Patent number 5,662,229

MAGNE-MATIC®

1 Stopped over a Magnetic uncoupler, allowing slack to occur between the couplers. Knuckles have opened.

2 Withdraw slightly to disengage couplers. Magnetic force of the uncoupler draws couplers apart, uncoupling them.

3 Enter over uncoupler again, couplers are in delayed position allowing pushing of car(s) without causing re-coupling.

4 Withdraw, leaving uncoupled car(s) on desired track. Couplers automatically return to normal coupling position.

Notes:

INTRODUCTION AND TABLE OF CONTENTS

Here is the latest product catalog from Kadee® featuring HO_n3, HO, S, Sn3, O, On3, On30, *1 and G scale products offering you the finest line of scale components for model railroading. The needs of our customers encourage us to try harder to make new and better products. Many changes we make simply reflect these changing needs as well as taking advantage of new technology in precision machining and die casting. The one thing that never changes though is the Kadee® Product Guarantee.

KADEE® PRODUCT GUARANTEE

All Kadee® products are guaranteed to be free of defects in workmanship or materials for 1 Year. Product defects arising from improper usage, shipping by sources other than Kadee® or abuse will not be honored. Cosmetic or environmental defects will not be honored. All returns must be authorized prior to return. Returns are shipped at the full expense of the customer unless prior arrangements have been made. Return defective materials directly to us for replacement or repair. Be sure to package items carefully as we cannot replace parts damaged in transit, nor parts that are determined to be damaged due to misuse or abuse. Subject to change without notice.

KADEE® PRODUCT RETURN POLICY

Product returns must be authorized prior to return. Returns may be made only up to 30 days from date of invoice & will be subject to a 20% restocking fee. Returns must include a copy of the original invoice and reason for the return. Returns are shipped at the full expense of the customer unless prior arrangements have been made. We cannot accept the return of products purchased from sources other than Kadee® Quality Products. Returns with defects arising from improper usage or abuse will not be honored.

Most Kadee® products are available at your local hobby shop. Your hobby dealer is your best source of Kadee® products and can provide many suggestions to help you enjoy your hobby. If your dealer is unable to provide you with the products you need, you may place your order directly with us. Orders may be placed by Phone, Fax or Online. Some items may only be available factory direct.

RETAIL CUSTOMER ORDERING

A \$5.00 handling fee will apply to orders. Domestic surface shipped retail orders can be shipped USPS or UPS. All foreign orders will be shipped USPS. All retail customers are responsible for all insurance as needed. Shipping will be calculated by Kadee® at the time the order is received. Shipping charges will be calculated by: weight, size & manner of shipping & a \$5.00 Handling fee will apply to all orders. Orders may be paid for using VISA, MasterCard, Check, Cashiers Check or Money Order in US Dollars prior to sending the fulfilled order. A returned check fee of \$25 will be charged and accrued interest until paid in full. No C.O.D.'s. All customers are responsible for all taxes, duties, or customs fees.

We always welcome your questions or suggestions are always welcome at Kadee® for a reply to your questions e-mail us or mail us your question, please include a self-addressed, stamped #10 envelope. Be sure to mention the scale you are working in.

Orders are usually shipped the same day as received. All merchandise is subject to availability at the time the order is placed. All prices, Shipping & Handling charges are subject to change without prior notice. UPS Surcharges may apply.

We reserve the right to correct errors and to modify designs or discontinued products without notice or obligation.

COUPLER PRIMER

The Kadee® coupler primer will better acquaint you with the basics of the Magne-Matic® coupling and uncoupling system. Kadee® Quality Products Company is proud that its Magne-Matic® couplers are regarded as “the hobbies most respected couplers,” and in fact have become “The Standard by Choice” of model railroaders around the world. Also, we have included a list of terms and definitions used by Kadee® and much of the modeling world.

How We Arrived at Our Present Model Coupler

Model Railroading is a continually growing hobby beginning sometime in the early 1900's and has grown to the present day and it will continue into the distant future.

Manufactured models began as basic “toy like” models that could hardly be considered representative of the prototypes. Now days we have models that are so accurate that they are compared directly to the prototypes in almost every detail. Unfortunately, couplers did not advance at the same speed as the models and the industry suffered for a long time without a reliable functioning knuckle coupler. Modelers that have been in the hobby for a long time will remember the situation in the “old days” when, generally, couplers were not very reliable, realistic, or automatic.

When Kadee® Quality Products was formed it was with the idea of providing a reliable, realistic, automatic coupler and since 1942 Kadee® has remained a leader within the hobby.

Our earliest version of a knuckle coupler, the “K” series prototype was the first to combine a realistic looking coupler with a

feature where the coupler is never “locked” in a closed position. This allows the coupler to actually be “coupled” to at anytime and because of this feature the knuckle will flex while negotiating tight curves but still remain securely coupled. This was a major achievement, enthusiastically welcomed by the hobby.

Although a big stride forward, the “K” still required physical contact with a mechanical uncoupler. This was quite conventional for its day but not the most satisfactory arrangement. So after arriving at this acceptable “K” style coupler head with its realism and dependability, the next logical step was to eliminate the physical contact with mechanical uncoupling ramps.

This was achieved with the introduction of **Magne-Matic® Uncoupling** and was a major breakthrough utilizing magnetic force to actuate the coupler. The letter “M” was added to indicate a “K” style coupler operated magnetically and these became our “MK” series. Not long after this breakthrough, Kadee® developed **Delayed-Action Uncoupling**. Now it was possible to “spot” cars at most any location without having to actually uncouple them before pulling away. This, however, was not the end of the modelers coupler

problems. Now, even with a dependable functioning coupler, the modelers still faced the problems of properly mounting them on the many different types and makes of models, which sometimes required extensive modifications.

Kadee® realized that model manufacturers don't always agree on standards for coupler mounting. Because of this, we developed and now offer the largest variety of coupler box styles, “offset” couplers, and different shank lengths to help compensate for these coupler mounting variations. Since “all” of our couplers are actuated magnetically we no longer use the “MK” to designate them. We simply use a product number sign such as “5” coupler or #148 coupler, etc.

Kadee® Couplers have become the most respected couplers world wide due to constant research and development and a commitment to quality. We are always striving to improve the standards of the model railroading hobby.

What is Delayed Uncoupling

Delayed Magnetic Uncoupling® It is a unique way of keeping the couplers open and uncoupled while you push the cars to be dropped off (or spotted) at most any location. The Delayed Uncoupler is mounted just ahead of the leading turnout (switch) in any track serving a number of spurs and sidings. Couplers can be automatically set in the “**delayed position**” by first uncoupling (see illustrated uncoupling steps) then pulling forward to completely disengage couplers. The couplers are now in the delayed position, **offset** in opposing directions and will remain this way over the magnet. Now push back into the couplers and as long as there is “constant” pressure against the delayed couplers the cars now can be pushed or “**spotted**” to any location beyond the uncoupler without recoupling. Once at the desired location, simply pull away leaving the car/s at that location. The couplers will now snap back to center and are ready to be coupled again.

