AMTRAK® ACELA® II TRAIN SET

Item No. 01206 • Suggested price: \$799.00
SHIPPING 2023

Spectrum®

Launched in 1999, the Amtrak® Acela® made history as the first high-speed train service in North America, running between Washington D.C., New York City, and Boston at speeds upwards of 150MPH. Now, just over 20 years later, the Acela® service continues to push the envelope for speed and modernity in the Northeast with the introduction of a new generation of hi-tech trains from Alstom. Based on the latest in high-speed technology, the new Acela® will provide a substantial increase in both the speed and capacity on this popular intercity route. The Bachmann Amtrak® Acela® II Train Set features two locomotives (one powered, one non-powered), ready-to-run with analog control and speaker-equipped for upgrading to sound and DCC, a First Class passenger car, Cafe Car, and a Business Class passenger car. Also included is an 81" x 45" oval of snap-fit nickel silver E-Z Track® with concrete ties, power pack and speed controller, and illustrated instructions.

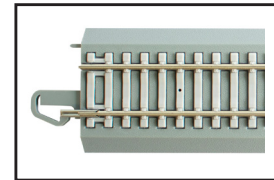

Locomotive features include:

- powered sound- and DCC-ready locomotive
- non-powered locomotive with functioning lights
- die-cast chassis
- precision motor
- working directional LED headlights and marker lights
- operating ditch lights and number board lights
- selector switch for choice between rail and pantograph operation

Coach features include:

- fully furnished interiors
- LED interior lighting
- die-cast chassis
- prototypical details per car
- articulated coupling system

**SIEMENS ACS-64 ELECTRIC LOCOMOTIVE
(DCC WOWSOUND® EQUIPPED)**

Performs best on 22" radius curves or greater.

Suggested price: \$459.00 each
SHIPPING LATE 2022

Built to modernize "America's Railroad®," the Amtrak® Cities Sprinters have state-of-the-art features such as regenerative braking that can feed energy back into the power grid. The latest generation of electrics for the Northeast Corridor, the ACS-64 can reach speeds upwards of 125 mph. Two new paint scheme additions are joining this popular line in late 2022, including series leader #600 which bears the name "David L. Gunn" in tribute to Amtrak's former president, and locomotive #662, which was wrapped in a special "Phase III" heritage scheme to promote the video game *Train Sim World® 2* while also celebrating Amtrak's 50th anniversary.

Features include:

- DCC equipped for sound, speed, direction, and lighting control
- TCS true CD-quality audio in 16-bit 44,100Hz sound
- Keep-Alive® device that keeps your engine running during power interruptions due to dirty track or loss of electrical contact
- voice-guided Audio Assist® programming tool for easy setup of almost all decoder functionality
- dual-mode NMRA-compliant decoder
- fully remappable light functions that include flashing ditch lights, reverse direction marker lights, and directional headlights with Rule 17 dimming
- die-cast frame
- selector switch for choice between rail and pantograph operation
- magnetically operated E-Z Mate® Mark II couplers

EMD BL2 DIESEL LOCOMOTIVE (DCC EQUIPPED)

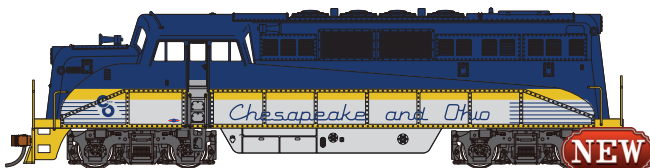

Price to be announced
SHIPPING 2023

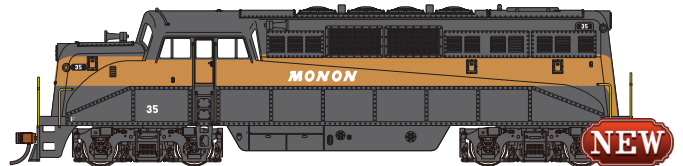

Standing for "Branch Line Locomotive" the BL2 was EMD's first foray into lighter-duty switching power, with production commencing in 1947. Designed for improved visibility for the engineer during operation, the locomotive was one of the earliest diesels to feature a wide cab and a narrow long hood, allowing for a clearer view when operating reverse movements. With styling cues taken from the streamliners of its time, the BL2 has remained popular with railfans throughout the years. Originally utilized for both freight and passenger duties on secondary lines, examples can still be found in service today, handling excursions and short-line freight runs. The Bachmann BL2 arrives with DCC on Board, featuring new and existing tooling, authentic paint schemes, and directional LED headlights.

