About Jaegerndorfer USA

We at Jaegerndorfer USA are dedicated to bringing the finest models to the USA market: Aerial Tramways, Ski-Lifts, Gondola Systems, Pistenbullies, Figures, Dolls and all necessary accessories - all engineered in Austria.

Ski Resorts can make a lasting impression, increase brand awareness, broaden their marketing outreach, and best off all increase sales by customizing Jaegerndorfer products (Gondolas, Aerial Tramways, Key-chains) with their ski resort's logos. These prototypical models are ideal for gift shops and resorts.

Ski enthusiasts can re-create memories of their winter vacation, enrich a train layout, or operate an interesting display at home or office. Or simply collect memorabilia from their favorite ski resorts.

Available in three versions:

- Two cabin manual operation of a real aerial tramway operation via hand crank
- Standard electric (battery or external power supply)
Speed Control and Manual Direction Control
- Auto-reversing (battery or external power supply)
Fully automated operation with speed control and time control

This aerial tramway is ideal for logo customization. Different colors of the gondolas and setup are also possible (MOQ). Please contact us for more information.

Prototypical replica of aerial tramways in leading ski resorts around the world.

JC 1400

RC model is also available as PistenBully 400 (without winch)

approx. 11" long

The PistenBully 400W is a die cast model with a few plastic parts for detailing. On firm ground the Pistenbully can climb up to 45° hills. Two powerful gearbox driven motors power the unit and the 3.6V Lithium-Ion battery holds power for a long pleasurable playtime.

Functions:

- Orange blinking lights
- Bottom head lights
- Snow plow lift and lower
- Finisher raise and lower
- Forward/backwards motion
- Right/Left and turn on the spot

Remote Control 1:32

The HO gondola system in 1:87 scale is not only the ideal add-on for every HO modell railroad hobbyist, but stands well on its own legs as a great modell for skilift enthusiasts with limited space, building a diorama. All components are immediately ready for use and are quickly build up. You will need 3.5mm wood screws and a screw driver for a stabil installation. The maximum installtion length should not exceed 8'.

Cabins and chairs are simply attached to the rope as well can be easily

removed from it as well. The chairs offer movable hoods as well as foot-rests. We can supply also scale correct figures to be placed in gondolas and chairs.

The system can be powered in several ways, in analog mode the system can be powerd with 12-14 Volt DC or AC.

An interesting variation is to control the system via DCC. The valley station has a 21 pin MTC decoder spot for the seperately available skilift sound decoder. The speakers are already preinstalled.