Kadee® Magne-Matic® Couplers are usually easy to install and can be adapted to almost any locomotive and rolling stock. Our couplers come with complete assembly instructions and, upon request, we provide special instructions and drawings for installations not covered in the couplers instructions, usually ones requiring some modifications.

KADEE® AUTOMATIC COUPLING AND UNCOUPLING

KADEE® COUPLERS AND UNCOUPLERS

Kadee® Magne-Matic® Couplers with **Delayed-Action Uncoupling** offer freedom of operation and realistic prototype train movements, with a minimum of uncoupling devices. It is a complete “Hands Off System” and much more automatic than even those on full-size railroads. No actual hand contact occurs during uncoupling, thus assuring smooth, reliable performance. Our couplers can also be set in a “**delayed**” position that allows you to “**spot**” cars anywhere on the layout.

HOW KADEE® COUPLERS AND UNCOUPLERS WORK

The **Delayed-Action Couplers** are ready to couple at all times—just push two cars together and they automatically “couple up”. As two couplers are pushed together, the knuckles pivot aside to bypass each other, then are returned to the closed position by a coil spring, known as the knuckle spring.

Uncoupling with Kadee® Couplers is done over a magnetic “**uncoupler**” (uncoupling ramp). Uncoupling takes place when mated couplers are pushed to a stop over a magnetic uncoupler. Kadee® Couplers are equipped with a metal wire “**trip pin**” that curves down from the knuckle of the coupler head. The trip pins are slightly off center so when a pair of couplers are stopped over an uncoupler and slack occurs between the two couplers, the magnetic force of the uncoupler pulls the two trip pins in opposite directions out towards the rails thus opening and “uncoupling” the couplers. If you push or pull the cars away from the magnet, each coupler will automatically snap back to its centered position. (Knowing this, you realize that you “cannot recouple” over a magnetic uncoupler.) This operation is known as “**slack uncoupling**”, a very simple and reliable principle. Kadee® Couplers are designed so that it requires two conditions to be met for them to uncouple: **1.** Positioning the couplers over an uncoupler; and **2.** Slack being caused between the couplers. Therefore a train can be pulled over the uncoupler while keeping a steady tension and the cars will not accidentally uncouple.

In HO, to uncouple without Delayed-Action you must use our non-delayed “312 uncoupler mounted in correct position in your track. For HO Delayed-Action uncoupling, you must use one of our delayed uncouplers, “321 between the rails, “308 under the ties or “309 electric uncoupler.

MAGNE-MATIC®

1
Stopped over a magnetic uncoupler, allowing slack to occur between the couplers. Knuckles have opened.

2
Withdraw slightly to disengage couplers. Magnetic force of the uncoupler draws couplers apart, uncoupling them.

3
Enter over uncoupler again, couplers are in delayed position allowing pushing of car(s) without causing re-coupling.

4
Withdraw, leaving uncoupled car(s) on desired track. Couplers automatically return to normal coupling position.

STANDARDS

The **National Model Railroad Association, Inc. (NMRA)**, is an organization formed in 1935 to bring order out of chaos caused by the lack of standardization in the fledgling hobby of model railroading. It is made up of hobbyists like yourself, who have set down the *standards* accepted and used by the majority in the hobby. **Official NMRA “Standards”**: Cover basic scale specifications and information on items which are critical to the functioning of model railroads and necessary to the interchange of equipment between layouts.

NMRA “Recommended Practices”: Cover items of preferred design that are slightly less critical than those in *standards*, but are desirable for improved performance and maximum interchange between components.

The *standards* set down by the **NMRA** help to standardize the industry, so to speak. They are the basics that most manufacturers try to follow when making model railroad equipment. This enables you to use equipment from different manufacturers and be assured that it will match up. We at **Kadee®** follow these **NMRA Standards and recommended practices** as closely as possible in all of our products. Our couplers are very close to prototype appearance, so they do require a different approach to adapting and mounting on your equipment. For this reason we included the illustrations for *standard* dimensions for HO_{n3}, HO, S, O, and On3 couplers. **It is very important that you mount the couplers (in all scales) at the proper height and exactly centered on your equipment.** If the manufacturer of a particular car or locomotive has followed the **NMRA** standards for height of the coupler pocket or draft gear box on their model, you should be able to adapt the **Kadee® Coupler** and Draft Gear to their equipment without difficulty. If they have not, you may have to do some custom work to adapt Kadee® Couplers.

NMRA STANDARDS

NMRA

If you are not already a member, there is much that you are missing, so we urge you to join. Write to NMRA, Inc., 4121 Cromwell Rd., Chattanooga, TN 37421, web site www.nmra.org, e-mail hg@hqnmra.org, phone (423) 892-2846, fax (423) 899-4869.

COUPLER CENTERLINE HEIGHTS

The N.M.R.A. Standard S-1 for coupler heights is measured from the top of the rail to the "center" of the couplers knuckle (coupler centerline). All Kadee® height gauges are designed to meet the N.M.R.A. S-1 standard which will ensure dependable and reliable performance. (N.M.R.A. S-1 page 52)

COUPLER HEIGHT & HEIGHT GAUGES

For the best and most reliable coupler performance the couplers need to be mounted at the "same height". To achieve the correct coupler height requires a coupler height gauge or couplers mounted correctly on a locomotive or rolling stock to be used as a gauge. Kadee® offers coupler height gauges for HO N3 (#704), HO (#205), S (#814), On3 (#813), O (#812), #1 (#829), and "G" (#880) scale. The above chart indicates the correct coupler heights for each scale. Also note, that now in HO scale there are couplers made to actual "scale dimensions" (our #58, #78, and #2100) where the coupler head is about 20% smaller than the standard #5 type of coupler. You still can use a #205 HO height gauge with a standard coupler or a scale coupler because you are only measuring or looking at the "center" and not the top or bottom of the coupler regardless of the actual size of the coupler head.

TYPICAL PARTS OF KADEE® COUPLERS

The illustrations below will help easily identify the various coupler components. Regardless of scale, all couplers are essentially the same and operate in similar ways.

U.S.A.

MAGNE-MATIC® COUPLERS
World's Best Magnetic Couplers!

Standard Shank Couplers

Standard Head - Body Mount

2 pair of Couplers, #634 Centering Springs & Draft Gear Boxes *Note: The #148 coupler is the Whisker® Equivalent to the #5 coupler. See Offset Charts HO-1, HO-3, HO-4*

- #5 Metal - Medium (9/32") Centerset Shank - #232 Gear Box
- #9 Metal - Medium (9/32") Centerset Shank - #9 Gear Box has a smaller center mounting hole in the gear box than the #232 Gear Box.