Features include:

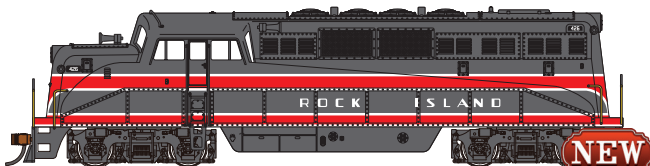

- new and existing tooling
- highly detailed painted bodies with precision graphics
- dual-mode NMRA-compliant DCC decoder
- directional headlights with Rule 17 dimming
- magnetically operated E-Z Mate® Mark II couplers
- blackened machined metal wheels with RP25 contours

SIEMENS VENTURE PASSENGER CARS with LIGHTED INTERIORS

Price to be announced
SHIPPING 2023

The Siemens *Venture* series is the next generation of medium-distance passenger railcars for North America. Constructed by Siemens Mobility in California, the *Venture* cars currently see use on Amtrak® state-supported services in the midwest and California, while VIA Rail Canada™ has introduced the series on corridor services in eastern Canada. The Bachmann *Venture* Cars have been developed in collaboration with Siemens, using original design documentation to ensure prototypical accuracy. Features include fully furnished, lighted interiors, authentic road-specific details, and *E-Z Mate*® knuckle couplers. Coach, Business, and VIA Rail Canada™ Cab Car configurations are available in this release.

Features include:

- all-new tooling
- highly detailed painted bodies with precision graphics
- fully furnished and lighted interiors
- road-specific exterior configurations
- dual mode DCC-operated horn, bell, and brake sounds, as well as headlight, ditch light, and marker light functionality on the cab car
- magnetically operated *E-Z Mate*® Mark II couplers
- blackened machined metal wheels with RP25 contours

CHEMICAL TANK CAR

Suggested price: \$49.00 each
SHIPPING 2023

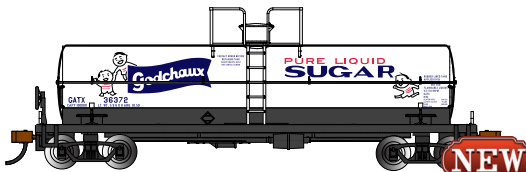

In addition to carrying essential liquids such as water, oil, and gasoline, tank cars also provide a safe and efficient means of transportation for hauling industrial chemicals. Due to the potentially volatile and sometimes corrosive nature of certain chemicals, these tank cars were designed to feature tougher construction and a specialized dome to provide greater protection for both the contents of the cars and those handling them. The Bachmann Chemical Tank Car incorporates new and existing tooling to replicate these cars in HO scale and includes detail differences per prototype, authentic road names, *E-Z Mate*® couplers, and blackened, machined metal wheels.

Features include:

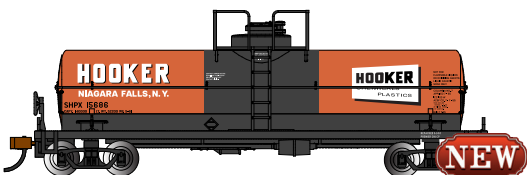

- new and existing tooling
- highly detailed painted bodies with precision graphics
- small or large dome style per prototype
- magnetically operated *E-Z Mate*® Mark II couplers
- blackened machined metal wheels with RP25 contours

TRANSFER CABOOSE

Price to be announced
SHIPPING 2023

The Transfer Caboose was developed in the late 20th century to provide more room for crew members to ride externally during switch movements. Often constructed using existing components railroads had on hand, such as boxcar frames, Transfer Caboose were utilitarian in design. Despite the caboose being largely displaced in most settings today, Transfer Caboose continue to play an important role on freight jobs that require long "reverse-direction" moves, where there is no opportunity for the locomotive to reposition to lead the train at the end of the line. The Transfer Caboose provides a safe and roomy area for the conductor to stand and watch for hazards at the front of the train while communicating with the engineer in the locomotive pushing from the opposite end. The Bachmann Transfer Caboose comes ready-to-run with four authentic paint schemes reflecting both early and late operators, E-Z Mate® knuckle couplers, and blackened, machined metal wheels.

