190069

Promotional set »Carriage hall with accessories«

In the engine depot. Three-piece set comprised of a three-stall repair hall with red brick masonry, movable gates and possible through-traffic, a stationary gantry crane, and two spindle floor jacks allowing the servicing and maintenance of rail vehicles.

Epoch I - Carriage hall: 400 x 224 x 130 mm, Gantry crane: 130 x 56 x 106 mm, Spindle lifting jacks: 88 x 20 x 40 mm (2 x), Clearance Gantry crane: 70 mm - 09/19

Promotional sets H0 2019

The best autumnal snips! Punctually at the start of the scale modelling season new, unparalleled limited promotional sets are launched every year. These are exciting thematic assortments of matching models in proven FALLER quality, at an absolutely sensational price.

190072

Promotional set »Bruderstadt Station«

Ideal for newcomers and pros. Three-piece station set, comprised of a station building with waiting room, a covered platform between lines, and a kiosk with benches which offers travellers some snacks and newspapers.

Epoch I • Railway station: 255 x 135 x 150 mm, Platform: 358 x 55 x 62 mm, Kiosk: 80 x 80 x 47 mm • 09/19

190070

Promotional set »Small funfair«

Low-cost start into the world of funfairs! Funfair set comprised of a children roundabout with various vehicles, animals and figures, an inflatable bouncy castle, a sweet booth, a shooting gallery, a toilet carriage, and barrier fences. The roundabout can be driven by the synchronous modeller's motor, Art. 180629 (not supplied).

Epoch IV •

Merry-go-round: Ø 125 x 115 mm,
Shooting gallery: 96 x 32 x 67 mm,
Candy booth: 96 x 32 x 77 mm,
Bouncy castle: 84 x 76 x 63 mm,
Toilet wagon: 90 x 43 x 53 mm • 10/19

6

190071

Promotional set »Black Forest village«

Made in Black Forest. Set of buildings typical of the region, containing a Black Forest house with shingle facade, an idyllic Black Forest mill with waterwheel in which ramblers can have a light meal, an impressive Black Forest farmhouse, a small bakehouse, and two fountains with cooling huts.

Epoch I - Black Forest farmyard: 146 x 126 x 99 mm, Black Forest mill: 145 x 120 x 80 mm, Black Forest house: 125 x 125 x 87 mm, Bakehouse: 70 x 57 x 44 mm, Fountain: 41 x 21 x 23 mm - 10/19

What a landscape!

The central topics of that most detailed set is the traditional architectural culture in the Black Forest. Embedded in vast mountain meadows and protective spruce forests it is remarkably suited to model layout landscaping offering plenty of diversity. The huge historical single-roof houses with shingle cladding and large roof projections are in perfect harmony with nature, and will continue to imprint the unmistakable character of the region – and of your model layout.

190162

Promotional set »Alpine houses«

Traditional. Two masonry mountain chalets in typical alpine style, one with timber structure in the upper storey. Ornamental motifs in the gable, a small timber extension, benches and a fountain trough underline the regional style of both two-storey houses.

Epoch I • 96 x 92 x 60 mm (2 x)

190163

Promotional set »Town houses on the banks of the Danube«

Eye-catcher in the residential district. Two renovated four-storey old-town buildings, one with its facade parallel to the street, the other featuring its gable end aligned with the street, one with half-hipped roof and one with mansard roof including windows and dormers. Both models can be built separately and integrated in a row of houses in a variety of ways.

Epoch III •

Townhouse 1: 94 x 79 x 201 mm,

Townhouse 2: 91 x 61 x 184 mm

130591

»Brandshof« Filling station

Fifties architecture. Model with interior decoration, faithful reproduction of the »Brandshof« service station built in 1953 in Hamburg, comprised of the four functional areas: filling station with dispensing pumps, refueller's office with sales and refreshment room as well as two annexed car workshops.

The period features typical of the style of that ensemble classified as a historical monument are the white-tiled facade, the rounded glass fronts on the long sides, and a filigree flat roof supported by a mushroom column. Coloured vitrified tiles along the plinth of the building, the painted edge of the roof, and two-colour dispensing pumps add some patches of gaiety matching the white and red design of the »Gasolin« brand. Information regarding the original on: www.tankstelle-brandshof.de

Epoch III • Patinated model • 285 x 210 x 53 mm • 10/19

130590 »50s« Filling station

Small petrol station with flat roof similar to the originals located in Friedrichshafen and Tettang. The floor plan and row of windows of the refueller's office as well as the slim, far protruding cantilever plate that covers the refuelling terminal and dispensing pumps, are rounded in the traditional style of the 50s. The signal-red advertising logotype and a contrasting strip all around accentuate the white of the rendered facade.