20-Series - Body or Talgo Mount

2 pair of Couplers, Offset Plastic Coupler Series with Metal Knuckles, with (#622) Coil Knuckle Spring, (#634) Bronze Centering Spring,

(#212) Talgo Truck Adapter, (#213) Gear Box & Sleeves, & Insulated (#232 or #234) Draft Gear Box.

Note: A 140-Series coupler mounted using the 213 or 232 gear box is equivalent mounting dimensions but stronger. See Offset Charts HO-1, HO-3, HO-4

- #21 Plastic - Long (25/64") Underset Shank - #213 & #232 Gear Box
- #22 Plastic - Medium (9/32") Overset Shank - #213 & #232 Gear Box
- #23 Plastic - Short (1/4") Centerset Shank - #213 & #234 Gear Box
- #24 Plastic - Short (1/4") Underset Shank - #213 & #234 Gear Box
- #25 Plastic - Short (1/4") Overset Shank - #213 & #234 Gear Box
- #26 Plastic - Long (25/64") Centerset Shank - #213 & #232 Gear Box
- #27 Plastic - Medium (9/32") Underset Shank - #213 & #232 Gear Box
- #28 Plastic - Medium (19/64") Centerset Shank - #213 & #232 Gear Box
- #29 Plastic - Long (25/64") Overset Shank - #213 & #232 Gear Box

30-Series - Body Mount

2 pair of Couplers, Offset Plastic Coupler Series with Metal Knuckles, with (#622) Coil Knuckle Spring, (#621) Torsion Spring, & Insulated (#233) Draft Gear Box. *Note: A 140-Series coupler mounted with the #252 gear box is the 30-Series equivalent. mounting dimensions but stronger. See Offset Charts HO-1, HO-3, HO-4*

- #31 Plastic - Long (25/64") Underset Shank - #233 Gear Box
- #32 Plastic - Medium (9/32") Overset Shank - #233 Gear Box
- #33 Plastic - Short (1/4") Centerset Shank - #233 Gear Box
- #34 Plastic - Short (1/4") Underset Shank - #233 Gear Box
- #35 Plastic - Short (1/4") Overset Shank - #233 Gear Box
- #36 Plastic - Long (25/64") Centerset Shank - #233 Gear Box
- #37 Plastic - Medium (9/32") Underset Shank - #233 Gear Box
- #38 Plastic - Medium (19/64") Centerset Shank - #233 Gear Box
- #39 Plastic - Long (25/64") Overset Shank - #233 Gear Box

"Scale" Head - Body Mount

2 pair of "Scale" Head, Die Cast All Metal (9/32") Medium Centerset Standard Shank Coupler, with (#625) Coil Knuckle Spring, (#634) Bronze Centering Spring & Insulated (#232) Draft Gear Box. *Note: The #158 coupler is the Whisker® Equivalent to the #58 coupler.*

See Offset Charts HO-1, HO-3, HO-4

- #58 Metal - Medium (19/64") Centerset Shank - #232 Gear Box

* Whisker® Shank

Standard Shank

Patent numbers 5,662,229

The Standard Shank design found on the #5, 9, 58, 20-Series, & 30-Series Couplers allows the couplers to be easily interchanged with #213, 232 (medium & long), 233, 234 (short), & 242 draft gear boxes as well as "molded on" coupler pockets.

The Whisker® Shank design found on the new #3, 115, 118, 119, 141, 142, 143, 144, 145, 146, 147, 148, 153, 156, 158, 178, & 451 couplers allows the couplers to be easily interchanged with #213, 232, 234, 242, 252, & 262 draft gear boxes as well as "molded on" coupler pockets.

Kadee® HO-Scale Whisker® Couplers

MAGNE-MATIC® COUPLERS
World's Best Magnetic Couplers!

Kadee® Manufactured
& Assembled in the
U.S.A.

Whisker® Shank Magne-Matic® Couplers

Standard Head Whisker® Couplers

2 pair of Couplers except as noted, Offset Die Cast All Metal Whisker® Coupler Series, with #622 Coil Knuckle Spring, & Insulated Draft Gear Box. Note: #148 Coupler has the same mounting dimensions, quality & dependability as the #5®. See Offset Charts HO-1, HO-3, HO-4

with #115 Log Car Gear Box - for use on Kadee® logging cars.

#115 Metal - #148 Medium (9/32") Centerset Shank

#115

with #242 Snap Together Gear Box See Offset Chart

#3 Metal - Assembled #148 Coupler & #242 Gear Box

#141 Metal - Long (25/64") Underset Shank

#142 Metal - Medium (9/32") Overset Shank

#143 Metal - Short (1/4") Centerset Shank

#144 Metal - Short (1/4") Underset Shank

#145 Metal - Short (1/4") Overset Shank

#146 Metal - Long (25/64") Centerset Shank

#147 Metal - Medium (9/32") Underset Shank

#148 Metal - Medium (9/32") Centerset Shank

#149 Metal - Long (25/64") Overset Shank

#148

with #451 Extended Swing Gear Box - for passenger or long freight cars. Perfect for negotiating tighter radius curves.

#451 Metal - #148 Medium (9/32") Centerset Shank (1 pair)

#451

Shelf Head Whisker® Couplers

2 pair of Couplers, Die Cast All Metal Fully Functioning Shelf Whisker® Coupler Series, with #622 or #625 Coil Knuckle Spring, & Insulated #242 Draft Gear Box.

See Offset Charts HO-1, HO-3, HO-4

#118 Metal - Type "SF" Shelf - Medium (9/32") Centerset Shank, #622 Coil Knuckle Spring

#119 Metal - Type "SE" Shelf - Medium (9/32") Centerset Shank, #625 Coil Knuckle Spring

#118

#119

"Scale" Head Whisker® Couplers

2 pair of Couplers, Offset Die Cast All Metal "Scale" Whisker® Coupler Series, with (#625) Coil Knuckle Spring, & Insulated #242 Draft Gear Box. Note: #158 Coupler has the same mounting dimensions, quality & dependability as the #58.

See Offset Charts HO-1, HO-3, HO-4

with #242 Snap Together Gear Box See Offset Chart

#153 Metal - Short (1/4") Centerset Shank

#156 Metal - Long (25/64") Centerset Shank

#158 Metal - Medium (9/32") Centerset Shank

with #178 "Scale" Snap-together Gear Box

Kadee® HO-Scale Conversion Kits

MAGNE-MATIC® COUPLERS
World's Best Magnetic Couplers!

Kadee® Manufactured
& Assembled in the
U.S.A.

