PRE-ORDER ANNOUNCEMENTS - SEPTEMBER 2019

GUARANTEED PRE-ORDER DUE DATE: WEDNESDAY OCTOBER 23RD 2019

ORDERING INFORMATION & TERMS

September 2019

Dear Model Railroader,

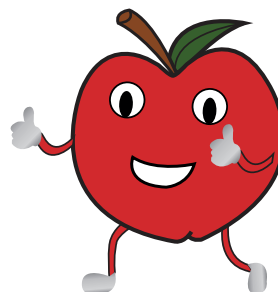

It's hard to believe that the months of summer have all but come and gone. Fall will soon arrive as shorter days and cooler temperatures usher in the busy model season. Many of you will be moving forward with plans to build or upgrade layouts and expand your locomotive and rolling stock rosters. The Atlas All Scales Catalog September 2019 Edition features the latest product announcements, arrivals, and limited in-stock offers that will assist you in fulfilling your model railroad needs in 'all scales'.

Atlas is offering a trainload of exciting products found throughout this catalog to meet your needs this coming fall and winter. The latest N scale locomotive model to join the Atlas fleet is the Master line GP39-2 Phase 2. This version comes complete with an ESU sound board on Gold models. An exciting spate of all new N scale rolling stock models available for pre-order includes the 53' Evans Double plug Door Box Car, 40' & 53' Rebuilt Well Cars. A SURPRISE second run of the highly sought after N Russell Snow Plow is arriving early in October with limited availability - **make sure to place your orders by 10/9** before they are SOLD OUT! A full complement of HO scale cars is here for the taking, including the U30C Locomotive, the ever popular 40' Wood Reefers and the Trainman 2 Bay Offset Hopper. We've been teasing the announcement of the HO scale 60' Gunderson TBOX for some time - and now the time has come! This model is ready for pre-order. Last, but certainly not least, O scale is represented by the Trainman PS-4750 Covered Hoppers and the popular O Turntable, which will be arriving shortly. Please see the 'Table of Contents' on the facing page for scale specific models, details, and feature/order page locations.

This catalog lists recently arrived products as well as product arrivals that are due in warehouses soon, or have just arrived. These include a healthy variety of locomotives and rolling stock and much desired Atlas track and accessories in all scales. Please note that MSRPs listed within this catalog are currently valid, however; due to rapidly changing international trade negotiations and policy, tariff adjustments may be necessary. Notification of pricing adjustments for identified Atlas products will be made public as soon as possible after government confirmation of tariff implementation.

Best regards & happy modeling,

Joe Kolnoski
Vice President of Sales

NEW MODEL!

NEW TOOLING!

BNSF

Burlington Northern

Santa Fe

PROTOTYPE INFORMATION:

The GP39-2 was offered by EMD as a fuel-efficient alternative to their very popular GP38-2 model. This efficiency resulted from the use of a turbocharged 12-cylinder 645E3 diesel engine, as opposed to the non-turbocharged 16-cylinder prime mover in the GP38-2. The use of a turbocharger increased the horsepower output from 2,000 to 2,300hp with four fewer cylinders. One other benefit of the turbocharger is improved operation at higher altitudes where thin air causes normally-aspirated diesels to lose power and produce excess smoke. The largest original fleet of GP39-2s was assembled by the Santa Fe who, over the course of seven years, acquired a total of 106 units.

Silver Sound Ready™

Atlas Silver Sound Ready models are equipped with a speaker for easy conversion to sound with the addition of a decoder. If you need assistance with the upgrade of a Sound Ready model, please contact Atlas Customer Service at 908-687-0880 or csdept@atlasrr.com

Silver Sound Ready™
Easy conversion to sound

ANALOG (DC) OPERATION FEATURES:

- Please note that the Atlas Quantum Engineer will NOT operate an Atlas Gold Series locomotive equipped with a LokSound Select decoder on an analog (DC) layout. However, the sound and lighting functions of the LokSound Select decoder in the Atlas Gold Series GP39-2 locomotive can be controlled by an easy-to-use basic DCC system
- Also note that on a DC-powered layout, a DCC and sound equipped locomotive (such as the Atlas Gold Series GP39-2) CANNOT be consisted with another locomotive that does not also have both DCC and sound. (This statement does NOT apply to DCC-equipped locomotives operating on a DCC layout.)

PRICES ARE SUBJECT TO A POTENTIAL PRICE INCREASE PENDING FUTURE TARIFF IMPLEMENTATION.

DCC Operation Features GOLD LOCOMOTIVES ONLY):

- Supports all DCC-programming modes
- DCC includes RailCom and RailComPlus, with 14, 28 or 128 speed steps and with 2-digit and 4-digit addressing.
- Flexible mapping of function keys F0 to F28.
- A total of 6 DCC function outputs are available, and all can be function mapped (disable, brightness, light effects) individually
- Follows all NMRA DCC standards and recommended practices.

