## FALLER Workshops

### We show you how easy and diversified scale modelling can be.

During FALLER workshops at our headquarters in Gütenbach our experts will show you the best working techniques as well as all essential tricks and knacks when putting them into practice. Our workshops on the topics model layout construction, Car System, Car System Digital and conversion of Car System Digital vehicles are equally aimed at beginners and advanced hobbyists. Get all infos on: [www.faller.de](http://www.faller.de)

Exciting themed worlds

## New brochures

Alongside the general catalogue, in no particular order, we also dedicate separate brochures entirely to selected categories. You can get these fresh off the press from FALLER retailers and as an ePaper and PDF download at [faller.de](http://faller.de).

Enjoy many more product announcements and miniature worlds which enrich the entire programme in a fascinating way:

- FALLER New items: everything new at a glance, eagerly anticipated twice a year
- POLA G New items: with all the news on the garden and model trains for the garden
- FALLER Miniature figures: small protagonists for every setting continuously expand the collection
- FALLER Military: model military sets on the topic of life at the barracks

»Scale Modelling 2022/2023«

## Hot off the press!

The new FALLER catalogue »Scale Modelling 2022/2023«, Art. 190909 has arrived. Now available from your FALLER retailer and at [www.faller.de](http://www.faller.de).

MINITRIX anniversary wagon 2021

## Collector's item

On the occasion of the 75th FALLER anniversary, at [www.trix.de](http://www.trix.de) you can currently acquire this model of a covered private wagon from Gebr. FALLER GmbH in Gütenbach, based on a historical motif, rolling stock of the Deutsche Bundesbahn (DB). Length over the buffers: 75 mm.

Biene adds another one

## Our book tip

After the great success of his first FALLER book, with »FALLER - The World From Above«, Art. 190899, the successful author presents a second retro book. On the occasion of the company's 75th birthday, he has devoted this richly illustrated and entertainingly written book to the history of the model-making pioneers, the Faller brothers. A must-have for all fans, collectors and book lovers.

120296

## »Railway Maintenance Services« equipment set

Comprehensive model set for the depot design consisting of: a slagging system with a pit and inclined elevator, a compressor house with interior fittings and a sand house with a sliding barrel roof, both buildings made of brick, a steel sand tower with elevated tank, a pipe blowing frame and a poker rack with hand tools, a shed with a canopy and a water crane with pivoting articulated boom, heating system and gully grates. Servo assembly parts for the drive of the slagging system and the water crane and 1 servo, Art. 180726 included. A second servo, Art. 180726, not included, is required to drive both models. Use the servo control, Art. 180725, not included for the connection.

**Epoch III** • Patinated model • Moveable model • Slag handling facility: 171 x 100 x 151 mm, Depth: 47 mm, Compressor housing: 90 x 75 x 70 mm, Locomotive tube cleaner: 70 x 35 x 50 mm, Sand house: 155 x 55 x 32 mm, Sand tower: 37 x 37 x 134 mm, Water crane: 78 x 15 x 70 mm • 01/22

## »Owen« train station

Connoisseurs build the Württemberger. Württemberg type IIIa standard station with a light shingle façade, saddle roof, dormers and a base plate based on the original model built in 1899 in Owen, Baden-Württemberg. The annexes house a goods shed with a circular ramp and a covered waiting hall. The sanitary facilities are housed in a separate building with half-timbered elements. A bell, benches, the station clock and rubbish bins are included to allow you to set the scene.

**Epoch II** •

Railway station: 308 x 140 x 142 mm, Toilet house: 151 x 77 x 75 mm • 12/21

120091

## »Zweckel« Signal tower

Lasercut model of the signal tower put into operation in 1911 and classified today as a historical monument, at branching-off point »Zweckel« in Gladbeck, North Rhine-Westphalia. Towards the upper storey clad with slate slabs, that rectangular clinker construction is narrowed through sharply chamfered angles.

**Epoch III** • Lasercut model • 124 x 60 x 77 mm • 01/22

130888

## Post Office

Busy traffic in the two-story post office! This is where shipments are accepted and sent, stamps are sold and services are offered. A wide entrance staircase and two double doors lead to the entrance area under the Deutsche Post logo. The model is rounded off by a parcel loading ramp attached to the side and the rear administration area.