Conversion Kits

Coupler Conversion Kits

Each kit includes Replacement bracket, Couplers & Gear Boxes.

- #450 For Stewart F-3 "A" & "B" & F-7 "A" & "B" Locomotives (Not For EMD FT "A" & "B" Locomotives)
- #452 For Bachmann Plus F-7 "A" & "B" Locomotives
- #455 For LIFE-LIKE® PROTO 2000™ "E-7" "A" & "B" & PA/PB Locomotives

Extended Swing Gear Box Kits

- #451 1 pair of #148 Medium (9/32") Centerset Shank Whisker® Couplers, with #622 Coil Knuckle Spring, & #451 Insulated Extended Swing Gear Box. for passenger or long freight cars for negotiating tighter radius curves.

- #454 Swing Bracket Adaptor Kit, Designed to provide a wide swinging coupler mounting bracket for locomotives and cars (60' and over) using modified 30-Series Gear Box included. The bracket allows negotiation of 18" radius "S" curves, switch ladders and crossovers. (Couplers Not Included)

Passenger Cars Conversion Bolsters

1 pair of passenger car conversion bolsters with Metal Medium Centerset Couplers. Each kit includes Standard Head, Die Cast All ^{NO 5} Metal Medium Centerset Standard Shank Couples, with (#622) Coil Knuckle Spring, (#634) Bronze Centering Spring, Conversion Bolster & Draft Gear Box.

- #505 For AHM, IHC, Con-Cor & Rivarossi 6-Wheel
- #508 For AHM, IHC, Con-Cor & Rivarossi 4-Wheel

Freight Car Storage Boxes

Keep your freight cars clean and safe when they are not in use. Clear plastic storage boxes and lids. Lid securely snaps to box for added protection. (One Each)

- #3000 Plastic Box Only
- #3010 Plastic Box & 40' Boxcar Nest
- #3011 Plastic Box & 50' Boxcar Nest
- #3012 Plastic Box & Hopper Nest
- #3013 Plastic Box & Open Hopper Nest
- #3014 Plastic Box & Tank Car Nest

Kadee® HO-Scale Uncouplers

Kadee® Manufactured
& Assembled in the
U.S.A.

MAGNE-MATIC® COUPLERS
World's Best Magnetic Couplers!

Uncouplers

Electric Delayed Uncoupler (Track Not Included)

#309 "Under-the-Track" - Fits any HO Code track. Operates: 16 volt DC.
We recommend a 16 volt DC power source (at least 3 Amps) or
18 volt AC power source (at least 3 Amps) converted to DC with bridge re

Use (normally open) Momentary Switches with Electric Uncouplers.
Like #165 Momentary Quickie Switches
The #166 Transformer meets AC power source voltage requirements.

WARNING: Do not use the uncoupler continually. **DO NOT activate the uncoupler for longer than 2 MINUTES at one time.** This will avoid possible overheating which will damage the uncoupler.

#309

Delayed Uncouplers

#308 HO thru O-Scale - "Under-the-Track"
Permanent Delayed Magnet (Track Not Included)

#308

Use the #334 Uncoupler Gluing Jig to aid in precision installation "Between-The-Rails" Uncouplers.

#321 "Between-the-Rails" - Code 100 Delayed Magnet (Track Not Included)

#322 "Between-the-Rails" - Code 83 Delayed Magnet, Also fits Code 70 to 55
with track modification (Track Not Included)

#321

Non-Delayed Uncouplers

Uncouples Only. Does not open knuckle enough for Delayed Position.

Use the #334 Uncoupler Gluing Jig to aid in precision installation "Between-The-Rails" Uncouplers.

#312 "Between-the-Rails" - Permanent Non-Delayed Magnet (Track Not Included)

#312

Uncoupler Gluing Jig

#334 Uncoupler Gluing Jig - Aid in precision installation of "Between-the-Rails" Uncouplers in track.

Kadee® HO-Scale Height Gauges & Spikes

MAGNE-MATIC® COUPLERS
World's Best Magnetic Couplers!

Kadee® Manufactured
& Assembled in the
U.S.A.

Coupler Height Gauges

Coupler Height Gauges

- 1) Provides instant visual reference of proper coupler height, standard and "scale" size couplers included
- 2) Accurately measures proper trip pin height above the rail
- 3) Built-in track gauge (N.M.R.A. Standard)
- 4) Moveable dowel tests Kadee® Magne-Matic® Uncoupler height and registers the needed adjustments
- 5) (#206 only) Provides instant visual reference of proper body mounting height.

- #205 All Metal Coupler Height Gauge
- #206 Insulated Coupler Height Gauge

Twin "Rail Spiker"

Spikes

Only for use with the Kadee® Twin "Rail Spiker".
Approximately 4000 per box

- #700-31 For Code 70 & Code 83
- #700-32 For Code 100

Twin "Rail Spiker" Parts

Only for use with the Kadee® Twin "Rail Spiker".
Subject to stock on hand only

Common Replacement Parts

- 700-14 Hammer Spring
- 700-19 Cutter Blade code 70
- 700-20 Cutter Blade code 100
- 700-21 Cutter Head code 70
- 700-22 Cutter Head code 83 & 100
- 700-25 Cutter Blade code 83

World's Best Magnetic Couplers!

Wheelsets

Freight & Passenger Code 110 "Standard" Wheels

Non Magnetic Free Rolling Contoured Axles with RP-25 Contour Wheels.
Twelve Sets

- #520 Wheel Set - 33" Smooth Back
- #521 Wheel Set - 36" Ribbed Back
- #522 Wheel Set - 36" Smooth Back
- #523 Wheel Set - 33" Ribbed Back
- #524 Wheel Set - 28" Smooth Back

Code 110
"Standard"
Wheels

Freight & Passenger Code 88 "Semi-Scale" Wheels

Non Magnetic Free Rolling Contoured Axles with RP-25 Contour Wheels.
Twelve Sets

- #530 Wheel Set - 33" Smooth Back
- #531 Wheel Set - 36" Ribbed Back
- #532 Wheel Set - 36" Smooth Back
- #533 Wheel Set - 33" Ribbed Back

Code 88
"Semi-Scale"
Wheels

The term Code 110 and Code 88 relates to the width of the wheels and has no relationship to track code. Code 110 wheels are .110" wide and Code 88 are .088" wide. Code 110 wheels are the common (or standard) width wheels and Code 88 are what is called "semi scale" and are used when the modeler wants a more prototypical looking wheel width. Actual HO-Scale prototypical wheel width would be around .067" wide and although they will run OK on the average track they will not go through common turnouts and crossings. Code 88 (.088") is just about the minimum width of wheel that will run on most standard or common track if gauged correctly. It really is a matter of appearances because there's very little operational differences between running Code 110 or Code 88 wheels. Code 88 wheels look really good and are most noticeable on open frame cars like hoppers and tank cars. However, they also look great on box cars, gondolas, and reefers but not quite as noticeable. As mentioned above track code and wheel code have no relationship meaning Code 110 and Code 88 will run on most any code of track. Track code is simply the measured height of the rail, code 100 is .100" tall, code 83 is .083" tall, code 70 is .070" tall, and so on.

