Only Mother Nature's Trees Are More Realistic

www.SceneryProducts.com

Making a better tree

JTT is one of the world's leading makers of handmade miniature trees and landscaping materials for model railroad layouts, model dioramas, craft projects and architectural use. In addition, moviemakers, including the professionals at Walt Disney Studios, have turned to JTT for the accuracy of their detailed, miniature scenery.

Only Mother Nature Makes Better Trees

The largest selection of miniature trees... in a striking array of species and sizes

Realism that sets us apart... the authenticity of JTT scale trees and scenery is the result of a patented manufacturing process (US Patent No. US 7,524,544) for creating realistic miniature trees. For example, the trunk and branches of a JTT Pro-Elite and Professional Series tree begin with a bundle of super fine wire strands that are twisted together to form the trunk. Depending on species and size, up to 110 wires can be used. Wires from the trunk are subdivided to form the main branches and sub-branches. An exclusive coating creates realistic bark. The process also imparts flexibility allowing the trunk and branches to be bent to natural shapes.

True to life leaves... while some other makers still depend on sprayed-on fiber strands that form uneven clumps and bunches, we pioneered the use of fine, stretchable, Foliage Fiber Clusters to form leaves. This results in leaves that are airy and full yet look quite delicate. We also put fiber clusters on the inside and outside surfaces of the branches to create depth and defined branch structure.

The broadest selection of scale trees in the industry... you'll select from our moderately priced Professional Series, our economical Super Scenic Series and our top of the line Pro-Elite Series. Each series is available ready-to-plant or as kits ready to assemble. JTT offers hobbyists more than 40 species. Depending on the species, trees range in size from 1/2" to 18" tall, from Z through G scales.

Man does not live by trees alone.

After creating miniature trees so authentic their process earned a US Patent, we turned our attention to flowering plants. The challenge was to match nature's vibrant colors, delicate contours, diverse textures and lifelike realism... at a price attractive to serious modelers.

The result, magnificent HO and O scale flowering bushes, trees, hedges and plants, including tulips and petunias... and even corn stalks that will take your breath away. Some of these new miniatures use the unique, twisted wire process and hand-made detail that make JTT trees so genuine.

The reds, pinks, greens, yellows, purples and blended colors are spectacular. The shapes are spot on. This is scale artistry at its finest. Whether your railroad rolls through country gardens, rural farms or cityscapes, these unique flowering plants deliver a convincing reality only available from JTT.

Flowering Plants Series

Flowering Plants

JTT's flowering plants are unique in the marketplace. The series features bushes, trees and hedges, as well as petunias, tulips, and remarkably realistic corn stalks up to 2" high. Capturing nature's most vibrant color, contours and textures in HO and O scale, these flowering plants come alive in red, pink, green, yellow, purple and blended colors.

Create natural landscaped borders for your layout, a colorful countryside or brilliant backdrops for homes and buildings. The only limit is your imagination.

Pro-Elite Series

Pro-Elite Tree

All the trees in the Pro-Elite series feature our patented twisted wire process and a unique, lifelike, 3D, textured bark with a gnarly, knobby surface. Some also sport genuine looking roots and a two-tone paint technique that simulates aging. Our new Pro-Elite trees are for the serious modeler who will only be satisfied with the very best. These scale masterpieces elevate an ordinary layout and deliver a distinctive look to your scenery.

JTT's Pro-elite trees feature the most authentic miniature trees ever made, like these Cypress, Elder and Privet species... all feature distinctive bark and well defined roots. There are 22 different species in the Pro-Elite Series. Multiple size per pack, 3" to 6"

Deciduous

Super Scenic Series

Super Scenic BULK BAGS

Our uniquely molded Super Scenic Series offers mixed bags bulk quantity with different species and size assortments. Tree are already assemble and complete with planting bases. Great for N and HO scale layout.

92117 45/pk 2.5" to 6" tall
92118 90/pk 2.5" to 6" tall

92119 20/pk 2.5" to 4.5" tall
92120 40/pk 2.5" to 4.5" tall

Fruit Tree Grove

Economically priced, these fruit trees are scale-like in appearance and ready to plant. These fruit trees have many branches that can be shaped, and have colorful and bountiful fruits. They will bring new life to any layout, 2"-2 1/4" tall, 6/pk, N and HO scale.

Orange Tree 92121 6/pk

Apple Tree 92122 6/pk

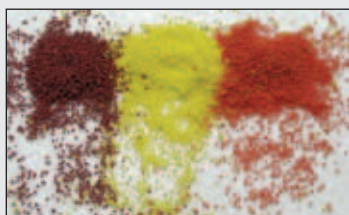

Lemon Tree 92123 6/pk

FRUITS: Orange, Lemon, Apple

Add fruit to your existing trees by sprinkling fruit on the tree foliage, apply with any water base glue.

Multiple bags of fruit 10g total - HO scale.

Fruit: 92124

Landscaping Material

Grassland and Flowering Meadow

These innovative, multipurpose landscape details are remarkably adaptable. You'll find flowers, grass, and other vegetation. They complement various terrain including meadows, plains and pastures. Each 5" X 7" sheet can be torn or cut to the exact size you need and shaped to regular or irregular contours. The smooth, flexible material fits into various terrain areas and can be easily glued to your layout. You can also remove individual tufts and use them throughout your landscaping.