ESU LokSound Features (GOLD LOCOMOTIVES ONLY):

- Over 20 sound effects are available, including engine start-up and shutdown, prime mover sounds through all eight notches, bell, air horn, air compressor, dynamic brakes and more.
- There are up to 16 user-selectable horns, 2 user-selectable bells, and 2 user-selectable synchronized brake squeals.
- Manual and Automatic Notching modes with the ability to change modes "on the fly" are provided for true realism.
- Equipped with ESU's Exclusive "Full Throttle" features for ultimate realism in prototype running.

PROTOTYPE INFORMATION:

In the 2000s intermodal containers came in a large variety of shapes and sizes. Common containers in that time ranged from 20', 28', 40', 45', 48' and 53'. This much variety was deemed inefficient by railroads and trucking companies alike in the early part of this decade. Today the most common containers are either 20', 40' and 53'. With the phasing out of the once popular 48' containers, TTX had little need for their 48' well cars. These cars were still rather new, most built in the mid to late 1990s. So instead of scrapping cars that were in serviceable condition, TTX opted to start a rebuilding program in which the 48' well cars were shortened to 40 and/or lengthened to 53.

MASTER MODEL FEATURES:

- Die-cast body
- Detailed brake lines
- Detailed air reservoir
- Separate hand grabs
- Etched metal walks
- Minimum radius: 12 1/2"

PRICES ARE SUBJECT TO A POTENTIAL PRICE INCREASE PENDING FUTURE TARIFF IMPLEMENTATION.

ARRIVING OCTOBER 2019**

PROTOTYPE INFORMATION:

The Russell Snow Plow is a critical piece of MOW equipment for Northern railroads that have to deal with harsh winter storms. The Russell Snow Plow is most often used for clearing large snow drifts and snow embankments along the railroad right of way. In the summer months Russell Snow Plows can typically be spotted in yards and service facilities alongside other MOW equipment. The Russell Snow Plows have been a mainstay of Northern railroading since the 1920s and they don't appear to be going anywhere soon.

MASTER MODEL FEATURES:

- Weighted, Detailed Underframe
- Crisply Molded Body Detail
- Knuckle Couplers
- Window Glazing

DASH 8-41CW PROTOTYPE INFORMATION:

The 4,135hp Dash 8-41CW was produced by General Electric between 1993 and 1994 for the Santa Fe and Union Pacific. 154 of these units were produced, which were nearly identical to the Dash 8-40CW. On the inside, the 16-cylinder prime mover was the same, but produced 135 more horse power than the 4,000hp Dash 8-40CW. The most distinguishing feature of this model was the introduction of GE's version of the wide-nose "North American Safety Cab." This style of cab would become a common sight on railroads across the country. Union Pacific 9448 was the only Dash 8 to receive the "Flag" scheme, wearing both red and eventually yellow frame striping.

42' COIL STEEL CAR PROTOTYPE INFORMATION:

The increased volume of coiled steel transportation gave rise to a new purpose-built freight car. Previously rolls of coiled-steel had generally traveled in specially equipped gondola cars. In the 1960's a lighter type of car emerged specifically for hauling coils of steel in an integral trough. The car type gained popularity and eventually over 17,000 cars were built. Atlas' model replicates a 42' design with a distinctive fishbelly side sill.

PROTOTYPE INFORMATION:

Built by General Electric between 1966 and 1976, the six-axle, 3000-h.p. U30C locomotive was General Electric's alternative to EMD's SD40 series. In that ten year time frame, GE built 600 U30C's for a wide variety of operators. The largest customer was the BN, with 180 units compared to the US DOT, which purchased a single locomotive for their Pueblo test facility. Detroit Edison and Kaiser Steel might have been the most unique operators to purchase the U30 (DE receiving 11 and Kaiser with 5). The Kaiser Steel U30's hauled ore trains from mine to mill in California's Eagle Mountain, while the Detroit Edison locomotives were assigned unit train duties from the coal fields in western Pennsylvania to DTE's generating station in Monroe, Michigan. By the late 80's, most U30C's had been retired, while a handful remained in operation for second hand operators.

