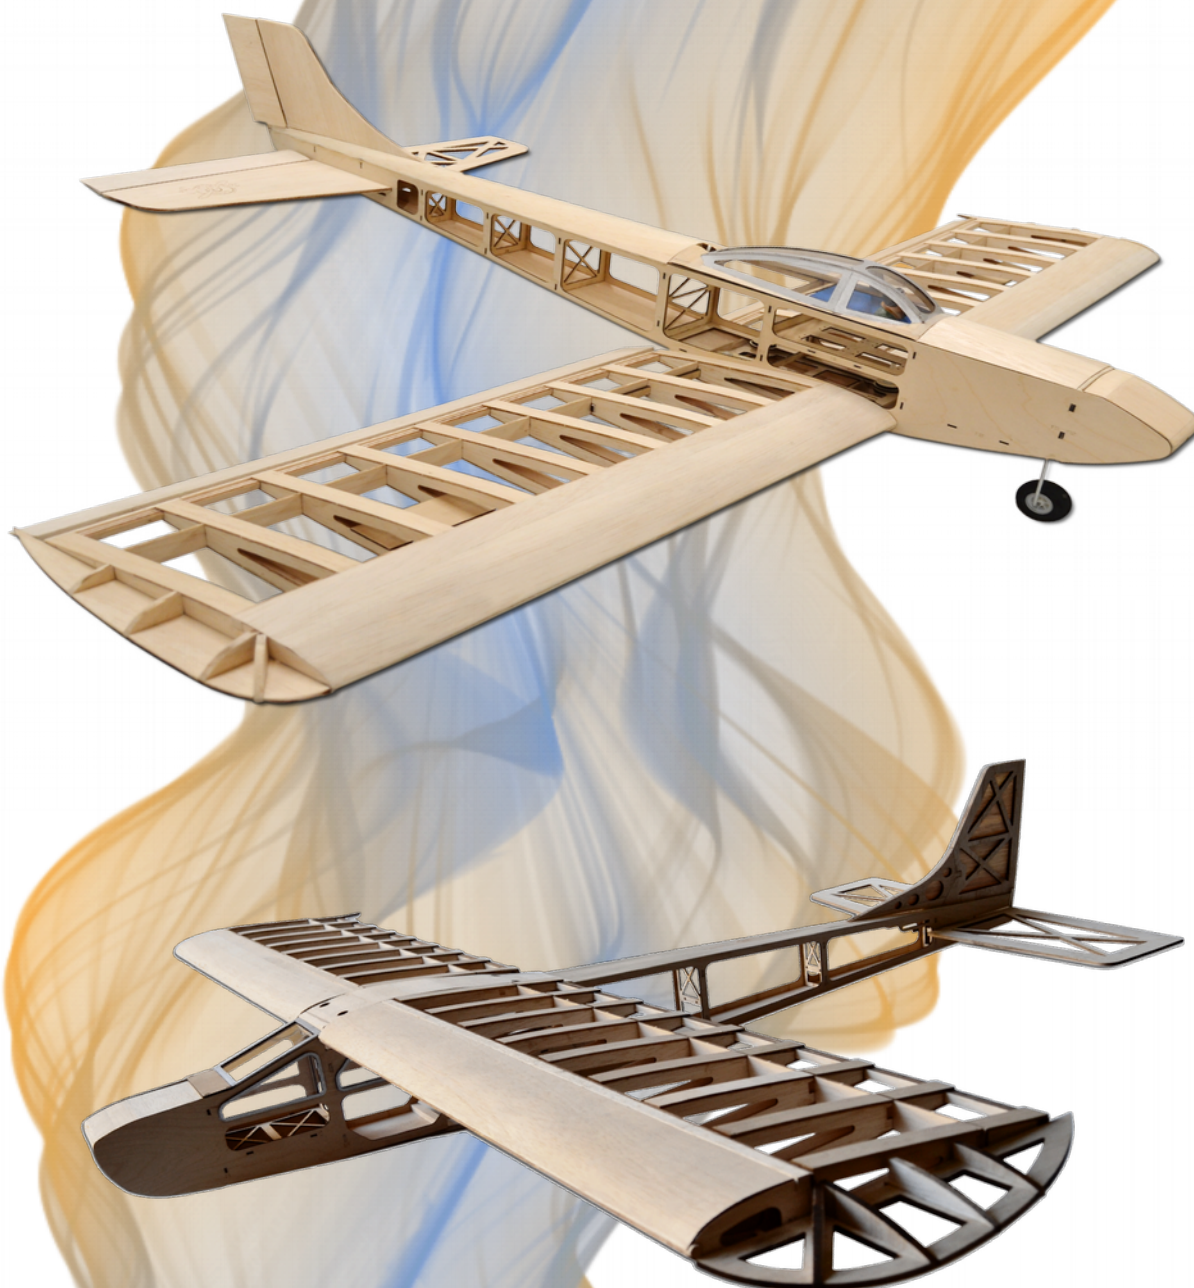

Wooden Aircraft Model Kit

PRO Series

skilled models - expertise is required - scale free

Aimed at those with experience and good competence in modeling.

Designed for all types of flight control and motorization devices.

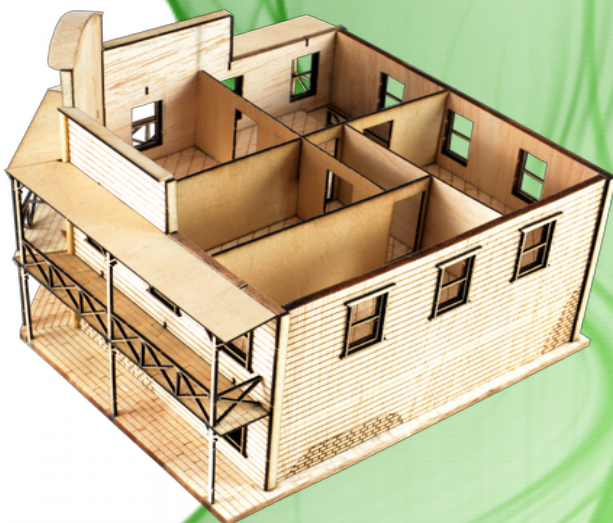

Wooden Miniature Houses

Old West Series

10 models - balsa & plywood - scale H0

Classic Old West miniature buildings collection, designed for faithful reconstructions of nineteenth-century western town settings.

Carefully designed: all interior rooms accessible to easily furnish.