Features include:

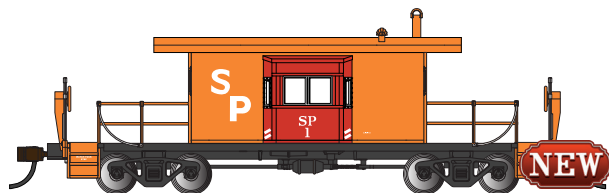

- new and existing tooling
- highly detailed painted bodies with precision graphics
- magnetically operated E-Z Mate® Mark II couplers
- blackened machined metal wheels with RP25 contours

NARROW GAUGE FLETCHER, JENNINGS & CO. 0-4-2ST TALYLLYN LOCOMOTIVE

Runs on N Scale track; equipped with international-style hook-and-loop couplers

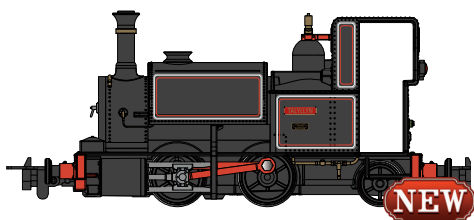

Suggested price: \$179.00 each
SHIPPING 2023

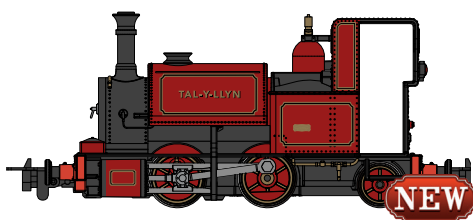

Opened in 1866, the 2'3" gauge Talylyn Railway was the first narrow gauge line in the UK to operate steam-powered locomotives from the start, with predecessors having their origins in the horse-drawn wagon era. Construction of the 0-4-2ST "Talylyn" locomotive preceded its namesake railway by two years, and the engine has spent its entire working life on the line. Initially designed for hauling slate, and later revenue passenger service, the Talylyn locomotive today hauls tourists along its 7.25-mile railway, now recognized as one of the UK's premier narrow gauge heritage lines. The Bachmann Talylyn locomotive comes available in three prototypical paint variations, reflecting the strikingly different schemes worn over the course of its life. Scaled to HO/OO dimensions, the Talylyn will operate on standard N Scale or HOn30/OO9 narrow gauge track, and features die-cast metal construction with operating metal drivers.

Features include:

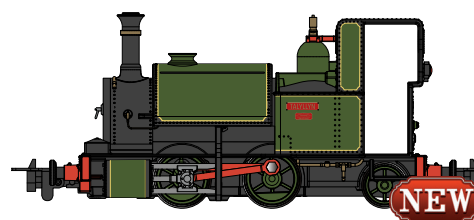

- die-cast metal construction
- highly detailed painted body with precision graphics
- international-style hook-and-loop couplers
- blackened machined metal wheels with metal drivers

HO SCALE PLASTICVILLE® U.S.A. 75TH ANNIVERSARY COMMEMORATIVE KITS

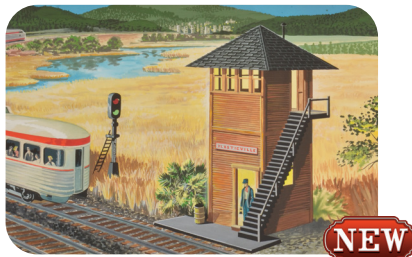

2022 marks 75 years since Bachmann paved the way in providing injection molded plastic scenery items for model railroaders with Plasticville® U.S.A. buildings and kits. From stores and homes to farms and railroad structures, the no-stress, easy-to-assemble designs have endured in popularity, and our line continues to incorporate many of the same nostalgic items that your parents or grandparents may have assembled. In celebration of 75 years, we're releasing a limited line of some of our most popular items based on their appearance in original product illustrations, complete with collectible 75th-anniversary packaging.