#521 - Code 110

#531 - Code 88

Kadee® HO-Scale Freight Trucks

MAGNE-MATIC® COUPLERS
World's Best Magnetic Couplers!

Kadee® Manufactured
& Assembled in the
U.S.A.

Kadee® offers 4 variations of our HO-Scale Trucks.

Metal Fully Sprung, Equalized Trucks: All metal trucks with functioning spring design for truck equalization. Metal RP-25 wheels with insulated plastic axles, & scale clip on brake pads & brake rigging or cast on brake rigging*.
#500*, 501*, 504, 509*, 511*, 513, 515*, 517*, 518

Metal Fully Sprung, Equalized Trucks with Couplers: All metal trucks with functioning spring design for truck equalization. Metal RP-25 wheels with insulated plastic axles, scale clip on brake pads & brake rigging cast on brake rigging*, now with truck mount Whisker® Couplers. #502*, 503*, 510, 512*, 516*

Metal Fully Sprung, Equalized Trucks with Self-Centering: All metal trucks with functioning spring design for truck equalization. Metal RP-25 wheels with insulated plastic axles, scale clip on brake pads & brake rigging or cast on brake rigging*, & Self-Centering Action. The Self-Centering Action trucks self align themselves parallel with the car for easier placement on track.
#550*, 551*, 552, 553*, 554*, 555, 556*, 557*, 558

"HGC" Two Piece, Equalized Trucks with Self-Centering: "HGC" High Gravity Compound weighs nearly the same as Metal Trucks but with more detail & a 2 piece split bolster design for more efficient truck equalization, reduced axle friction for greater rolling performance. Metal RP-25 Code 110 or Code 88* wheels with insulated plastic axles, scale clip on brake pads & brake rigging, & Self-Centering Action. The Self-Centering Action trucks self align themselves parallel with the car for easier placement on track. Patent number 7,434,518 B2

Kadee® Cars

Designed, Manufactured & Assembled
entirely in the U.S.A.

40' PS-1 Boxcar

50' PS-1 Boxcar

PS-2 Hopper

Kadee® prides itself in creating and manufacturing premium "RTR" rolling stock as close to scale & detail as possible. Model railroaders can expect only the best quality & craftsmanship with every Kadee® quality product. Nothing stacks up to the accuracy, detail, quality, & authenticity of Kadee® Cars over all other "RTR" cars on the market.

ALL KADEE® HO-SCALE "RTR" CARS ARE STANDARD EQUIPPED WITH:

- Fully Assembled, Ready To Run, Premium freight cars, no glue ever used.
- Kadee® Magne-Matic® "Scale" Metal Couplers with delayed centering action.
- Kadee® smooth rolling, equalized, self-centering trucks with RP-25 non magnetic metal wheels.
- Premium prototypical scale grab irons, ladders, see-through roofwalk, brake wheels & brake rigging etc...
- N.M.R.A. standard weight, low center of gravity for optimum operating performance.
- Accurate legible highly detailed prototypical heralds & lettering.
- Limited production, making them valuable to collectors.
- Now Available 50' Functioning Hydrocushion Cars.

End details include scale incredibly detailed hand brake and rigging.

See-through running board and brake step.

Sharp prototypically accurate legible lettering.

Scale rivets, grabs, air lines, chains, & AB valve

Kadee® Functioning Hydrocushion Underframe & Magne-Matic® "Scale" Coupler with patented delayed centering action.

Highly detailed movable doors.

Scale ladders and grab irons.

CNW, DRGW, MKT, MP, SP, SSW, UP, & WP marks are made under trademark license from Union Pacific Railroad Company.

New Roads Released Monthly

#717 - Arch Bar Truck
4'-6" Wheel Centers

"HGC" Two Piece Fully Equalized Truck

Unassembled "HGC" Freight Truck with 26" Ribbed back wheels.
These are simple and easy to assemble and install.

"HGC" Two Piece, Equalized Trucks: "HGC" High Gravity Compound weighs nearly the same as Metal Trucks but with more detail & easy to assemble design, a 2 piece split bolster design for more efficient truck equalization, reduced axle friction for greater rolling performance. Metal RP-25 wheels with insulated plastic axles.

Included are center bushing adapters for attaching the trucks to various makes of cars such as Blackstone® and Micro-Trains®. These trucks require a flat mounting surface and some models may require trimming and filing of the car's bolster to make a flat surface. The bushings are designed for the original screws or where appropriate 0-48 self-tapping, 0-80 machine screws, or 1mm to 1.25mm metric equivalent. **Screws not included.**

1 Dozen

- #845 For #800, #801, #804, #805 & #816 O-Scale Couplers.
- #847 For #802, #803, #807 & #808 Couplers.

Gear Boxes with Lids

For #742, #745, #746, #747, #804 & #816 O-Scale Couplers.

- #817 Insulated Plastic Gear Boxes & Lids - 5 Pair
- #818 Metal Gear Boxes & Lids - 4 Pair
- #819 Extended Metal Gear Boxes & Lids - 4 Pair

#817

#818

#819

Uncouplers

Delayed Uncouplers (Track Not Included)

- #308 HO thru O-Scale - "Under-the-Track"
Note: O-Scale will require 2-3 magnets stacked together.
- #809 O-Scale 3 Rail - "Between-the-Rails"
- #811 O-Scale - "Between-the-Rails"

#308

#809

#811

Electric Delayed Uncoupler (Track Not Included)

- #810 O-Scale - "Thru-the-Track" - Fits codes 100, 125, 156, 172 track
Operates: 16 volt DC
We recommend a 16 volt DC power source (at least 2 Amps) or
12-20 volt AC power source (at least 2 Amps) converted to DC with bridge rectifier.

#166 Transformer meets AC power conversion requirements*.
*Additional components required for AC to DC Conversion.
Only use (normally open) Momentary Switches with Electric Uncouplers.
Like #165 Momentary Quickie Switches.

WARNING: Do not use the uncoupler continually. **DO NOT activate the uncoupler for longer than 3 MINUTES at one time.** This will avoid possible overheating which will damage the uncoupler.

#810

Wheelsets

The terms "Large Scale" refers to #1 (1:32 ratio) up to Fn3 (1:20.3 ratio). All of these scales run on the common 45 mm gauge track, which is actually #1 scale standard gauge track. This is considered narrow gauge track for the other large scales. Unfortunately, all of these Large Scales are generally referred to as "G" gauge or "G" Scale modeling. In fact G-Scale is the ratios of 1:24 (1/2") and 1:22.5.

