# ORDERING INFORMATION & TERMS

February 2018

Dear Model Railroader,

Welcome to the February 2018 Atlas ASMC consumer edition of product Announcements and Arrivals.

All Atlas products are tooled prior to the announcement and offering of that product to the marketplace. In other words, Atlas researches and decides on a project, makes a significant commitment in product development resources and tooling dollars, and only then offers it to model railroaders.

Prior to the start of supplier production, Atlas announces to authorized dealers, distributors and e-subscribers that we are nearing final production. This notification comes in the form of Atlas' All Scales Monthly Catalog (ASMC) which focuses in on the current month's planned and specified announcements and allows consumers to place guaranteed pre-orders with their local hobby shop for those specific products by a given date. Please see page 4 of this ASMC for an in-depth explanation of the Atlas Guaranteed Pre-Order system. If you need assistance finding a dealer near you, don't forget our Hobby Store Locator! Check out the locator at <http://shop.atlasrr.com/storeLocator.aspx>. You can also view and reserve products via Atlas' online store [shop.atlasrr.com](http://shop.atlasrr.com).

Here at Atlas, we have an unwavering dedication to prototypical authenticity. Unless otherwise noted, every paint scheme that appears on a model we produce has been carefully researched and recreated to look exactly as it did on the prototype.

The ASMC is widely distributed and shared with thousands of dedicated Atlas consumer fans in accordance with their scale preference. This distribution is accomplished through targeted electronic messaging as well as via handouts at shows throughout the year. You can ensure that you receive the latest Atlas news and offers, in your preferred scale(s), delivered directly to your email inbox by visiting [www.atlasrr.com](http://www.atlasrr.com) and signing up for our email newsletter – the Atlas Insider.

We hope that you will "fall in love" with our latest announcements and arriving products! We're announcing brand new Modern Commuter Trains in N scale - featuring NJ TRANSIT ALP-45DP locomotives, cab cars and multilevel passenger trailers proving that great things do come in small packages. There are several different ways to purchase these models, from standalone releases to a set of locomotive and cars that will give you an instant consist in one fell swoop! BX 166 Box Cars are also new to HO and N scale this month. O scalers will delight in new paint schemes and new road numbers on returning favorites such as the 1937 Double Door Box Car and the Trainman Bay Window Caboose - you'll find all of those wonderful models and more inside, as well as arriving locomotives, rolling stock and track in all scales.

Sincerely,

Joe Kolnoski  
Vice President of Sales

**New Model**

NJ TRANSIT "100<sup>th</sup> ALP Edition"

NJ TRANSIT

**ALP-45DP FEATURES:**

- Designed from prototype drawings and field research with the cooperation of NJ TRANSIT
- Illuminated directional LED headlight/ditchlights and red marker lights
- Pantograph (non-functioning) can be positioned up or down
- Five pole skewed armature motor with dual flywheels for optimum performance at all speeds
- Factory-applied railings, air horn, and antenna details
- Grab irons packed separately for customer application (includes drilling template)
- Silver version DCC ready

**GOLD VERSION INCLUDES:**

- ESU LokSound decoder, supporting all DCC programming modes
- Flexible mapping of function keys F0 to F28
- A total of six DCC function outputs
- Follows all NMRA DCC standards and recommended practices

*With ESU Sound!*

# Atlas Presents the Modern Commuter Train in N Scale

---

What makes commuter operations unique in the world of railroading? Is it the daily interaction between railroads and the general public, or the ever-changing landscape of purpose-built rail equipment? Perhaps it is the visual aspect of the experience, with the sleek, modern locomotive and gleaming stainless steel passenger cars gliding effortlessly into station stops mere minutes apart.

Here at Atlas, we have always thrived on being able to replicate the most unique and outstanding features of the railroad industry in miniature. In pursuit of those qualities, we do not need to stray far from our home state of New Jersey, where NJ TRANSIT Rail Operations has remained at the forefront of commuter rail development for many decades. The NJ TRANSIT U34CH locomotives and Comet I coaches, developed simultaneously in 1970, marked the first time in American history that a locomotive and cars had been specifically designed to operate together as a commuter trainset. Forty-two years later, NJ TRANSIT repeated this winning combination with the development of the ALP-45DP locomotive and multi-level coaches. Like our highly acclaimed HO scale models, you will find our newly-tooled N scale ALP-45DP locomotive and multi-level coaches to be faithful reproductions of their 1:1 scale counterparts. We encourage you to see and experience for yourself the operation of these outstanding models, which represent the finest in today's model railroading quality and technology.