**SIEMENS ALC-42 DIESEL LOCOMOTIVE
(TCS WOWSOUND® DCC EQUIPPED)**

Suggested price: \$459.00 each
SHIPPING LATE 2022

The future of long-distance passenger railroading is heading to N Scale. Based on the highly successful medium-distance SC-44 Charger, the ALC-42 displays a range of new features for cross-country service on America's most scenic and storied routes, including a unique nose design and cab door configuration. Bachmann's ALC-42 Charger has been developed in collaboration with Siemens Mobility, using original design documentation and prototype field recordings for maximum realism. Features include a TCS WOWSound® CD-quality 16-bit 44,100Hz decoder with Audio Assist® for easy configuration without CVs, and a Keep-Alive® device for uninterrupted operation, even over dirty track. The WOWSound® diesel-electric locomotive package includes an authentic horn, bell, prime mover, startup/shutdown, compressor, cooling fan, coupler close/release, brake release/application, crew alert, grade crossing quill, station announcements, and more.

Features include:

- Siemens-approved design
- DCC sound-equipped for sound, speed, direction, and lighting control
- true CD-quality audio in 16-bit 44,100Hz sound
- Keep-Alive® device that keeps your engine running during power interruptions due to dirty track or loss of electrical contact
- voice-guided Audio Assist® programming tool for easy set-up of almost all decoder functionality
- dual-mode NMRA-compliant decoder
- directional headlights and marker lights
- interior corridor work lights
- steady/alternate flashing ditch lights
- die-cast frame with separately applied windshield wipers, grab irons and detail parts
- E-Z Mate® Mark II couplers

EMD SD40-2 (DCC ECONAMI™ SOUND VALUE EQUIPPED)

Price to be announced
SHIPPING 2023

Constructed from 1972 to 1989, the SD40-2 was by far the most successful of EMD's "Dash 2" series of road switchers. More than 4000 were produced, mostly for use within North America, although they have also seen use in Australia, South America, and elsewhere internationally. Their ability to handle both road freight and local switching operations ensures that they remain an essential locomotive for most major freight railroads to this day. The Bachmann SD40-2 returns to our N scale line with all-new tooling, DCC Econami™ Sound Value On Board, and a range of authentic paint schemes for the modern era.

Features include:

- DCC sound-equipped with Econami™ Sound Value package
- dual-mode NMRA-compliant decoder
- directional headlights with Rule 17 dimming
- precision motor
- flywheel
- die-cast frame
- separately applied detail parts
- E-Z Mate® Mark II couplers

STOCK CAR

Price to be announced
SHIPPING 2023

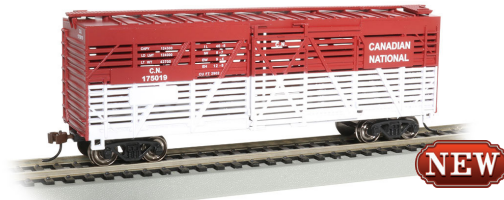

Stock Cars, also referred to as Cattle Cars, are a type of rolling stock used to transport livestock and larger animals between farms and other destinations. They were a common sight on railroads across North America from the late 1800s right up until the mid-1950s when trucking became more economical. The Bachmann Stock Car rekindles the heyday of these fascinating railcars with a selection of attractive and authentic paint schemes.

Features include:

- highly detailed painted bodies with precision graphics
- magnetically operated, body-mounted E-Z Mate® Mark II couplers
- blackened machined metal wheels with RP25 contours

52'6" DROP-END GONDOLA

Price to be announced
SHIPPING 2023

First appearing in the 1920s, the Drop-End Gondola allowed for increased loading flexibility. The ends of the car would fold inwards, allowing loads that were longer than the length of the car to be carried, such as pipes or rails. The Bachmann 52'6" Drop-End Gondola comes in a variety of authentic paint schemes. Each car arrives fully assembled, featuring a highly detailed painted body with posable drop-end gates for realistic operation, blackened machined metal wheels with RP25 contours, magnetically operated E-Z Mate® couplers, and added weight for optimum tracking performance.

Features include:

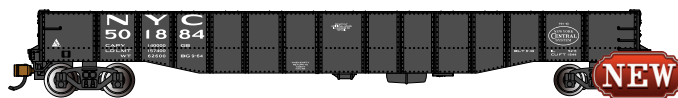

- highly detailed painted bodies with precision graphics
- posable drop-end gates
- magnetically operated E-Z Mate® Mark II couplers
- blackened machined metal wheels with RP25 contours

BALDWIN OUTSIDE FRAME 2-8-0 CONSOLIDATION with METAL GEARS (SOUNDTRAXX™ TSUNAMI2™ DCC SOUND EQUIPPED)