Kadee® New "Large Scale" Freight or Passenger Wheels come in a 33" (1:29) wheel that happens to be the same as 36" (1:32) wheel. The Kadee® wheels sets will work in most manufactures truck journals. This is because of the different actual scale ratios, that Large Scale manufactures use, changing wheels may alter coupler heights. So when you change wheels or trucks always re-check the coupler heights with our Large Scale height gauge. When using Kadee® couplers it's important to make sure all your couplers are at the correct coupler height.

Kadee® Manufactured
& Assembled in the
U.S.A.

Kadee
MAGNE-MATIC® COUPLERS
World's Best Magnetic Couplers!

Notes:

Tools

Adaptor Insertion Pic

#230 For 20-Series #212 Talgo-Truck Adaptors

“Greas-em” Dry Graphite Lubricant

#231 This fine, dry graphite lubricant is specially selected for use with Kadee® Couplers. Add a puff inside your couplers, move them back-and-forth a few times to burnish the insides, and enjoy smooth action of your couplers. Also an excellent general purpose lubricant for use all around the layout to reduce friction in moving parts & bearing surfaces.

5.5 grams

“Speedi” Driver Cleaner

“Speedi” Driver Cleaners are easy to use and efficient. Just hook the power leads to a 12 volt DC source and touch the brushes against the driving wheels of your locomotive.

#236 HOn3 to O-Scale
#843 O to G-Scale

#236 Shown

Coupler Trip Pin Pliers

#237 For HO, HOn3, S, On3 & O Scale Couplers. Adjust trip pin to the correct height by gently squeezing with these specially designed pliers. The pliers have jaw surfaces that are curved and smooth. Adjusting the height of your Coupler Trip Pins is easier because the pliers surfaces conform to the bend of the trip pins and prevent them from kinking when bending or straightening.

TO BEND DOWN

TO BEND UP

5 Prong “Gripper”

#239 For handling small parts. This tool can help with difficult modeling chores. 5-prongs for grabbing, picking, pulling, lifting, and placing those small, difficult-to-grasp items.

Pin Vise

#240 Double headed Pin Vise with two reversible collets. Used for tapping and drilling.

Tools

“Dual Tool”

#241 Manual uncoupling tool & Spring Pic “Dual TOOL”

Tap & Drill Sets

WARNING: Cutting tools may shatter when broken. An approved form of eye protection is strongly recommended. Each set includes - Tap, Tap Drill and Clearance Drill

- #246 2-56 Tap + #50 & #43 Drills
- #247 1-72 Tap + #53 & #48 Drills
- #780 0-80 Tap + #55 & #52 Drills
- #1059 00-90 Tap + #62 & #56 Drills

Track Gauges

- #341 For Code 70 & Code 100 Track (HO)
- #342 For Code 55 66 and 70 (HO_n3)
- #343 For Code 83 & Code 100 Track (HO)

Coupler Assembly Fixture

Assembly fixtures are innovative tools that will assist you in assembling the Kadee® Magne-Matic® Couplers.

- #701 For #4, #5, #9, #43, #46 & #58 Couplers
- #702 For #711, #712, #713 & #714 Couplers
- #703 For #6, #7 & #8 Couplers

Coupler and Special Purpose Tweezers

#1020 - These tweezers are specially designed to hold Kadee® coupler shanks for easy installation of couplers and springs into draft gear boxes. Also great for many other uses around the layout.

Decal Paper, Momentary Switches, Transformer

Decal Paper

Store decals & decal paper flat in a cool dry place. Avoid exposure to heat, sun light, & moisture.

Application Instructions:

Don't leave in dish of water for more than 1 min. to avoid decal separating from backing in dish.

Cut out decal as close to lettering as your comfortable with, dip decal in clean water for about 10-15 sec. and remove. Place on wet cloth for 90+ sec., decal should now slide from backing easily.

Hold decal in desired location on model and slide backing away.

With a small soft wet paint brush you may fine-tune positioning.
Keep decal wet.

Gently dab/blot with a towel to remove extra water and allow to dry.

Test finishing solutions before applying to entire decal.

Clear Decal Paper

For use with ALPS printers, most laser printers, and color copiers. Before making multiple copies, always check to make sure the paper is compatible with the printer or copier you are using.

#3098 8-1/2 x 11 Clear (5) Sheets

#3099 8-1/2 x 11 Clear (1) Sheet

Street Marking Decals

- #3123 Dash - Yellow
- #3124 Solid/Dash - Yellow
- #3125 Solid/Solid - White
- #3126 Solid/Solid - Yellow

Dash

Solid /Dash

Solid/Solid

Hopper Decals

- #3121 CG - Black Lettering

Momentary Switches

Quickie Control Panel Switches

Single Pole, Single Throw, push button Control Panel Switches with color-coded caps. AC or DC at 3 amp.
Use for uncouplers, turnout motors, etc.

- #163 Black - (normally closed) & Red - (normally open) - 2 each
- #164 Black - (normally closed) - 4 each
- #165 Red - (normally open) - 4 each

Transformer

Plug-in Transformer

For use with Kadee® #309 & #810 Electric Uncouplers, Accessories, Etc.

#166 INPUT: 120VAC 60Hz OUTPUT: 18VAC 40VA 2.2A

Screws, Washers & Nuts

Fiber Washers

Fiber Washers Four Dozen

- #208 Red .015" Thick (1/4" O.D. x 1/8" I.D.)
- #209 Gray .010" Thick (1/4" O.D. x 1/8" I.D.)

Plastic Washers

Plastic Washers Two Dozen

Included in 30 Series Couplers.

- #210 1/32" Thick (5/32" O.D. x 5/64" I.D.)