Epoch III - 141 x 97 x 53 mm - 10/19

130810

Multistorey car park

Parking floor with panoramic view. Multistorey parking lot with two complete floors connected with each other through ramps, and further parking spaces on the roof of the 2nd floor. A vertical wooden lamellar facade towering above the upper building edge and printed with a decorative horizon of mountain peaks surrounds that car park fitted with a lift and one-flight outside stairs. Access and exit are located on the fronts. 24 parking spaces. Through traffic possible by Car System. The kit is made from a mixture of materials plastic and wood/special cardboard. Drive parts for the lift are included. »Drive unit for lift« available separately, Art. 180692.

Epoch V • Lasercut model • 260 x 208 x 98 mm • 11/19

130168

Workshop with interior equipment

Long flat-roof building with windows all around, contains a fully fitted-up workshop with plenty of wood and metal working machines as well as comprehensive office furniture.

Epoch IV • 341 x 144 x 64 mm

120285

Construction crane

Quick mounting in building construction! Tower slewing crane serving as a handling and lifting aid on building sites and plots, comprised of mounting unit with swivelling sustainers and counterweight, hinged tower, and swinging boom.

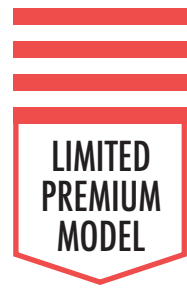

Epoch V • 340 x 66 x 315 mm • 11/19

130613

Sports hall

Polyvalent sports hall of elegant design with spectator gallery running along the entire side wall. The filigree glass facades of the competition hall, erected over the entire height, allows a standard-girder construction. The facades of the lateral entrance pavilion and building aisle with locker rooms, apparatus rooms, and technical installation are rendered and printed with figures illustrating the function of the building. Roofing combines a slightly overhanging, self-supporting arched roof made of sheet steel with a flat roof fitted with solar collectors. The kit is made from a mixture of materials plastic and wood/special cardboard.

Epoch V - Lasercut model - 350 x 235 x 120 mm

13

150947

Gymnasts, sportsmen

180354

Sports hall interior equipment

Comprehensive gymnasium equipment comprised of two handball goals and basket backboards, one large box and two little ones, several soft floor mats, trampoline, springboard, horizontal bar, buck, parallel bars and exercising bench as well as various balls. Also suitable as accessories for the 2019 PREMIUM model »Sports hall«, Art. 130613.

REAL COLLECTIBLES – REISSUED!

HO

16

109271

B-271 Villa in Tessin

Classic model! »A typical country house from the South. Most modern architecture. This model follows the original existing in Ambri located along the road Gotthard–Lugano.« First launch: 1961.

Epoch III • 200 x 120 x 85 mm

109923

B-923 Town wall

Historical collector's object, re-edited! Highlight from the former series of FALLER old-town kits. Town wall with built-in square fortified tower and old-town wall part with wall-walk directly leading to a dwelling house. The interior of the townscape is marked by a dwelling house placed onto the town wall, with passage for pedestrians. First launch: 1965.

Epoch I • 249 x 184 x 142 mm

109217

B-217 Petrol station

Retro asymmetry! Classic vintage model of a small service station with servicing hall, glazed reception room, dispensing pumps, advertising sign and lamps (without function) as well as some more accessories. First launch: 1958.

Epoch III • Petrol station: 113 x 104 x 39 mm •
Petrol pumps: 100 x 16 x 30 mm

GENUINE CLASSIC MODELS!

»FALLER Classic Models« are issued in limited edition in a high-quality retro packaging that includes a reprint of the relevant FALLER magazine of that time. »B-923 Town wall« is the most recent supplement to the series. Launched for the first time in 1965, that town set comprised of Wine house, Dwelling house, Tower and Town wall has rapidly become a collection highlight and the central element of many old town quarters worldwide. Kits B-217 and B-271 also enjoy a cult status today as they marked the entry of the most varied aspects of innovative architecture into model making.