## ALP-45DP Locomotive-Prototype Information

The ALP-45DP is a "dual mode" locomotive, capable of drawing power from either overhead electrical wires or its own pair of 12-cylinder Caterpillar diesel engines. These flexible locomotives were designed to provide a one-seat commute from NJ TRANSIT's various diesel-only lines into the electrified territory that leads to New York City's Penn Station. This fulfills the requirement of not operating diesels through the North River Tunnels and within the subterranean Penn Station complex. Produced by Bombardier Transportation in Kassel, Germany, the first ALP-45DP locomotive entered service on NJ TRANSIT on May 30, 2012. NJ TRANSIT's 35 ALP-45DP locomotives are commonly seen on commuter trains traversing the Morristown Line, Montclair-Boonton Line, Raritan Valley Line, and North Jersey Coast Line. These lines do not have overhead electrical wires for their entire length, necessitating a change of power source somewhere en route. Previously, locomotives or entire trainsets would have to be changed, inconveniencing riders. The ALP-45DP alleviates this need, performing the switch from diesel to electric power (or vice versa) in just under two minutes during a routine station stop.

## Multi-Level Cab Car-Prototype Information

Concurrent with its purchase of ALP-45DP locomotives, NJ TRANSIT also purchased 62 multi-level cab cars from Bombardier Transportation. These cab cars are used on the opposite end of the train from the ALP-45DP locomotive to facilitate "push-pull" operations, where the engineer in the cab car can control the locomotive pushing from the other end of the train. A cab car provides an engineer with all of the same controls as a locomotive cab, allowing the train to reverse direction without turning around. Cab cars also include all standard locomotive safety features, such as a horn and bell.

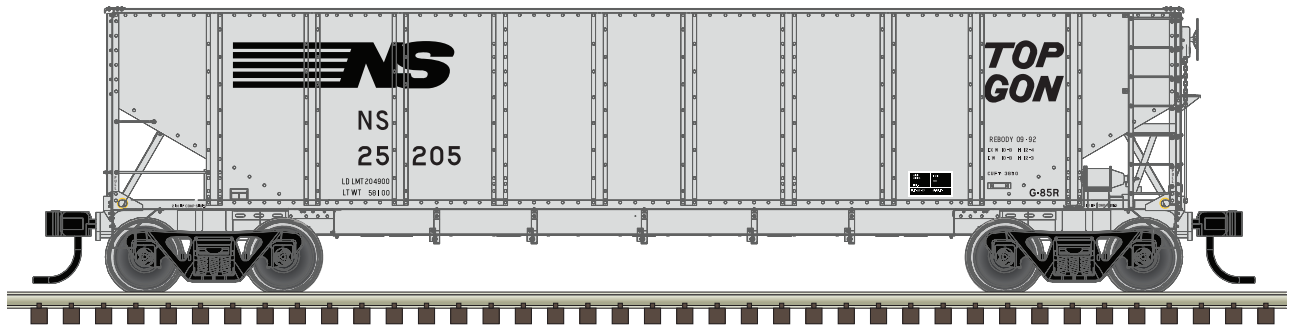

The multi-levels' fixed 2-2 seating arrangement provides ample legroom and maximizes passenger comfort while increasing capacity. All of NJ TRANSIT's cab cars also include toilets. NJ TRANSIT's multi-level cab cars have a capacity of 127 commuters (approximately 17% more than its single-level counterpart, the Comet V). These cars routinely operate over most routes on both the Hoboken and Newark Divisions of NJ TRANSIT, carrying more than 300,000 commuters daily to and from destinations all over New Jersey and into New York's busy Penn Station.