Silver Sound Ready™

Atlas Silver Sound Ready models are equipped with a speaker for easy conversion to sound with the addition of a decoder. If you need assistance with the upgrade of a Sound Ready model, please contact Atlas Customer Service at 908-687-0880 or csdept@atlasrr.com

*CSX Licensed Product

Silver Sound Ready™
Easy conversion to sound

ANALOG (DC) OPERATION FEATURES:

- Please note that the Atlas Quantum Engineer will NOT operate an Atlas Gold Series locomotive equipped with a LokSound Select decoder on an analog (DC) layout. However, the sound and lighting functions of the LokSound Select decoder in the Atlas Gold Series U30C locomotive can be controlled by an easy-to-use basic DCC system
- Also note that on a DC-powered layout, a DCC and sound equipped locomotive (such as the Atlas Gold Series U30C) CANNOT be consisted with another locomotive that does not also have both DCC and sound. (This statement does NOT apply to DCC-equipped locomotives operating on a DCC layout.)

PRICES ARE SUBJECT TO A POTENTIAL PRICE INCREASE PENDING FUTURE TARIFF IMPLEMENTATION.

PROTOTYPE INFORMATION:

In 2012, BNSF acquired close to 600 Gunderson 7538 High Capacity box cars. Four years later, TTX Corporation placed orders for a similar 7550 box car. At this time, they have over 4,000 cars in their fleet with more cars ordered. With a gross rail load capacity of 286,000, these cars can carry a wide variety of products such as paper and bulk items. While they look similar in appearance, the 7550 and 7538 have a few unique differences. The 7550 features "grid sides" and double plug doors. The 7538 has a single plug door and a unique door step, just below the left side of the door opening. With both companies operating large fleets, these cars are sure to be seen in large manifests, short lines and on sidings throughout North America.

PROTOTYPE INFORMATION:

This highly detailed model is based on the 40' wood refrigerator cars built by Pullman for the Northern Refrigerator Car Co. in 1930. With its rooftop ice hatches, USRA-style fish belly underframe and vertical brake shaft, its representative of the thousands of similar cars that were built during the "Billboard" era of American railroads.

MASTER MODEL FEATURES:

- Separate door bars, grab irons, ladders and cut bars
- Two different styles of roof hatch (where appropriate)
- Fully detailed underbody
- Accurate painting and lettering

3 Packs Have Different Road Numbers

PROTOTYPE INFORMATION:

Jindo Manufacturing of Korea, already a producer of maritime ISO containers, began producing steel corrugated containers for domestic use in the USA during the 1990s. In 2004, Jindo introduced an improved 53' container with an inside height of 110". The new interior height was intended to narrow the cubic foot competition with highway trailers at the time.

The differences between the Jindo 53' 110" IH and Jindo's previous 53' container can be seen in the tunnel height under the front wall and the lower side rail extensions. The 53' 110" IH container has been produced in far larger quantities than its non-110" predecessor.

MASTER MODEL FEATURES:

- Side corrugations with an 8-55-8 arrangement
- Front wall with 10 vertical corrugations
- Roof with 6-54-6 corrugations
- 1-3-1 beveled doors
- Placard Holders on front wall, sides and door
- Crisp, accurate lettering and painting

PRICES ARE SUBJECT TO A POTENTIAL PRICE INCREASE PENDING FUTURE TARIFF IMPLEMENTATION.

PROTOTYPE INFORMATION:

Atlas' version of the 2-Bay Offset Side Hopper with Flat ends is modeled after the open hoppers that were built in the 1930s and the 1940s to transport coal.

MASTER MODEL FEATURES:

- Ready-to-run
- Blackened metal wheels
- Free-rolling 50-ton trucks
- Detailed brake gear
- Body mounted AccuMate® knuckle couplers
- Prototypical painting and lettering

AccuMate® couplers are made under license from AccuRail, Inc.

DASH 8-41 CW PROTOTYPE INFORMATION:

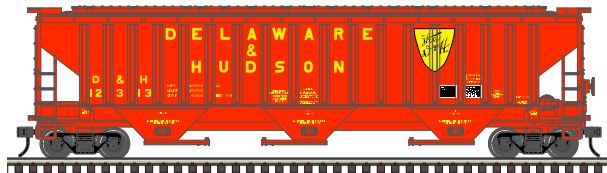

The 4,135hp Dash 8-41CW was produced by General Electric between 1993 and 1994 for the Santa Fe and Union Pacific. 154 of these units were produced, which were nearly identical to the Dash 8-40CW. On the inside, the 16-cylinder prime mover was the same, but produced 135 more horse power than the 4,000hp Dash 8-40CW. The most distinguishing feature of this model was the introduction of GE's version of the wide-nose "North American Safety Cab." This style of cab would become a common sight on railroads across the country. Union Pacific 9448 was the only Dash 8 to receive the "Flag" scheme, wearing both red and eventually yellow frame striping.