It's Hermann Faller, one of the two FALLER company founders, who discovered the »Villa in Tessin« during a sojourn in Switzerland in the fifties. Inspired by that then most modern building comprised of two parts featuring a common access in the middle through the terrace, Hermann Faller had a replica of that villa built in the Black Forest, to make it the residence of the family.

The Classic Model series will be continued.

INCLUDED

Reprint FALLER magazine

120107 🎨

Overhead signal tower

Great vantagepoint! Mechanical overhead signal tower according to an original built in 1886 in Constance, which is now used as museum signal tower on the Wutach line in South Germany. That elevated construction is placed above a track. The generously glazed control room can be fitted out with matching »Signal tower interior equipment«, Art. 120118.

Epoch I - 197 x 82 x 114 mm, Clearance: 58 mm - 09/19

120272 🎨

Engine driver waiting shelter, 2 linemen

Along the railway line. Set including an engine driver waiting shelter with pavilion roof, and two trackside shanties with wooden board facing and lean-to roofs.

Epoch II - 32 x 29 x 37 mm, 27 x 34 x 29 mm (2 x) - 10/19

120266 🎨

3 Substations, brick construction

Perfect current supply! Set comprised of three small masonry transformer substations of different size.

Epoch IV - 62 x 28 x 29 mm, 37 x 28 x 29 mm, 36 x 34 x 37 mm - 09/19

120104 🎨

Electronic Signal Tower

Light-coloured rendered ESTW allowing to modify electronically the position of points and signals for railway traffic.

Epoch VI - 119 x 40 x 38 mm, 10 x 10 x 233 mm - 09/19

120106 🎨

Platform

Covered platform with plenty of decoration accessories such as e.g. kiosk, benches, information panel, litter bins, and many others more. Kit includes an extension of platform with track lowering. The platform is suitable for all types of track and illuminable using »LED Bar spotlights«, Art. 180654.

Epoch II - 295 x 72 x 64 mm - 10/19

120499 🎨

Road bridge

Two-lane concrete road bridge, the deck of which can optionally be stabilized using diagonal round supports. To enable Car System operation the road plate is provided with the groove intended to receive the guide wire.

Epoch V - 420 x 123 x 118 mm - Clearance: 112 mm - 10/19

Colour variants

Modern arched bridge

The fascination of bridges! Modern, wide-span concrete arched bridge with two adjoining bays on both sides and abutments, similar to the Rehtal bridge in Thuringia. Can be used with two tracks and suitable for all miniature tracks.

Epoch VI • Patinated model • Arched bridge: 662 × 89 × 138 mm •
Arc height: 102 mm • 10/19

Figures and facts

With a structure length of 203 metres and an arch located at a height of approx. 54 metres the original of N gauge model »Modern arch bridge« spans nearly at a right angle the picturesque Rehtal, a deeply cut V-shaped valley with very steep flanks and a brook and a forest way running on its bottom.

That concrete arch bridge was completed in 2013 and is part of the Ebensfeld–Erfurt line, being located in the vicinity of the small locality of Goldisthal in the southern Thuringian Forest. The bridge serves as double-track railway flyover and forms the link between the two tunnels of Masserberg and Rehberg.

Promotional set »Timber loading«

Spacious warehouse with masonry plinth, timber framework with light-coloured bracing, a lantern light, and loading platforms on both sides, similar to an original located in Stadtlauringen. For timber loading the premises feature a large railborn gantry crane with log grab, the control cabin and jib of that crane being manually movable. For decoration, set includes cases, sacks, casks, stacks of boards, and matchwood.

Epoch II • Building: 161 x 111 x 97 mm, Gantry crane: 188 x 40 x 141 mm • 10/19

239006

Promotional set »2 Hot-air balloons«

Above the clouds. Set of two hot-air balloons with green/beige and blue/white grey striped envelopes and baskets made of woven osier, which allow excursions at vertiginous heights. Fantastic views guaranteed. Can be retrofitted with the »Minilights Flickering flame«, Art. 180695.

Epoch IV • Ø 97 x 135 mm (2 x) • 10/19

Promotional sets N 2019

Certainly not from the catalogue! Assortments of matching models on a particular topics with an excellent performance/price ratio: these are the limited promotional sets. Our autumnal special offer only for you.