**Epoch IV** • 185 x 171 x 125 mm

XX/21 Month of delivery

130139

## Wash house

Based on historical models. Public wash house with extension, two-storey, with a plastered façade.

**Epoch II** • 65 x 46 x 71 mm • 11/21

**120505**

## Modern arched bridge

The fascination of bridges! Modern, wide-span concrete arched bridge with two adjoining bays on both sides and abutments, similar to the Rehtal bridge in Thuringia. Can be used with two tracks and suitable for all miniature tracks.

**Epoch VI** • 1015 x 137 x 217 mm • 12/21

130820

# »Bran« Castle

## Limited-edition anniversary model for »75 Years of FALLER«

Accurate replica of Bran Castle, which was built in the 14<sup>th</sup> century in the municipality of Bran in Siebenbürgen, Romania, as a fortification and was later converted into the royal dwelling.

The multifaceted layout of the castle with its irregular floor plan and extravagant roofscape was developed over the course of multiple modifications and expansions through the centuries.

The inner courtyard with its half-timbered elements is surrounded by the high, square central tower with its mono-pitched roof and ridge turret to the north, the main residence with its roof terrace and solid natural stone outer wall to the east, the gatehouse with a sentry box and large outside staircase to the castle, a prominent stair tower with a conical roof and an annexe for the park access to the south, and a battery tower with an enclosed round tower displaying a conical roof in the south-westerly direction.

The model is equally suited to being built as a hilltop or lowland castle.

The castle, which is now used as a museum, is closely connected to the myth of the vampire Count Dracula. As legend has it, the historical figure Vlad III, who at that time was the ruler of the Principality of Wallachia and possibly the inspiration for Bram Stoker's famous fictional character, used the castle as his residence.

## Horse-driven mill »Rahden«

Moving miniature worlds. Laser-cut functional model of a historic horse mill from around 1860 with a square floor plan, half-timbered façade and round tile roof based on an original in the museum courtyard in Rahden-Kleinendorf, North Rhine-Westphalia. Drive parts for the motorisation of the whim system and the miller and horse as miniature figures are included to set the scene. Use the Synchronous hobby motor, Art. 180629, not included to drive the model. See the original building at: [www.museumshof-rahden.de](http://www.museumshof-rahden.de)

## »Breitenbach« Station Promotional Set

Historic station ensemble consisting of a two-storey station building with half-timbered upper storey, dwarf houses, single-storey extension and a detached half-timbered toilet facility. The crippled hip roofs and the matching façades ensure a unified appearance of the station building and the toilet facility. A small goods depot with loading ramps and a rail crossing with two barriers, St. Andrew's crosses and a barrier post of clinker construction complete the set.

**Epoch II** - Railway station: 256 x 135 x 150 mm, Goods shed: 175 x 81 x 63 mm, Barrier boom: 95 x 40 x 30 mm (2 x), Barrier post: 103 x 58 x 104 mm, Toilet house: 90 x 75 x 72 mm - 09/21

190078

## Promotional Set »Train yard«

Small depot for the maintenance, repair and readiness of your Epoch II locomotives. 3-piece Bw set consisting of locomotive shed, gantry crane and water tower. The two-storey brick shed with roof fan, chimneys and transom windows can accommodate two locomotives of up to 290 mm air gap. The track centre distance is 73 mm. The arched gateways can be opened and closed manually. Wooden gantry cranes are used to handle the goods as well as a railway water tower with cylindrical high-level tank and a steel pier substructure stores the water supply.

**Epoch II** - Clearance: 70 mm,  
Gantry crane: 130 x 56 x 106 mm,  
Engine shed: 322 x 176 x 118 mm,  
Water tower: 99 x 85 x 154 mm - 10/21

## USB 2.0 cable, type A plug on the open end, 2 m

For worldwide use. USB cable with open cable end for power supply of operating models via an existing type-A USB port.

Particularly suitable in the carnival area, for example for powering model such as the »Daemonium Ghost Train«, Art. 140418, »Sala Motor-Drome Motorcycle sheer wall show«, Art. 140336, or for lighting a ferris wheel.

### Technical data:

- Connections:
  - > 1 x USB 2.0 type-A plug
  - > 2 x open cable ends (VCC/red/5 V and GND/black/earth)
- Wire cross section: 28 AWG
- Cable diameter: approx. 4.5 mm
- Cable length without connections: approx. 2,000 mm
- Colour: black

Please be sure to check the power of the USB port to avoid overloading.