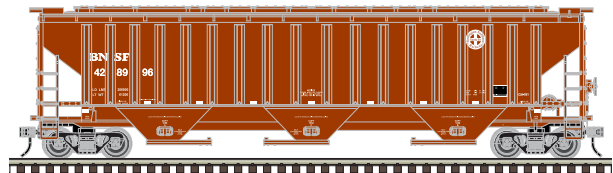

ATLAS TRAINMAN® O PS-4750 COVERED HOPPER

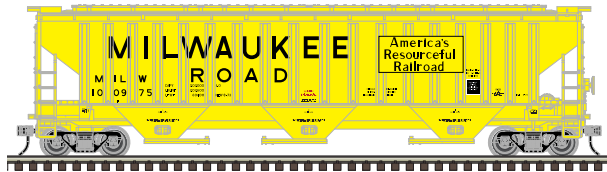

Ordering: <https://shop.atlasrr.com/p-53322-o-scale-turntable.aspx>

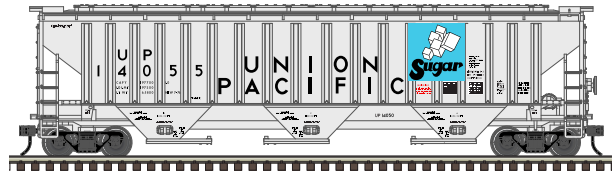

Delaware & Hudson

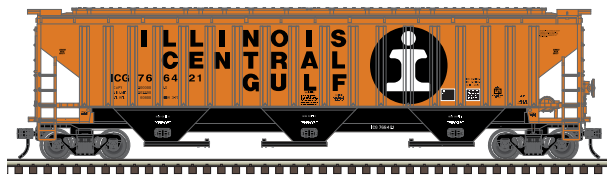

BNSF

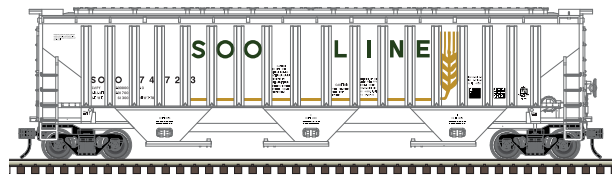

Milwaukee

Union Pacific

Illinois Central Gulf

Soo Line

MASTER MODEL FEATURES:

- Accurate and colorful painting and lettering
- True scale dimensions with accurate details
- Separately-applied roof walk, brake wheel and other details
- Unique body design with "step-curve" roof
- Die-cast 100 ton roller bearing trucks with rotating bearing caps
- Die-cast articulated couplers (3-rail)
- Weighted to NMRA standards

- 2-rail cars feature scale 36" wheel sets and new-design Kadee-compatible scale couplers
- 3-rail trucks are pre-drilled for the patented Atlas O Adjust-A-Coupler system which allows you to easily add truck mounted scale couplers
- Minimum diameter curve: 0-36 (3-rail)
- Minimum radius curve: 36" (2-rail)
- Length over couplers: 15"
- Height: 3.60"

Two road numbers available per road name.

PROTOTYPE INFORMATION:

Pullman Standard's 4750 cubic foot covered hopper was one of the most successful freight car designs in that company's history. Over 54,000 of these cars were produced during the latter part of the 1970s and early 1980s. It was the premier grain hauler of the era and is still in use.

Found throughout the country on virtually all of the class 1 rail lines, it is also one of the most leased cars through the Transport Leasing Division of Pullman. The cars were painted a virtual rainbow of colors.

PRICES ARE SUBJECT TO A POTENTIAL PRICE INCREASE PENDING FUTURE TARIFF IMPLEMENTATION.

PRE-ORDER ANNOUNCEMENTS - SEPTEMBER 2019

AVAILABLE OCTOBER 2019

ATLAS O TURNTABLE

Ordering: <https://shop.atlasrr.com/d-559-sept-2019-o-scale-pre-orders.aspx>

NEW & IMPROVED

In the steam era, many railroads used turntables to turn locomotives for their next journey. Railroads still use turntables to assist in the maintenance of diesel locos and rolling stock. Based on a Santa Fe prototype, Atlas O has realistically duplicated its above ground details, and improved features & functionality so that adding a working turntable has never been simpler. What's more, everything is included for easy tabletop installation.

FEATURES:

- New - larger and more powerful motor
- New - flat cogged anti-slip belt
- New - deck support with more roller bearings for greater support of heavier locomotives
- New - redesigned metal contacts to power the rotating track
- Drive assembly is hidden under the utility shed
- Table diameter: 24"
- Proven Geneva-gearing for positive indexing
- Can be used for both 3 rail and 2 rail operation
- Will run on AC or DC power
- Compatible with TMCC and DCS (using TMCC or DCS accessory interface)
- Molded in appropriate colors
- Complete hook-up instructions
- Easy tabletop installation
- Motor Drive included in box for smooth and easy operation