## Multi-Level Trailers-Prototype Information

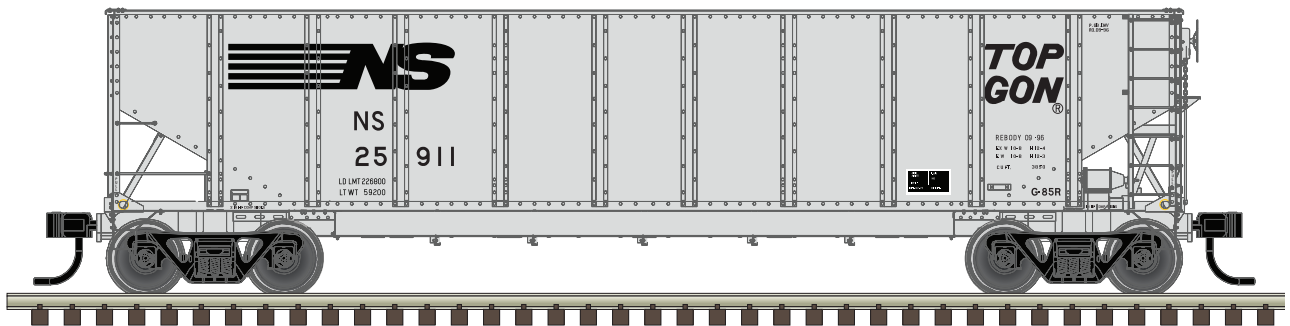

In addition to its multi-level cab cars, NJ TRANSIT operates an additional 367 multi-level trailer coaches without cabs. Ninety-nine of these cars include a toilet and have a passenger seating capacity of 132 commuters. The remaining 268 trailer cars do not have a toilet, and feature seating for 142 passengers. The multi-level trailer cars are always operated in matching sets (with a multi-level cab car on one end and a locomotive on the other), and these cars carry commuters over 2.2 billion milesevery year.

## ATLAS CLASSIC® HO RS-11 LOCOMOTIVE

Ordering: <https://shop.atlasrr.com/d-445-feb-2018-ho-scale-pre-orders.aspx>

### FEATURES:

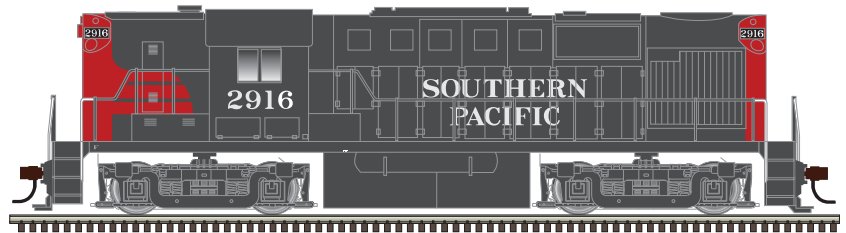

- DCC/Sound version available with LokSound decoder
- Golden-white LEDs
- Realistic die-cast mainframe
- Five-pole skewed armature motor with dual flywheels for optimum performance at all speeds
- Directional lighting
- Factory-equipped with AccuMate® knuckle couplers
- Separately-applied wire grab irons
- MU hoses and coupler cut bars
- Two painted crew members
- NMRA 8-pin plug and 21-pin connector for DCC

### Sound Features for Gold Series : (DCC Operation)

- Supports all DCC-programming modes
- Flexible mapping of function keys F0 to F28.
- A total of six DCC function outputs are available
- Follows all NMRA DCC standards and recommended practices.

### Analog (DC) Operation:

- The LokSound Select Dual-Mode decoder allows your Atlas Gold Series locomotive to be used on DC as well as on DCC layouts. Please note that the Atlas Quantum Engineer will NOT operate an Atlas Gold Series locomotive equipped with a LokSound Select decoder on an analog (DC) layout. However, the sound and lighting functions of the LokSound Select decoder in the Atlas Gold Series RS-11 locomotive can be controlled by an easy-to-use basic DCC system. Also note that on a DC-powered layout, a DCC and sound equipped locomotive (such as the Atlas Gold Series RS-11) CANNOT be consisted with another locomotive that does not also have both DCC and sound. (This statement does NOT apply to DCC-equipped locomotives operating on a DCC layout.)

Southern Pacific (Gray/Scarlet)

Missouri Pacific (Blue/Gray)

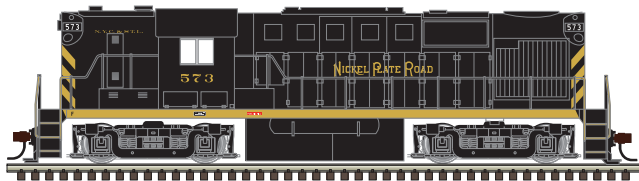

### Sound Functionality:

- Over 20 sound effects are available, including engine start-up and shutdown, prime mover sounds through all eight notches, bell, air horn, air compressor, dynamic brakes and more.
- There are 16 user-selectable horns, 2 user-selectable bells, and 2 user-selectable synchronized brake squeals.
- Manual and Automatic Notching modes with the ability to change modes "on the fly" are provided for true realism.

*AccuMate® couplers are made under license from AccuRail, Inc.*

## ATLAS TRAINMAN® HO GP38-2 LOCOMOTIVES

The Dash 2 locomotive series, unveiled by EMD in 1972, featured significant changes, such as a solid-state, modular electrical control system and improved engine components designed to increase traction and reduce exhaust emissions. A reliable work-horse, the GP38-2 remains one of the most successful locomotives ever built. Most are still in service today. These prototypically accurate, fun-to-run models are now available from Atlas at your local hobby shop!