282795

»Kandelhof« Cinema

Projection! Laser-cut model of a large urban apartment building with four storeys and hipped roof, inspired by an original located in Freiburg, the art house cinema »Kandelhof-Lichtspiele« which opened in 1948 and fills the plinth floor. Letterings and advertising panels to style the entrance area are supplied with the kit.

Epoch III - Lasercut model - 152 x 58 x 96 mm - 12/19

282778

»St. Johann Baptist« Church

Laser-cut model of an aisleless church with apse, double pitch roof, and adjacent lateral slender spire tower inspired by an original located in Thalkirchdorf, a village in the March of Oberstaufer.

Epoch III - Lasercut model -
138 x 73 x 141 mm - 12/19

CAR SYSTEM DIGITAL APP (IOS AND ANDROID)

Smart driving pleasure per touchscreen. The Control app for Car System Digital will allow you to constantly keep a general view of your entire installation on your smartphone or tablet. Control your various vehicles with the touch of a finger as well as all vehicle functions and all elements you have previously installed and programmed, such as turnouts, traffic lights or automations. The efficient 3D graphic representation permits rotating and tilting the general view of all routes, changing over to the driver's perspective of a particular vehicle, and easily alternating between the various view windows. The application is available for download in the »App Store« for Apple iOS (iPhone or iPad) and at »Google Play« for Android. For installation and use Car System Digital licence type »Premium« is required.

CAR SYSTEM – THE CLASSIC INSTALLATION

161472
Car System Conversion chassis »VW T5«
 Pre-assembled, fully functioning Car System H0 chassis to convert two-axle stationary VW T5 models of manufacturer WIKING for Car System operation.

163710
Car System Chassis kit »N-Bus, N-Lorry«
 Make the stationary vehicle model of your choice fit for Car System. Chassis kit to motorize stationary models of N buses and N trucks for Car System operation. Set contains all vehicle components required for the assembly of a fully functioning two- or three-axle Car System N gauge chassis (bus and truck), except the rechargeable batteries.

Pro Tips »Car System«

Planning, Design, Technique – The indispensable reference and learning book for fascinating miniature road traffic. The comprehensive manual »Pro Tips Car System« contains all fundamentals as well as detailed expert know-how relating to the topics Vehicles, Road building and Traffic control. Learn step by step the essential working techniques leading to the successful operation of Car System, and immediately implement your own ideas and projects.

161354

Car System Digital Master

Upgrade! »Car System Digital Master« from now on with DCC output, too. The »Car System Digital Master« also allows from now on to address the most varied DCC compatible devices, such as e.g. servo, points or signal decoders. To use the new functionality simply assign in the Car System Digital software a digital address you have previously programmed in your DCC compatible device. Radio basic unit! The »Car System Digital Master« permits communication between all required components and controls all functions.

161360

Car System Digital, Single satellite, small

Compact! Car System Digital satellite with small enclosure, ideal even under confined space conditions, such as e.g. in shadow areas that are not accessible on your installation.

183 x 23 x 20 mm • 11/19

163730

Step-up transformer (0.8 to 3.3 V)

Compact electronic circuit using an input voltage in the range of 0.8 to 3.3 V to generate a constant 3.3 V output voltage. Module allows to operate e.g. LEDs in Car System vehicles running on one rechargeable battery cell (1.2 V) only. Its outputs are fitted with suitable protective resistors so that SMD LEDs Art. 163750, Art. 163751, Art. 163752, and Art. 163753 can directly be connected.

11/19

163740 red

5 self-flashing LEDs

Eye-catcher! Light-emitting diodes with built-in microcircuit, to be used wherever a flashing lamp is required, e. g. as a visual signal on stationary models of vehicles (police, rescue service, fire brigade, construction industry, municipal companies, or agriculture), during gate opening and shutting movements, for the illumination of funfair models, and many others more.

163741 orange

Supply voltage: 3–4 V DC
 Current input: up to 30 mA
 Flashing rate: approx. 1.5 Hz
 International component size: 0805
 Length: 2 mm, Width: 1.25 mm, Height: 1.1 mm

163742 blue

Advice: For lighting effects on Car System vehicles, use the Flashing lights, Art. 163760 to 163765.

»Brick« Modeller plate

Kitbashing and entirely own constructions. Large modeller plate manufactured using the injection moulding process, with brick pattern surface, of versatile use to creatively modify or enlarge your kits.