Insulated Nylon Screws

2-56 Insulated Screws One Dozen

- #256 2-56 x 1/2" Long

Metal Screws

0-48 Screws Two Dozen

- #400 0-48 x 1/8" Long
- #401 0-48 x 3/16" Long
- #402 0-48 x 1/4" Long
- #403 0-48 x 3/8" Long

Zinc-Plated Steel Screws

2-56 Screws One Dozen

- #1711 2-56 x 3/4" Long

Stainless Steel Screws

2-56 Screws One Dozen

- #1703 2-56 x 1/8" Long
- #1706 2-56 x 1/4" Long
- #1708 2-56 x 3/8" Long
- #1709 2-56 x 1/2" Long
- #1710 2-56 x 5/8" Long

1-72 Screws One Dozen

- #1683 1-72 x 1/8" Long
- #1686 1-72 x 1/4" Long
- #1688 1-72 x 3/8" Long
- #1689 1-72 x 1/2" Long

0-80 Screws One Dozen

- #1643 1-72 x 1/8" Long
- #1646 1-72 x 1/4" Long
- #1648 1-72 x 3/8" Long
- #1649 1-72 x 1/2" Long

Stainless Steel Washers

2-56 Washers One Dozen

- #1701 2-56 Washer

1-72 Washers One Dozen

- #1681 1-72 Washer

0-80 Washers One Dozen

- #1641 1-72 Washer

Stainless Steel Nuts

2-56 Nuts One Dozen

- #1700 - 2-56 Nut

1-72 Nuts One Dozen

- #1680 - 1-72 Nut

0-80 Nuts One Dozen

- #1640 - 1-72 Nut

Storage

Plastic Storage Boxes

Clear plastic storage boxes. 3000, 3010, 3011, 3012, 3013, 3014 are also listed on page HO - 11
(One Each unless noted)

- #3000 Plastic Box only
- #3010 Plastic Box with 40 Ft. Boxcar nest
- #3011 Plastic Box with 50 Ft. Boxcar nest
- #3012 Plastic Box with Covered Hopper nest
- #3013 Plastic Box with Open Bay Hopper nest
- #3014 Plastic Box with Tank Car nest
- #3020 Medium Plastic Jewel Storage Boxes - 2.56 x 2.56 x 0.5 Plastic Storage Boxes with foam
- #3020-6 Medium Plastic Jewel Storage Boxes - 2.56 x 2.56 x 0.5 Plastic Storage Boxes with foam - 6 pack
- #3020-12 Medium Plastic Jewel Storage Boxes - 2.56 x 2.56 x 0.5 Plastic Storage Boxes with foam - 12 pack
- #3021 Small Plastic Jewel Storage Box - 3.5 x 0.69 x 0.38 Plastic Storage Box
- #3022 Plastic Storage Box, 4 Medium (with foam)& 2 Small Jewel Boxes

Kadee® - RC System

KADEE® RC

Kadee® RC Remote System

Uncouple Anywhere*

Truly Wireless
Additional Auxiliary Features
No Track Signal Needed
Stand-Alone System

Open & Close Large Scale Couplers with a Push of a Button.

Turn On and Off lighting, switches, turnouts, motors and more... with a Push of a Button.

NEW

TRUE WIRELESS IS HERE

Kadee® RC Brings the Best of Old & New Technologies Together.
Kadee® Magne-Matic® Couplers & Kadee® RC Remote System.

The Exciting New Series of G-Scale Kadee® RC Couplers can be operated with your existing Kadee® magnetic uncouplers and also uncouple remotely anywhere* with the NEW (patent pending) Kadee® Radio Control System.

By incorporating Kadee® RC Radio Control System in to your layout, you can bring the best of old & new technologies together. Kadee® Magne-Matic® Remote Couplers can be operated by any one of the Kadee® uncouplers you already have in your layout or they can be operated independently using the Kadee® RC Hand-Held Transmitter that can operate remote couplers, lighting, switches, turnouts, motors and more. Up to 99 Receivers can be operated from just one Transmitter.

Current Features:

- Auto Shutdown
- Group Operation
- Long Battery Life
- Battery Monitoring
- Up to a 300' range
- Remote Uncoupling

- Large Tactile Keypad
- Stand Alone Operation
- Multiple Operating Modes
- Simple Addressing & Binding
- Operate up to 99 Remote Devices
- Receiver with On-board 250mA Relay

- Monitor Receiver Status in LCD Display
- Accommodates Standard Hobby Servos

Patents Pending, Patent numbers 7,810,660 B1

Quality Products Co.
673 Avenue C,
White City, OR 97503-1078

Made & Assembled Entirely
in the U.S.A.

© 2013, Kadee® Quality Products Co.

* Limited uncoupling on curves.

Kadee® - RC System

Components

Hand-Held Transmitter

The Kadee® RC Hand-Held Transmitter can operate remote couplers, lighting, switches, turnouts, motors and more, up to 99 Receivers can be operated from just one Hand-Held Transmitter.
Batteries not included.

#11215 Hand-Held Transmitter

Current Features:

- Auto Shutdown
- Group Operation
- Long Battery Life
- Battery Monitoring
- Up to a 300' range
- Remote Uncoupling
- Large Tactile Keypad
- Stand Alone Operation
- Multiple Operating Modes
- Simple Addressing & Binding
- Operate up to 99 Remote Devices
- Receiver with On-board 250mA Relay
- Monitor Receiver Status in LCD Display
- Accommodates Standard Hobby Servos

Hand-Held Transmitter

Receiver Kit

The Kadee® RC Receiver can operate the One Standard Hobby Servo and has a built in 250mA Relay For lighting, switches, turnouts, motors and more. **Batteries not included.**

For use with the #11215 Hand-Held Transmitter sold separately.

Note: Powering the Receiver from any other power source will void the warranty.

#11110 Receiver Kit

Includes: One Receiver Module, One 4 cell AA Battery Holder, One Wiring Harness, Fuse & Fuse Holder.

Receiver Module

Wiring Harness

Fuse & Fuse Holder

4 cell AA Battery Holder

Standard Servo Kit

#11120 Standard Servo Kit

Includes: One Hitec (HS-311) Servo, One Standard Vertical Servo Tray, Four 1/8 X 1/4 X 1/16" Grommets, Four Eyelets, Two #4 X 1/4" Screws, Alcohol Wipe, Double Sided Tape.

Standard Vertical Servo Tray

Hitec (HS-311) Servo

Standard Vertical Servo Tray - for Hitec (HS-311)

#11200 Standard Vertical Servo Tray - for Hitec (HS-311)

Includes: One Servo Tray, Four 1/8 X 1/4 X 1/16" Grommets, Four Eyelets, Two #4 X 1/4" Screws, Alcohol Wipe, Double Sided Tape.

Standard Vertical Servo Tray

Patents Pending

Kadee® - RC System

Components

Starter Kits

This package of Kadee® products is designed to get you started with Kadee® RC System. The kit contains all the necessary hardware to convert one body mount large-scale car to a remote uncoupling car with an auxiliary 250mA power relay. **Batteries not included.**

#11100 G-Scale Body Mount Coupler Starter Kit (single or dual remote uncoupling)

Designed for use with Freight & Passenger cars. Includes the following products:

#11215 Hand-Held Transmitter, #11110 Receiver Kit, #11115 Body Mount Coupler Kit

#11105 G-Scale Actuated Body Mount Coupler Starter Kit (single remote uncoupling)

Designed for use with Locomotives, Freight & Passenger cars. Includes the following products:

#11215 Hand-Held Transmitter, #11110 Receiver Kit, #11220 Actuated Body Mount Coupler with Gearbox (Assembled)

Body Mount Remote Coupler Kit *Designed for use with Freight & Passenger cars.*

The Kit includes the necessary components to convert both ends of one car to Remote Couplers. The #11115 Kit includes #906 couplers that will body mount anywhere a #830 coupler will. The car can be setup to remotely operate a single coupler or both couplers simultaneously.