# CAR SYSTEM DIGITAL

DIGITAL VEHICLE AND TRAFFIC CONTROL

## Pure driving pleasure!

### Autonomous driving on your model layout

- Fully automatic traffic control incl. distance monitoring
- High number of digital vehicles with realistic starting and braking characteristics
- Vehicle tracking via ultrasound and traffic control by radio
- Real-time control of vehicle functions possible
- Integrated set-up and control of light signals
- System/road construction reduced to guide wire and junctions
- Minimal cabling thanks to LocoNet and radio communication

# BUILD MORE FREELY WITH MORE OPTIONS

## The new FALLER CREATE is here!

We are very excited to be able to present you with the new FALLER CREATE! Over the last few months, we have given it our all so as to implement the most highly requested functions and thus bring FALLER CREATE to a new level. [www.faller-create.de](http://www.faller-create.de)

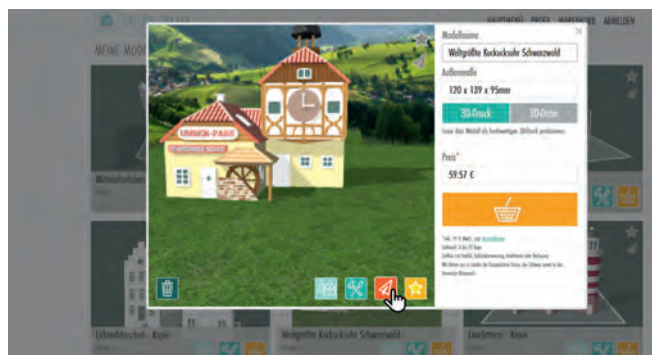

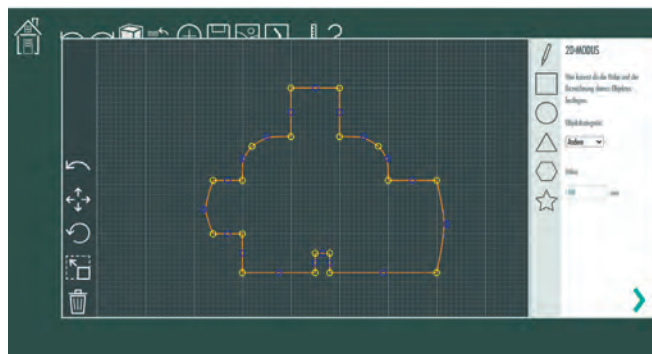

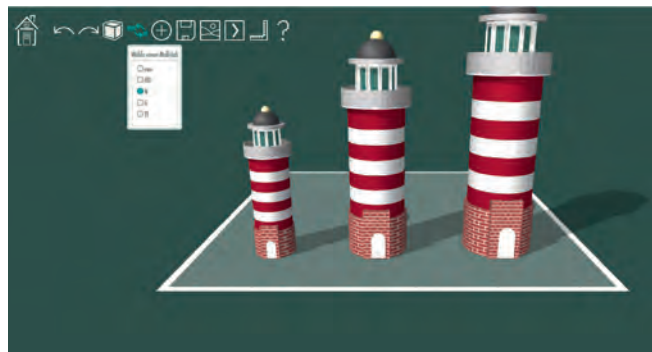

### The most important innovations at a glance

Along with H0, you can now also build in other scales, accurate to the millimetre, such as N or TT.

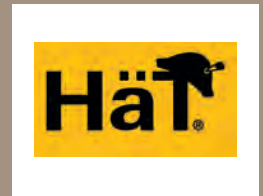

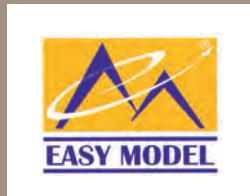

The size of all forms and accessories can be freely adjusted and distorted. You can even cut holes.

Your drawing will subsequently be transformed into 3D and can be further edited by you.

You can now also share your model with other users. You will then find it in the 'Gallery' area. There, other users can mark it as a favourite. Furthermore, other users can download your model and further edit it for themselves. Create models in different scales.

# FALLER brands

You can get extensive catalogues and detailed brochures at a model construction store near you and via: [www.faller.de](http://www.faller.de)