Price to be announced
SHIPPING 2023

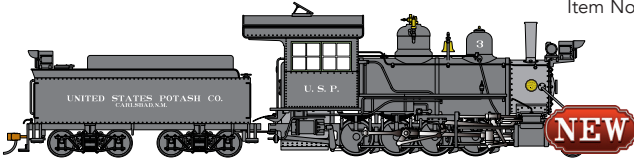

Manufactured in the early 20th century, this versatile 2-8-0 was used both domestically and internationally in freight, industrial, and passenger service. Today, a number continue to operate through breathtaking scenery in excursion service. Newly reintroduced, our Baldwin Outside Frame 2-8-0 arrives with prototypical details replicating oil-burning examples found in the United States. An additional undecorated example, which will include interchangeable details to suit most domestic or international configurations, is also available. All examples feature SoundTraxx™ Tsunami2™ DCC, with multiple programmable choices for exhaust chuff, whistles, bells, and a wide range of additional steam locomotive sound effects.

Features include:

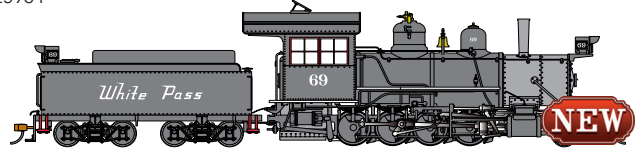

- DCC equipped for sound, speed, direction, and lighting control
- dual-mode NMRA-compliant decoder
- die-cast chassis, boiler, and tender frame
- operating metal drivers with prototypical outside frame design
- metal gears
- see-through clearance under boiler
- operating LED headlight
- separately applied detail parts
- magnetically operated body-mounted E-Z Mate® Mark II couplers

EMD GP40 (1:29 SCALE)

Price to be announced
SHIPPING 2023

The GP40 is one of EMD's most successful 4-axle road switchers. Initially entering service in 1971, production lasted through 1986 when, after construction of almost 3000 units, the final GP40-2 was rolled off the production line. Today, the GP40 series continues to remain crucial to the switching and branch line needs of class one railroads, in addition to short lines and industrial operators. The Bachmann Large Scale GP40 arrives in 1:29 scale with realistic detail, a non-proprietary plug-and-play circuit board for the control system of your choice, and four authentic modern-era paint schemes

Features include:

- advanced non-proprietary plug-and-play circuit board to accommodate the control system of your choice, including conventional DC power, NMRA/NEM DCC, and/or RC operation
- one motor per truck with low amperage draw
- operating diesel smoke unit
- white LED directional headlights, front and rear
- lighted front number boards
- interior cab lighting and interior cab details

- solid-metal railings and lift rings
- opening side windows
- windshield wipers, see-through steps, and MU hose detailing
- operating AAR knuckle couplers
- factory-installed speaker with wire pigtail to allow easy installation of optional aftermarket sound

Features subject to change before release

E-Z COMMAND® PLUS DCC CONTROLLER

Item No. 44933 • Suggested price: \$259.00
SHIPPING LATE 2022

Bachmann Trains is pleased to announce the next generation of the E-Z Command® DCC control system; E-Z Command® Plus. With E-Z Command®, digital control of speed, lighting, sound, and direction of multiple locomotives is at your fingertips, as well as remote control of Bachmann E-Z Command® DCC-equipped turnouts. E-Z Command® simplifies the programming process for locomotives with one-button, on-track programming and now features the ability to control up to 29 decoder functions per locomotive. Additional features of the E-Z Command® Plus system include 128-speed steps for smooth operation and plug-in wiring for simple setup, single-locomotive emergency stop in addition to full-track emergency stop, an LED lighted speed indicator, and new LED push-button controls. E-Z Command® will operate all DCC-equipped Bachmann locomotives as well as NMRA-compliant DCC locomotives from other manufacturers.

Features include:

- digital control of multiple locomotives in N, HO, and On30 Scale (E-Z Command® 5 Amp Power Booster, Item No. 44910, required for O and Large Scale operation)
- digitally control speed, direction, lighting, and sound
- on-track programming
- 128 speed-step locomotive control
- LED speed indicator display
- both individual locomotive and full-track emergency stop buttons
- up to 29 control functions
- Bachmann E-Z Command® DCC-equipped turnout control
- wall pack power supply
- plug-in wiring