If Kadee® RC Remote System is being used to operate Remote Coupler, the #11110 Receiver Kit (sold separately) is needed.

*We recommend operating Kadee® RC Remote Couplers using the Kadee® RC Remote System, other means of operating & controlling the servo can be used with Kadee® RC Remote Couplers, as long as the degree of servo rotation is adjustable. The Kadee® RC Remote Couplers are designed to operate with 90 degree servo rotation only. **Note: The use of any other means of operating the Kadee® RC Remote Couplers other than a Kadee® RC Servo Controller (Example: #11110 Receiver Kit) will void the warranty.***

#11115 G-Scale Body Mount Coupler Kit (single or dual remote uncoupling)

Contains: Two #906 G-Scale Couplers & Gearboxes, Two Trip Pin Linkage Collars, Two Short Linkage Rods, One Long Linkage Rod, Two #841 Shims, Mounting Screws & Hardware, One #11120 Standard Servo Kit (One One Hitec (HS-311) Servo, One Standard Vertical Servo Tray, Four 1/8 X 1/4 X 1/16" Grommets, Four Eyelets, Two #4 X 1/4" Screws, Alcohol Wipe, Double Sided Tape).

Actuated Body Mount Coupler with Gearbox *Designed for use with Locomotives, Freight & Passenger cars.*

This product allows you to convert to a Remote Coupler easily. The #1 & G Scale Actuated Body Mount Gearboxes are the same & will body mount anywhere a #830 gearbox will mount. The #11220 will mount on a #830 platform and be at the #830 G-Scale coupler height. The #11221 will mount on a #830 platform and be at the #820 #1-Scale coupler height. Couplers can be custom body mounted to most locomotives. The kit contains one ready to mount assembled "all in one remote coupler" (coupler and gearbox with built in ultra nano servo).

If Kadee® RC Remote System is being used to operate Remote Coupler, the #11110 Receiver Kit (sold separately) is needed.

*We recommend operating Kadee® RC Remote Couplers using the Kadee® RC Remote System, other means of operating & controlling the servo can be used with Kadee® RC Remote Couplers, as long as the degree of servo rotation is adjustable. The Kadee® RC Remote Couplers are designed to operate with 90 degree servo rotation only. **Note: The use of any other means of operating the Kadee® RC Remote Couplers other than a Kadee® RC Servo Controller (Example: #11110 Receiver Kit) will void the warranty.***

#11220 G-Scale Actuated Body Mount Coupler with Gearbox (Assembled)

#11221 #1-Scale Actuated Body Mount Coupler with Gearbox (Assembled)

Kadee® - RC System

Components

Servo Controller

Adds servo control to DCC, AirWire, Bluetooth, or other locomotive control decoders with auxiliary/function output. Allows control of Kadee® RC Remote Couplers (factory programmed), turnouts, crossing gates, semaphores, windmills, water wheels, gondolas, trams, roundabouts, cranes, & drawbridges...

Note: The #11130 Servo Controller is equipped with a On-board 250mA Relay for lighting or other remote switching needs.

#11130 Servo Controller (DCC, AirWire, etc.)

LIMITED WARRANTY

Kadee Quality Products will repair or replace, at our sole option without charge, any Kadee Remote Control Product or Kadee Remote Control system products affiliated with Kadee Remote Control system (#11110, #11130, #11215, #11225, #11230) determined by Kadee to be defective, where such product fails due to a defect in material or workmanship within (1) Year following the initial consumer purchase. Kadee's responsibility and liability pursuant to this warranty is expressly and solely limited to the replacement and repair of the Kadee Product in accordance with this warranty.

This warranty is limited to the original "Purchaser" and is not transferable or assignable. This warranty covers only those Kadee Products purchased from an authorized dealer. Third party transactions (such as EBAY) are not covered by this warranty.

Proof of purchase or product registration reflecting a purchase within the warranty period is required for warranty claims. Further, Kadee reserves the right to change or modify this warranty without notice and disclaims all other warranties, express or implied.

This warranty does not cover: normal wear and tear, cosmetic or physical damage to the surface of the product, including cracks or scratches. Any damage due to improper installation, operation, maintenance, handling, accident, fire, water or liquids, power changes, abuse, alteration, modification, negligence, battery leak, damage caused by third parties, damage due to attempted repair by anyone other than Kadee, acts of God, devices purchased from anyone other than an authorized retailer or distributor or devices that have been previously registered.

This warranty is considered void if the product case has been opened or the protective wrap has been removed by anyone other than Kadee.

Any device needing to be returned to Kadee must have a return merchandise authorization (RMA) number. Any device received at Kadee without a valid RMA number will be returned to the sender at sender's expense. RMA numbers are valid for (10) business days.

Kadee reserves the right to inspect any and all equipment involved in a warranty claim. Repair or replacement decisions are at the sole discretion of Kadee.

A technical representative will be able to determine if the device is defective and still under the limited warranty period. It also may be necessary for the device to be sent for evaluation to determine the validity of the warranty claim.

If the device is not deemed defective or is out of the limited warranty period, you may be given the option to repair the device for a fee or have the device returned as is at your expense.

DISCLAIMER:

REPAIR OR REPLACEMENT AS PROVIDED UNDER THIS WARRANTY IS YOUR EXCLUSIVE REMEDY. THIS WARRANTY IS IN LIEU OF ALL OTHER EXPRESS OR IMPLIED WARRANTIES. KADEE SHALL NOT BE RESPONSIBLE OR LIABLE FOR ANY SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES FOR BREACH OF ANY EXPRESS OR IMPLIED WARRANTY ON THIS PRODUCT, EXCEPT TO THE EXTENT PROHIBITED BY LAW. ANY IMPLIED WARRANTY, INCLUDING THE WARRANTY OF MERCHANTABILITY OR THE WARRANTY OF FITNESS FOR A PARTICULAR PURPOSE ON THIS PRODUCT IS LIMITED IN DURATION TO THE TERM OF THIS WARRANTY. Some states/countries do not allow limitations of how long an implied warranty lasts or the exclusion or limitation of such damages, so these limitations and exclusions may not apply to you. This warranty gives the consumer specific legal rights and you may also have other rights which vary from location to location. If any portion of this warranty is held to be invalid or unenforceable for any reason, such finding will not invalidate any other provision.

Note: Powering the #11110 Receiver Kit from any other power source will void the warranty.

Note: The use of any other means of operating the Kadee® RC Remote Couplers other than a Kadee® RC Controller (Example: #11110 Receiver Kit or #11130 Servo Controller) will void the warranty.