Europa Series

4 starting models - balsa & plywood only - scale H0

This collection, set in a European setting, begins with a Breton context. Massive stone houses adapted to the rigors of the Atlantic climate are fully inspired by still existing buildings.

A skilled coloring work improves the final result and increases the likelihood with the original.

Wooden Promo Objects Series

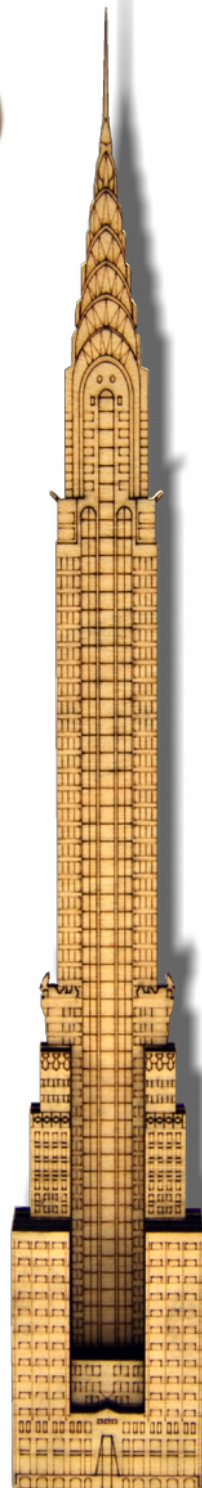

Animals, events promos, keyholders, commercial exhibitors, counter displays. Any shape, any size.