319 x 200 mm • 11/19

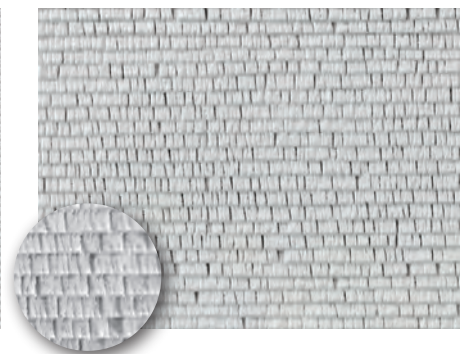

180736

»Diamond pattern« Modeller plate

Kitbashing and entirely own constructions. Large modeller plate manufactured using the injection moulding process, with serrated-sheet pattern surface, of versatile use to creatively modify or enlarge your kits.

319 x 200 mm • 11/19

180737

»Shingles« Modeller plate

Kitbashing and entirely own constructions. Large modeller plate manufactured using the injection moulding process, with shingle pattern surface, of versatile use to creatively modify or enlarge your kits, e.g. for roof coverings or facade linings.

298 x 194 mm • 11/19

180722

Geared motor

Long-lasting geared motor characterized by its uniform run and its high torque, can be used e.g. to drive funfair models you have built yourself. The »D« shaft of that motor is equivalent to the »D« shaft of FALLER synchronous modeller's motor, Art. 180629, so that the latter can also be replaced by the former with some manual dexterity. The geared motor may be operated with a maximum voltage of 5 V DC and reaches a speed of up to approx. 90 RPM.

10/19

180724

Voltage transformer 16 V AC, 1.5 to 3 V DC

Compact electronic circuit using an input voltage in the range of 10 to 16 V AC/DC to generate an adjustable 1.5 to 3 V DC output voltage. It is possible to connect to that output voltage e.g. motors from the Car System product line, geared motor Art. 180722 or, to equip a stationary model, several flashing lights (Art. 163760 to 163765) simultaneously.

11/19

Improved! A better colour temperature and luminous efficiency as well as a larger angle of radiation ensure a particularly homogeneous illumination of building models. In FALLER kits the optimized cap accurately adapts to the provided holders. 12-16 V, AC/DC.

180667

Lighting fixture LED, warm white

180668

Lighting fixture LED, cold white

Ghost train

DAEMONIUM

Month of
delivery
2020

Horror spectacle in XXL format. Digitally printed functioning model of a large, travelling ghost train with three riding levels designed according to the original »Daemonium« of showman Martin Blume, an attraction built by »Mack« company. The single-track ride carries passengers in cage-like gondolas through a strange torture chamber of the Inquisition period. The decoration paintings of the castle-like facade (»Art Studio Bernhardt«), animated logotype, and fanciful figures in the outdoor area all show elaborate horror scenarios. 4 motors included. Gondolas do not swivel.

Epoch V - Movable model - incl. 4 motors - 415 x 235 x 235 mm

140119

»Caesars Palace« Ticket booth

Pure luxury and plenty of winners, that's what venturers are going to find in »Caesars Palace«, stationary model of a former funfair lottery booth which was designed by the Workshop for Applied Advertising (»afaw«) to pay homage to that legendary casino resort in Las Vegas, with antique motifs and period elements.

Epoch V - 222 x 78 x 118 mm

FALLER CREATE

I WANT IT. I DO IT.

Designing personalized 1:87 models online

INFINITE POSSIBILITIES

FALLER CREATE is an impressive adjunct for passionate modellers. When designing your dream model the intuitive software will accompany and visualize every step of the entire process. After that your CREATE model will be manufactured for you, true to scale and with all details, using the most advanced 3D printing technique.

www.faller-create.de

Inspiring technique

With FALLER CREATE you have at your disposal an online tool that is easy to handle and with which it's fun to design and modify building models.

Personalization

FALLER CREATE offers you a very high degree of designing freedom. You will project, colour, and personalize with decoration parts your individual and unmistakable one-of-a-kind building.

Rapidity

FALLER CREATE reduces the required times for design, manufacture and dispatch to a minimum. You will hold your dream model in your hands within a mere few days.

Made in Germany

With FALLER CREATE you design detailed high-quality building models made from a recyclable bioplastic. On doing so, the FALLER CREATE team will be pleased to help you with all means available to them.

FALLER brands

You can get extensive catalogues and detailed brochures at a model construction store near you and via: www.faller.de