Grassland

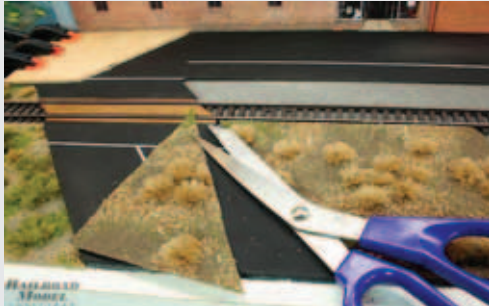

95601 Green **95602** Wild **95603** Golden

Flowering Meadow

95604 Red **95605** Yellow **95606** Purple

Grass Mats

JTT professional quality grass mats are available in six different colors: light green, medium green, dark green, moss green, yellow straw and golden straw. They are available in 19"x25" (Z-scale), 50"x34" (N-scale) and 50"x100" (HO-scale). Ideal for model railroading, educational projects, crafts projects, architectural models and other hobby uses.

- 19"x25" mat easily covers 1.5'x2' sheet of plywood
- 50"x34" mat easily covers 4'x2.5' sheet of plywood
- 50"x100" mat easily covers 4'x8' sheet of plywood
- Rolls out to create an instant base for landscaping and scenery
- Heavy-duty paper backing, reusable, non-shedding
- For use with train layouts, model scenes, dioramas, and craft projects

Empty Shakers

Easy to use shakers with a cap that can be adjusted for pouring, sprinkling or storage. Use with turf, gravel, and ballast.

95148 small shaker 20 Cu. In.
95149 large shaker 60 Cu. In.

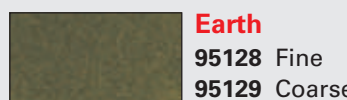

Ground Cover Turfs

JTT's ground cover turf comes in seven colors and each is available in fine (1/32") and coarse (1/8") grits. They add texture to your landscaping. Use for small shrubs, on hillsides or mountains, and to achieve realism on dioramas, model railroad layouts and other landscaping projects. Attaches easily with any water base glue or paint.

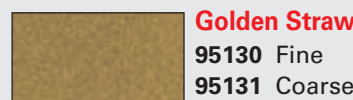

Available in a 30 Cubic Inch bag.

Chopped Leaves

Chopped leaves are a natural way to add detail to your layout. These leaves mimic fallen, dead leaves and ground cover. Each pack holds (1/32") fine, (1/16") medium and (1/8") coarse.

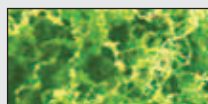

Multiple bags of 9 cu. in. total

95089

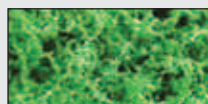

Foliage-Fiber Cluster

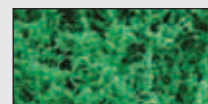

Our Foliage-Fiber Clusters make unbelievably realistic foliage. To create the clusters combine exceptionally thin poly fiber and blended turf. Clusters can be stretched to a desired density to match your landscaping needs. The results are airy trees, realistic vines, authentic weeds, bushes and undergrowth. The clusters bring landscapes to life.

Architectural Model Parts

Plastic Pattern Sheets

Embossed White Plastic Sheets

Our complete range of embossed styrene plastic sheets can be used to create roofing, flooring, siding, rock, stone, metal plate and other architectural parts. The sheets are demanded by architectural firms and hobbyists for their accurate, embossed detailing and versatility

Please Note: These pattern-embossed sheets are sold only in undecorated, unpainted white. The photographs above depict actual architectural models created with JTT embossed sheets.

Both photos are shown for reference only and have been painted for photography.

JTT... Only Mother Nature Makes More Realistic Trees

- For model railroad layouts, model dioramas, craft and architectural projects
- Bendable, realistic Wire Foliage Branches allow for customization and authenticity
- Patented manufacturing process
- Wide variety of species... more than 40 in all
- Many available in Z through O scale; varied sizes for added realism
- Handcrafted and packaged as kits or factory-assembled ready for planting
- Quality materials
- Removable bases for placement options
- Accurate trunks, plentiful branches and fine, airy foliage

Beyond Trees... JTT Landscaping Ground Cover

Scale landscaping projects often dictate a wide range of ground cover for seasonal realism and layout accuracy. In addition to our superb trees, our landscaping materials are carefully designed to bring your layouts to life by precisely mimicking natural settings, colors and textures.

Our landscaping materials include: Grass Mats; Gravel and Rock; Turfs... Blended, Ground Cover, Blossom Flowering, Green; Field Grass/Weeds; Wire Foliage Branches; Foliage Fiber Clusters; Poly-Fiber Strands; Chopped Leaves.

Beyond Trees and Ground Cover... JTT landscaping details

After creating miniature trees so authentic their process earned a US Patent, we turned our attention to flowering plants, vegetation plants, farming groves and gardening details. The result magnificent HO and O scale flowering bushes, hedges, tulips, pentunias, roses, cornstalks, orange and apple groves, lily pads, pumpkins, cabbages, lettuces, cauliflowers and more....
